

## New ROTC Head Likes Oregon, UO

### Favorable Reports Of UO Are Correct, Says Colonel Lyon

Expectant and enthusiastic, Colonel Robert M. Lyon arrived here yesterday to begin his service in the Oregon ROTC department. He will serve as an assistant to Colonel E. V. D. Murphy until August 1, when he will officially take over the duties.

"I have heard so much of Oregon and especially the University of Oregon since my appointment that I was anxious to get here, Colonel Lyon said.

"From what I have so far seen, the state and the University have lived up to my expectations," he stated.

Colonel Lyon is a supporter of all university sports. He indicated he already has a bet on with a friend at Oregon State on next year's football game. He also will be present as an Oregon booster at the competition on Governor's day, May 25.

Like most Hawaiians or people who have lived in Hawaii, the colonel is an ardent swimmer. He does not like to swim in tanks, however, but prefers "a place where I can swim for an hour or two without touching bottom."

"I plan no immediate change in the ROTC courses," he said. "Colonel Murphy has the situation in hand and I will be glad to follow along in the lines he has laid out," he said.

Colonel Lyons is also enthusiastic over journalism and journalistic writing. He has tried to persuade his son, a teacher at Muskegon, Michigan high school to take this as a career, he said. His favorite writers are Dale Carnegie, Boake Carter, and Edwin C. Hill.

## Music Building Driveway Closed

The driveway in front of the music building was permanently closed Friday to avoid the dangerous traffic problem and to reduce dust.

Plenty of parking space is available in the parking ground south of the building for faculty members, students and people having business at the building.

## Unusual Children To Hold Limelight

Exceptional children from all over Oregon and Pacific coast states will hold the limelight at the nationally famous DeBusk Memorial Clinical school, in connection with the summer session of the University of Oregon at Eugene from June 20 to July 29, according to Dr. Elizabeth Montgomery, director of the clinic.

Normally intelligent children having special disabilities in reading, spelling, and arithmetic are invited to attend the school. Students of all ages, from grade school to college are admitted to the clinic.

### Two Purposes

A dual purpose is served by the clinic—benefiting the children and training teachers for this work in their schools. A number of courses will be taught by experts in charge of remedial courses in connection with the clinic. In addition to supervising the clinic, Dr. Montgomery will teach a class, "Diagnostic and Remedial Techniques," which will pay special attention to the evaluation of instruments recently developed for use in this field.

Two outstanding workers in the field of "backward" children from other schools will teach classes. Dr. S. C. Gribble, professor of education at Washington university, St. Louis, will offer "Methods for Exceptional Children," and Miss Lillian Raynor, counselor and special teacher in Central junior high school, Los Angeles, will teach "Remedial Reading."

### Background Offered

In the clinic a diagnosis of the difficulties of each pupil is made on the basis of information gained through all available sources such as scholastic records and information from parents, as well as a number of tests given in the clinic. Individual instruction, based upon the needs of each pupil as revealed in diagnosis is given by experienced teachers working under the close supervision of the clinic staff. Work in speech correction will also be given at the clinic this year.

The clinic does not limit itself to kinesthetics or any other method of correcting difficulties of children, it is pointed out by Dr. Montgomery. Difficulties of each child are diagnosed and the most effective method of correction is then applied.

### Many Inquiries

To date more than 100 inquiries, many of them from other states, have been received concerning the clinic, she said.

The clinic was started in the summer of 1928 by the late Dr. E. W. DeBusk of the University of Oregon and Dr. Grace Fernald of the University of California at Los Angeles. The clinic has grown steadily and is now conducted throughout the regular school year as well as during the summer.

## Library Books Must Be Rechecked After Exam Week

All books checked out of the University library should be returned by the end of exam week, Miss Bernice Rise, circulation librarian, announced yesterday.

If students wish to re-check books at that time, they may do so, Miss Rise said.

