

KOAC to Offer De Busk's Talk On Education

Second Radio Lecture to Be Offered at 3:45 Tuesday Night

Children's Reading Clinic Work Discussed

Answering questions and letters on education will be features of the lecture "Technique by Which Our Work with Beginners Is Accomplished," given by Dr. B. W. DeBusk, University professor of education, in his second radio talk of the series over KOAC, Tuesday evening January 15, at 8:45.

Last Tuesday night, Dr. DeBusk discussed "The Development of the Summer Session Reading Clinic for Children," in which he said that the clinics were begun in 1928 with a group of 15 children who could not read or who read poorly. "We had to dig up the 15 children for the first clinic," he said. At the end of the summer session, the Eugene Kiwanis club contributed \$100 to continue the clinic through the post session, as well as a \$25 contribution from the parents of the children.

Following the first clinic, applications came in increasing numbers, so that by 1931, the limit was placed at 100, and reduced to 25 in 1934. Dr. DeBusk said that the 1934 enrollment was actually about 30, due to the admission of a few needy children.

"It is our policy now to take only those children who need specific training in reading, spelling and arithmetic," he said.

The courses for teachers and supervisors attending the sessions include a course in psychology, one in remedial procedure, and practice teaching with the cases in the clinic.

The 1934 session drew children from such distances as southern California, northern Washington, Milwaukee, Wisconsin, and Honolulu. Teachers and supervisors came from Illinois, Texas, North Dakota, and Hawaii.

Alpha Delta Sigma At Surprise Party Honors Schomp

Stoddard Tells of Position Awarded Prominent Campus Man

A banquet that was originally intended as a farewell event for Ralph S. Schomp was transformed into a congratulatory affair last night at McCrady's cafe. Tom Stoddard, representing Graduate Manager Hugh Rosson, announced the appointment of Schomp to the position of assistant graduate manager in charge of all student activities except athletics.

The gala event was sponsored by Alpha Delta Sigma, men's national advertising honorary and was planned as a complete surprise to Schomp. He has been a very active member in the organization, his latest achievement being the managing of the "Esquire" Krazy Kopy Krawl, that was given at the Eugene hotel under the auspices of the advertising group.

Many of Schomp's friends, both student and faculty, were invited to the banquet as guests of honor. The appointment of Schomp came as a complete surprise to everyone present.

Alpha Delta Sigma presented the honor guest with a leather brief case on which Schomp's name was engraved.

Faculty Men Featured At Round Table Dinner

Members of the Oregon faculty played prominent parts in the monthly dinner meeting of the Round Table which was held Tuesday evening in the Osburn hotel.

Ernest G. Moll, associate professor of English, delivered a paper on "The Place of the Artist in Modern Society." Dr. Albert E. Caswell, professor of physics, was elected to fill a vacancy, while Dr. H. B. Yocom, professor of zoology, was nominated to fill the vacancy caused by the resignation of Prof. Louis F. Henderson, of the research department of biology.

The Round Table is limited to fifty members, of which twenty-five are members of the University faculty and twenty-five are selected from among the business and professional men of Eugene.

Earhart Plane Streaks East In Ocean Hop

Noted Aviatrix Leaves Hawaii in Heavy Rainfall

Flier Reported Radioing Honolulu Station

HONOLULU, Jan. 11.—(AP)—Amelia Earhart Putnam, only woman to fly alone across the Atlantic, challenged the Pacific tonight, taking off on a projected 2,400 mile ocean flight to California—a stretch never flown "solo" by any flier.

Undaunted by a heavy downpour of rain that made Wheeler field heavy with mud, Miss Earhart took off at 4:45 p. m. (10:15 p. m., eastern standard time), forced her heavily loaded plane upward and streaked out directly toward Oakland.

Flying almost on the heels of a storm, Miss Earhart appeared to be heading for clearer skies. Naval weather reports said conditions were clearing on her route. Unsettled weather prevailed off the northern California coast, however.

SAN FRANCISCO, Jan. 11.—(AP)—Globe Wireless reported here tonight its Hawaii station had picked up the radio call letters of Amelia Earhart Putnam's trans-Pacific plane and that the noted aviatrix could be heard speaking to station KGU of Honolulu.

Better Emerald Drive Announced at Meeting

A drive for a better Emerald with greater reader interest was initiated at a meeting of the staff held yesterday in the Journalism building.

Charles M. Hulten, journalism instructor, and Bill Phipps, editor in chief, both stressed the fact that names are news and that it is the purpose of a newspaper to give readers what they want.

Bob Lucas, new managing editor, in a vigorous pep talk stressed the need of cooperation on the part of the reporters, copy readers, and proof readers, in making the Emerald a success instead of leaving all the work to a few people.

Malcolm Bauer, retiring managing editor, thanked the staff for their work on the Emerald last term and urged them to cooperate in the future.

To encourage better work by reporters, various prizes are being offered. Quality as well as quantity will be stressed. There will be a prize of \$5 for the best news story of the term.

Theater passes will be given for the week's best news story, headline sports story, and proofread paper. They will also be given for the largest number of personal items turned in and published each week, the most news stories published, the most headlines written, and the most tips over five that are turned in.

In order to remind the staff to play up names in stories, posters have been placed on the walls of the news room.

Today's News

(Continued from Page One) about the past of the brides, it is said, the bridegrooms demanding only that they be healthy, romantic and willing to work on the land.

A sidelight on the economic considerations involved is the fact that the trade in brides has had the effect of "dumping" on the south Serbia market, with the result the price of wives has fallen so rapidly that daughters, instead of representing potential wealth to their parents, often prove to be a burden.

