NEW PANHELLENIC ALUMNI ADVISORY GROUP ON CAMPUS

To Work With Personnel Division Of Dean of Women's Office To Be One Function

The newest organization whose influence will be felt on the campus is the Panhellenic Alumni Advisory group, Marian Lowry Fischer, chairman of the group describes its function thus: to cooperate with the active campus Panhellenic and to cooperate with the personnel division of the University and the dean of women's office.

Meetings are to be held at least once a term and will be a round table forum. Problems, such as finance, establishment of houses, and house management, will be discussed. Helpful decisions reached about any difficulty common to all sororities will be referred to the local Panhellenic.

As chairman, Mrs. Fischer will call all meetings and make arrangements for starting the program. Their next meeting will be held just before or after spring vacation.

Two alumni from each house make up the group. Organized for alumni advisers of each house, the members from an individual house may alternate with other members of that house's alumni council.

Dean Scherwing stresses the constructiveness of the group stating that it will aid the houses in the common problems confronting them all.

"They will be able to help the houses through this depression period," she remarked.

Life, for Helen Norris, author of the first radio play ever written, began in the ordinary way. She could run, jump, swim, dance, dive, and play just like other children.

But whatever force governs the destiny of human beings ruled that Helen Norris should not live life the ordinary way—at the age of eight she was stricken with a serious case of infantile paralysis, and since then she has only been able to live as an observer, she can only stand by and watch others run, jump, swim, dance, dive, and play.

Miss Norris, who has been visiting Eugene as the guest of Mr. and Mrs. W. L. Van Loan, has not permitted her physical incapacity to limit her intellectual life. From her 40-acre fruit ranch near Medford, she speaks to the world—she writes radio plays. Life for her has been a constant struggle, her illnesses long and hard, but she has lived up admirably well to the words of the poet, "Some one said it couldn't be done, but she with a smile, said that maybe it couldn't, but she wouldn't be the one to say so until she tried." She has tried, and succeeded, and today is one of the leading radio play writers in the United States.

Miss Norris wrote the first play designed exclusively for radio presentation. She was listening to Wilda Wilson Church, San Francisco's pioneer director of radio plays, one evening, about five years ago, when she asked listeners to submit plays written exclusively for radio. Within a week Miss Norris' "Just Plannin'" was in the hands of the producer and was presented over KGO a few weeks later.

During the last three years Miss Norris has written 45 plays, all of which have been dramatized over the NBC network, through KNX and other leading stations.

In one week, Miss Norris received 1000 letters from listeners. "There were letters from every part of the United States," she said, "from all classes and types of people. It has always been a marvel to me that so many people have been so sincerely interested."

"I have always had a great desire to write," Miss Norris said, "but it was through the extension division of the University of Oregon that my desire was made a possibility. Through the interesting contacts made with University readers, two of whom are Mrs. Eric W. Allen and Mrs. Grace Mann, and because of the inspiration and guidance received from them, I began to write."

"My days were filled with events those first three years of writing, but I had four major orthopedic operations on the side, and cherish unforgettably jolly memories of hospital life."

Perhaps it is her ability to find humor in life, and even in its tragedies, and incongruities, that makes Miss Norris so charming and enthusiastic. To the writer, she is a modern Elizabeth Barrett, and like the Elizabeth Barrett of Wimpole street, Miss Norris too is fond of dogs. Her's is Peter, and perhaps not quite so intelligent and vain as the Barrett "Flush" but just as faithful and nice.

Ah, Woman! Here's Latest On How to Glorify Tresses

M. Louis, croix de guerre winner in war, Beau Brummell in peace, has recently been imported by a Portland department store from Saks Fifth avenue, New York. M. Louis, who attained the rank of captain in the war, ironically enough had gone unscathed until just an hour before the armistice was signed. He has become famous through his development of a new art, sculptor hair-dressing.

He explained his method to an Emerald reporter last week in Portland as follows: a woman with unruly locks and an outworn method of hair-dressing presents herself to M. Louis. He then studies the contours of her head, her social standing (which is very important, he says—"You can't mold a regal coiffure on a dish-washer"), and her type of hair, for a model in clay on which he practices and demonstrates.

If the client is pleased with herself as personified by the clay, she orders the style for the flesh. She thus presumably makes herself the envy of her neighbors. M. Louis continued with a discussion of current style trends.

"Decidedly the flowing hair of the Garbo mode is out. In its place, the smart woman in New York and Paris is mimicking the ancient Greek style with a modern dash—the plastic curl. With meticulous taste she swirls and molds her locks about her head in curls of every conceivable size and shape."

"How does one make these curls?" asked the reporter, who held fast to her belief in the Garbo mode.

"A soft and pliable permanent is the first step. With a good one, dampened hair will fall easily into small curls, and with careful dressing, into the plastic curl of the Greek mode. The important thing is that hair is on the upward trend. It is piled high but neat and close to the head."

Launching into generalities of style, he continued, "Style is life. It is a moving, progressing force. Throughout history every important historical change was accompanied with a new style of hair dress. Witness the various French modes. So today—but now we are copying one of the most famous

eras in classical art, the Grecian mode. Women in New York and Paris have already adopted this style."

M. Louis has been called the outstanding coiffure artist of the day. He operates a shop in Saks, Fifth avenue, New York, and several on the European continent. Originally he was a sculptor but entered the war in which he became captain, received the croix de guerre, was commended by Mussolini, and then returned to his art.

He concluded, "The women who came into my studio were often beautifully gowned but wore their hair incongruously. It was necessary to redress their hair and in this way, I became interested in what is now called the sculptor-hairdress. I combined my arts."

Catholic Religion Topic at Meeting

Father Leipzig of the local Catholic church conducted a discussion on the creeds and beliefs in the Catholic religion Wednesday night at the Y. M. C. A. hut.

Questions by the students covering the subjects of God, the divinity of Christ, Christ's purpose on coming to the world, divorce, birth control, and others were directed to Father Leipzig.

Members of the Y cabinet, including Howard Ohmart, Jay Wilson, Eugene Stromberg, and Cosgrove LaBarre, were present. Other students, both men and women, about 20 in all, attended.

Baskets to Be Placed In Closed Cupboards

A valuable collection of Indian baskets which have been kept on open shelves in Condon hall will be placed in new glass-enclosed cupboards, another benefit from the campus activities of the C. W. A. Laboratory and research rooms in Condon are being provided with new shelves and cupboards. Geological specimens and geographical pamphlets will be better protected as a result.