## Women Enter Archery Meet

Scores were entered yesterday in the ninth annual nationwide telegraphic meet by sixteen University women archery students who are making up the two eight-man teams entered by Oregon this year.

First team scores:

Eleanor C. Francis	380
Barbara Godfrey	322
Mary Kay Crumbaker	279
Suzanna Cunningham	279
Phyllis A. Bolter	275
Ruth Endicott	272
Mary Elizabeth Hole	248
Marjorie Elizabeth McLean	247
Total	2302

Second team scores:

Dorothy Hall	241
Anna Marie Huffaker	208
Dorothy Schnorenberg	208
Marjorie Louise Hastings	178
Loretta Crocker	174
Faye Clark	168
Harriet Douglass	168
Harriet Minturn	169
Total	1504

The scores shot by the University teams this year were considerably higher than the scores for last year's match which was won by the first team entered by Los Angeles Junior college. A score of 2302 which was shot by the first team of Oregon this year would rank about twenty-fourth place according to scores entered in last year's match. Two or three teams from over one hundred colleges and universities are expected to enter the match.

### JEWELL TO SPEAK

Dean Jewell of the education department will give the commencement address at the Lewiston state normal school at Lewiston, Idaho, June 6.

## Dies in Crash

Mrs. Henry W. Salisbury was on a transport plane which crashed over California mountains.

## Fish--But No Rods Invade Deady Bowl

Darting in and out between the mosses and rocks of their aquarium, the guppies, red moons, helleri, and other diminutive tropical fresh-water fish that J. E. Herbertson, of the zoology department, keeps in his research room in Deady hall, need have no fear even if the fishing season is well under way in the rest of the country.

These fish, which were shipped in containers from islands in the tropics, are kept in water that is warmed to about 70 degrees.

Tropical fish are not hatched from eggs like most other fish, but are born alive, and the newly born fish resemble their parents in every detail, except that they are a trifle smaller in size.

Mr. Herbertson feeds these fish food but he finds that with this diet exclusively the brilliant colors of the fish seem to fade, and it is necessary to give them occasional endocrine gland stimulating food in order to preserve their color.

## Two Field Trips To Be Made Today

Two field trips will be made by geology and geography students this weekend. Members of J. C. Stovall's field geography class will go to the coast Sunday to compare physiographic features of that region with the territory around Eugene.

The quicksilver mines at Black Butte, Oregon, are the destinations of a group of students making the trip today accompanied by Warren D. Smith.

### EXAMINER HERE

A state examiner of operators and chauffeurs will be in Eugene today between the hours of 8 and 5. His offices will be in the Knights of Pythias hall.

## Men Plan Study Trip

A study of geological formations in the Wallowa mountains of northeastern Oregon will be the purpose of a field trip to be made this summer by an expedition sponsored by the state department of geology and mineral industries.

University of Oregon men who will be included in the group are Lloyd Ruff, Fred Hoffstead, Wilbur Greenup, Herbert Harper, and Warren D. Smith. Students from Oregon State college, and men from the state department, including Ray Treasher, a University graduate, will complete the group.

Leaving the first of July, the group will go to Joseph and pack in from there up the north side of the Wallowa range, and will work at an altitude of between 6,000 and 10,000 feet. Besides mapping the geological formations of as much of the region as can be covered, they will also study possibilities of mining in the Wallowas. They will return in early September.

## Three UO Profs Asked to Write For Dictionary

Three members of the University faculty have been asked to write articles for the Dictionary of American History, a cooperative work to be published by Charles Scribner's Sons.

Dean R. C. Clark of the history department is writing articles on "Oregon Land Frauds," "Oregon Experiment," "Oregon Short Line," and "The Pacific Republic Movement."

Dr. Dan E. Clark, assistant director of extension, is writing articles entitled "Great American Desert," "The Homestead Movement," "The Mississippi River," "The Mississippi Valley," and several other shorter ones.

Dr. John T. Ganoe, associate professor of history, is also writing articles for the book.