WASHINGTON, Jan. 11.—(AP)—Authoritative indications that congress will be asked for stiff regulation of holding companies, barring many rate-increasing practices, today dominated a series of developments in the public utilities field.

President Roosevelt's power policy committee drafted a bill to forbid, among other things, the pyramiding of holding companies, the assessment by such concerns of management fees from operating companies, inflationary write-ups of values, the appliance of pressure upon operating companies to increase returns on stocks.

STRUGGLING YOUTH DIES NEW YORK, Jan. 11.—(AP)—Stanley Walker, 12—the boy who had one chance in a million—died today of the streptococcus infection he had fought for more than a month.

His millionth chance depended, physicians said, on obtaining the blood of one of the 11 persons in the city who had recovered from the malady.

A public appeal was made for a donor. Police radio cars searched the city for one of the eleven. Newspapers cooperated in the search.

Finally, on December 13, Leon Zaskevich, a 30-year-old fur salesman, riding home on a bus, read of the case in a newspaper. He

himself had recovered from the disease. He left the bus and notified the hospital of his willingness to aid the boy.

His blood was found satisfactory. That night a transfusion was made and two days later a second was administered. The boy rallied and physicians were hopeful he might recover.

It looked as if Stanley might get that one-in-a-million chance. He continued to hold his own for the next few weeks, but yesterday he began to fail. He died in an oxygen tent.

SAAR MANIPULATION

BERLIN, Jan. 11.—(AP)—An official communique issued today said the Saar Basin, on its reunion with the Reich, will be taken over as a single unit which it was during all the years it was separated from Germany.

The Saar and the Palatinate together will form one district of the national socialist organization under district leader Joseph Buerckel, present Reich commissioner for Saar affairs, it was announced.

The communique said Buerckel had been appointed commissioner in charge of making effective reunion of the Saar with Germany.

Carnegie Room at Music Building Is Open to Students

The Carnegie room of the music building will be open to all students wishing to take advantage of the benefits offered there, regardless of whether or not they are music students. Students who wish to have any compositions of classical nature played on the "Capehart" electric reproducing machine, a new acquisition of the music department which reproduces recordings perfectly, are well-

come to make use of this service. There is a collection of excellent musical text books in the room, as well as the entire private library of Dean Landsbury, at the disposal of those wishing to use them.

There will be an attendant and a librarian on duty an average of six hours per day in the Carnegie room. Following is a schedule of available hours:

Monday: 9:30-12, 1:00-6.
Tuesday: 10-12, 1-2:30.
Wednesday: 9:30-12, 1-5.
Thursday: 10-12, 1-2:30.
Friday: 9:30-12, 2-4:30.
Saturday: 9:30-11, 2-4:30.

Send the Emerald to your friends.

Stellar Explosion Creates New Star

A stellar catastrophe has created a new star, Nova Herculis, which can be seen in the early evening in the northwestern sky below Vega.

The most recent addition to the realm of star gazers and astronomers is visible to the naked eye and has surprised them by continuing to explode and increasing its magnitude. Early plates of the star showed it to be of the fifteenth magnitude but an explosive outburst caused its brilliance to increase 100,000 times in less than a month to the third magnitude. From there its increase has continued until it may be exceeded in brightness by only eight stars, one of which is Vega.

The new star was discovered by J. B. M. Prentice, British meteor observer. Observations from the Yerkes observatory show that the star is still expanding, with the outer atmospheric shell moving outward at the rate of 162 miles every second.

Professor J. H. Pruett, who was formerly a professor at the University and who is interested in astronomy, gives directions on finding Nova Herculis. "Look at the northwestern sky early in the evening," says Professor Pruett. "Only one brilliant star may be seen in that region and that is Vega. The new star is the first star to be seen just at the right of Vega, but it is rather inconspicuous beside the brilliant Vega."

S. S. Smith Initiates Word-a-Day Plan

S. Stephenson Smith, associate professor of English, believes that this campus is quite interested in vocabulary building. Last term about twenty University students and a dozen scholars, teachers, and alumni from all over the state asked him for copies of the Winston word-a-day booklet for learning new words. This pamphlet is free and is being used in Professor Smith's English composition class at 9 a. m. Monday, Wednesdays, and Fridays.

The word-a-day system is an automatic device designed to make fun out of adding a new word every day to one's vocabulary. The student tears a word out of the pamphlet each morning, reads its pronunciation and definition, and uses it in his conversation. At night he inserts the word in the wallet in the back of the booklet.

Professor Smith has himself described the word-a-day as "an ingenious method for starting students upon word study, but only a beginning."

PARSONS VISITS BEACH

Dr. P. A. Parsons, professor of sociology and also chairman of the Oregon state planning commission, left yesterday morning to spend the weekend at his beach cottage on Woahink lake for a much needed rest.

Send the Emerald to your friends.

Did you ever notice..in a roomful of people..the difference between one cigarette and another..and wonder why Chesterfields have such a pleasing aroma

Many things have to do with the aroma of a cigarette... the kind of tobaccos they are made of... the way the tobaccos are blended... the quality of the cigarette paper.

IT takes good things to make good things.

Someone said that to get the right aroma in a cigarette, you must have the right quantity of Turkish tobacco—and that's right.

But it is also true that you get a pleasing aroma from the home-grown tobaccos... tobaccos filled with Southern Sunshine, sweet and ripe.

When these tobaccos are all blended and cross-blended the Chesterfield way, balanced one against the other, you get a flavor and fragrance that's different from other cigarettes.
