

Master Printer Nash To Receive Tributes At Opening Today

By ELIZABETH JONES

Tribute to a master printer of the western world will be offered John Henry Nash by the University of Oregon today when, preceding the opening of his library of fine printing in the new University library, he will be the guest of honor at a luncheon at the Osburn hotel at which Donald M. Erb will preside.

Nash, since 1925 when he was given the honorary degree of Doctor of Letters at the University of Oregon, has been a sponsor of the Fine Arts Press on the campus, helping students to put out one fine book each year.

Other institutions of higher learning have recognized in Nash one of the outstanding typographers of modern times. In 1931 he was given the honorary degree of Doctor of Laws at the University of San Francisco, and in 1932, when Mills college gave Nash honorary recognition, Dr. Qurelia Henry Reinhardt, president, said of him: "John Henry Nash. Printer and book maker. Collector of rare volumes. Founder of a press in San Francisco as famous in London as are the presses of Morris and Cobden-Sanderson in our western land. Establisher upon the Pacific coast of that art without which education in a democracy would be impossible, and which preserves the best of human thought in forms of imperishable beauty."

The printer, who has been characterized as the "Aldus of San Francisco," is an ardent sports fan, having once been a champion bicycle racer, and particularly enjoys football. With George Godfrey of

the University news bureau, Nash made a fishing trip to the McKenzie last Sunday . . . and caught twelve trout.

M. H. Douglass, University librarian, said yesterday of the group of books, brochures and broadsides: "It is a rare good fortune that brings the collection to the University of Oregon. It is a very outstanding collection of books on printing. It represents many years of careful collecting and a generous expenditure of money. The group will be much enjoyed by all those who love beautiful books, and will be especially enjoyed by those who know something of the history of printing."

Requests to fill engagements at high school commencement exercises are coming into the speech division. Addresses have been arranged for Professor W. A. Dahlberg at Yoncalla and Hillsboro. Professor Casteel is to speak at Central Point, Ashland, Myrtle Creek, Elmira, Eugene high, and Phoenix, Oregon.

University Players In Air Production

The University Radio Players will present another play in a series of programs dramatizing past scientific discoveries over KOAC tonight at 8:45.

Those in the cast are Freeman Patton, Dolph Janes, Vera Stokes, Bruce Nidever, and Ken Erickson.

Experiments by Alexis Carrel and Charles Lindbergh with the "Glass Heart" will be the subject of tonight's broadcast.

Young Pianist Ill; Recital Postponed

David Smith, young pianist who was to appear in recital at the music auditorium tonight, will be unable to present his concert due to illness, Professor Hopkins, professor of piano at the University, said yesterday.

The 13-year-old Portland boy, who appeared here last year, will present his program later in the term. The date of the recital will be announced later.

House Agents to See 1938 Oregon Today From 1-4

All Oregon house agents are requested to stop in the Oregon office in the educational activities building between one and four today, to look at the 1938 Oregon. It is essential that everyone be there.

Outdoor Men Advised To Observe Poison Oak

If you don't know what poison oak looks like, come over to the infirmary and see our plant, is the invitation of Dr. Fred Miller, director.

The infirmary has a poison oak plant growing under glass to "educate" students coming from places where the plant doesn't grow.

The plan, according to a state health department bulletin, grows in vines, or shrubs about three feet high. The leaves are usually in clusters of three, changing in color from a dark red in spring to a dark green in late summer. The plant usually sprouts greenish-white berries in late summer.

It is not necessary to touch the plant to get the rash, the bulletin stressed, but it may be got from clothing or from smoke from a fire in which the shrub is being burned.

In the matter of prevention for the rash, washing the hands or other parts of the boys exposed, thoroughly with soap and water after possible contact, is recommended, followed by a rinse in alcohol to remove the poison, which is a powdery rosin.

Onthank Advises Seniors Who Want Jobs to Register

Seniors who want to get jobs upon graduation, but who have neglected to register with the employment office, should do so at once, Karl W. Onthank, dean of personnel, said yesterday.

The office frequently has calls for competent workers to fill diverse salaried positions. Among companies which are seeking personnel is Lipman, Wolfe, and company of Portland, which has two representatives on the campus to interview prospects, the dean said.

Other recent prospects include those for boy scout, girl scout, and campfire girl executives.

Luncheon Head Will Give Views on KORE

The coed's slant of Junior weekend will be expressed by Margaret Goldsmith, chairman of the campus luncheon committee, when she is interviewed tonight on the Emerald reporter program at 10:30 over KORE.

Kay Daugherty, women's commentator, will do the interviewing.

The University of Minnesota maintains a newsreel theater to bring to students latest world news caught by movie cameramen.

Twenty-two presidents of the United States were alumni of colleges.
