Oregon Trips

(Continued From Page Three) derson potted field goals just often enough to keep them four or five points behind.

Hank pushed in one of his peculiar two-handed push shots from the foul line just after the half started, and in less than a minute Bill McDonald potted one for Washington and Dick added another for Oregon in a fast break with Andrews and Townsend feeding. Oregon led 31 to 27.

But the Ducks just couldn't pull away like they did early in the game because Reserve Hal Schlichting, a big six foot four and 205-pound Husky started holing rebounds. He got four before the 13-minute juncture. Meanwhile Townsend had hoisted in a long howitzer, Dick a lefthander from the corner, Anderson a short one, and Dick another bucket on a "Laddie Gale" shot from the keyhole, which maintained Oregon's lead at 42 to 39. That was as close as the Huskies ever got.

With less than three minutes to go, Oregon led 46 to 40, and increased that to eight points on buckets by Anderson and Townsend while Schlichting was posting another rebound field goal.

Libe Gets Magazine

Six volumes of the magazine, The California, were received by the library recently. The volumes are for the years 1880 to 1882. The California preceded the Overland Monthly.

Mutual Interests

..... Geared to Progress

COMMUNITY DEVELOPMENT today must rely largely upon an abundant, unfailing supply of gas for cooking, heating and refrigeration. By the same token, local economic and social welfare are factors which fortify the investment of public utility companies supplying these services. Recognition of the element of interdependence, based upon such mutual interests, is inescapable.

Situated in several communities which comprise the consumer territory of Northwest Cities Gas Company share much in common. Marked similarities in climate and population, as well as in the conduct of business, are encountered throughout the area.

On the other hand, this region possesses great diversity. Industries are many, including coke, machine tools, tile, brick, lumber, wood-working machinery, office furniture, glass, pottery, clay products, shoes, clothing, boats, automobile accessories, printing and publishing, packaged foods, meat packing.

Northwest Cities Gas Company is constructively identified with the volume and variety of these industrial activities, besides enjoying a continuing demand from commercial and residential sources. The gas facilities, provided by its operating companies, meanwhile contribute, in generous measure, to better living and working conditions for their customers. Thus is maintained a progressive, reciprocal alliance which redounds to the benefit of all concerned.

Working for Eugene and the University

The Eugene Water Board has been able to keep Eugene's power rates among the lowest in the United States.

Eugene residential and commercial customers will have rates lessened 15% from the rates which last year were the lowest in cities between 15,000 and 25,000 population. These rates will become effective March 1.

Rural residents will receive proportionate benefits with the usual 10% in addition to urban rates.

The Water Board hopes that in time they may connect with Bonneville on an exchange basis so that in emergencies one may supply the other.

The new rates are effective March 1
