

Straub May Be Name Of Dormitory

Seniors Naming Of Hall After Dean

Bust Being Made of "Grand Old Man"; Upperclassmen Favor Renaming of Sherry Ross

A special committee of faculty members will meet at 2 p. m. today to confer on the proposed naming of the men's dormitory after the late John Straub, dean emeritus. If the committee, which was appointed by E. M. Pallett, registrar, decides that the dormitory should be so named, Mr. Pallett will submit a recommendation to the state board through Chancellor Kerr.

The suggestion to change the name to honor the University's "Grand Old Man" was previously submitted by the senior class to the board. The board was reported to have been favorable, but delayed action because it felt that more knowledge of the situation was needed.

Cecil Espy, president of the senior class, will be present at today's meeting. The senior class is having a bust made of the dean emeritus and is highly enthusiastic to have his name given to the dormitory.

No definite comment on the situation could be obtained regarding the proposal, but it was reported that the technically regarding a land donation was not greatly involved. The land had been given on condition that a hall bear the name of Sherry Ross. It was also reported that the committee might do one of three things at the meeting today. One is to recommend the move. Another is to turn it down, and the third is a possible failure of the committee to complete its investigation.

Some of the float ideas already announced include: Hansel and Gretel, the Land of Oz, the Old Woman in the Shoe, Cinderella, Rapunzel, and others.

A new loud speaker system will be installed, so that the features on the program platform will be clearly heard by the entire audience. The bleachers have a seating capacity of around 2,500, and it is expected that, as in the past, every seat will be taken.

Order, Precision Assured

A telephone system will insure order and precision in starting the floats down the mill race, and ingenious plans of snubbing the entries at various points down to the arch are being worked out. Men will swim alongside the floats, guiding them and checking their speed.

Lighting facilities that will transform the scene into an aura of vari-colored splendor are to be installed, to light the various entries as well as the program platform, where Fred Peterson's band will enliven the evening with specially arranged music and features.

Today Marks Anniversary Of Gift Statue

Pioneer Mother Unveiled, Dedicated Year Ago

Barker's Presentation Marked New Conception of Early Day Theme

Just one year ago today a large campus gathering witnessed the unveiling of the statue of the Pioneer Mother, a gift of Burt Brown Barker, vice-president of the University. The statue, which is situated in the women's quadrangle, was executed by A. Phimister Proctor, noted sculptor, and was dedicated to the memory of Mr. Barker's mother, Elvira Brown Barker.

A notable assemblage of Oregon pioneers were present at the dedication. Mr. Barker delivered the address of the day, tendering the gift to the University. The speech of acceptance was made by C. L. Starr, president of the state board of higher education.

The statue is an entirely new conception of the theme of the pioneer mother. Other sculptures reveal her braving the hardships of the frontier days, aiding in carving out a home in the wilderness. Mr. Barker pointed out that the Proctor representation of the pioneer mother rather portrayed her in the sunset days of her life, looking calmly and serenely across the scene of her earlier efforts.

Commenting on his mother, to whom the statue was dedicated, Barker said:

"My mother endowed me with powers which teachers trained in to a love for beauty. Therefore, I wish to do honor to my mother, for without her zeal I would have fallen by the way early in life. Accordingly, I wish to dedicate the statue of the Pioneer Woman of the State of Oregon in memory of my mother, Elvira Brown Barker."

In the editorial columns of today's issue is reprinted an editorial commenting on the unveiling of the statue.

Thirteen states and one Canadian province are cooperating with the United States department of agriculture in an effort to develop wheat strains for the soft winter wheat belt which will withstand winters better than present varieties.

It's the Southern Sunshine that helps to make them Mild and Mellow

Bright Tobacco is another reason why Chesterfields are Milder and Taste Better

MELLOWNESS is a quality you can't get overnight. It has to begin in the young tobacco plants. And that's one reason why we use just the right amount of "bright" tobacco from old Virginia, the Carolinas and Georgia. Because it's full of Southern sunshine... with a fine, light color that "smiles right back at you."

We age this leaf for two years, and then blend and cross-blend it with the other kinds of Domestic and Turkish tobaccos in Chesterfield so you get a cigarette that's milder and tastes better. We believe you will thoroughly enjoy Chesterfields!

This is a typical leaf of prime "Bright" tobacco... the kind we use in the Chesterfield blend.

Chesterfield

There are four absolutely different types of tobaccos in Chesterfield Cigarettes. One of them is Bright Tobacco.
