

Fancy Flying Cause of Suit

Lubersky Named As Defendant in Moot Court Case

By DON BUTZIN

The showing off of a student in the University of Oregon civilian pilot training corps is the basis for this week's moot trial to be held Thursday night in the Lane county courthouse.

The defendant, William F. Lubersky, third year law student, is charged by Plaintiff Mary Jane Wormser's attorneys with causing her to be sick and mentally upset because of capers he cut while driving an airplane in which he was taking her for a ride.

Payments amounting to \$500 are asked in settlement for hospital bills and general and exemplary damages.

According to Plaintiff Attorneys George Corey and Eugene R. Neill, Lubersky invited Miss Wormser, a first year law student, to ride with him to Albany in an airplane. She accepted, with the provision that he would not do any fancy flying. He allegedly agreed to this. However, on the way back to the Springfield airport, the defendant allegedly engaged in such a practice. His loops, tail spins, and chandelle not only frightened Miss Wormser, but left her mentally shocked and physically bruised, according to the plaintiff's statement in the complaint filed yesterday with the court clerk, Denton Burdick.

William Huey and Donald Marshall will defend Lubersky. Professor Orlando J. Hollis will judge the case again and the jury will be picked from University students.

Aspiring Cook Spoils Soup; Oswald's Gone

Has anybody here seen Oswald?

The disappearance of Oswald has meant many gray hairs for a few, for Oswald is over 80 years old, and, consequently, unable to take proper care of himself.

Oswald was found hitch-hiking on the coast highway down by Reedsport recently and being of kind and generous heart, Hy Hughson gave him a lift to Eugene. A night's lodging was furnished for him at the Sigma Chi house, but the next afternoon Oswald was nowhere to be found. He had left, bag and baggage.

There is only one clue as to his identity; he was last seen on the second floor of the Sigma Chi house, and, because Oswald has such short legs, it is impossible for him to travel downstairs. You see, friend Oswald is a turtle.

The only way that he could have possibly left the house would be with the aid of some culprit who had designs on him as potential soup. So won't you please keep your eyes open for this little turtle who suddenly shifted into high gear and took a powder?

Wood Directs 'New Deal' in Curriculum

In three weeks it will be finished! What? The curriculum laboratory at the education school. All year Professor Hugh B. Wood has directed the growth of one of the few such laboratories in the United States.

Since the establishment of the school of education at the University, the research bureau and extension division have served the schools of the state through school surveys, publications, and extension classes. The increasing of the curriculum methods of instruction, and related problems has led during the past few years to the establishment of the curriculum laboratory and to increased courses in the curriculum field.

In keeping with the modern trends, a personalized instruction has been planned for each type

of student based on his environment rather than a course of study for the advancement of the entire class. The continued support and development of this instruction will depend largely on the use made of the laboratory's services and materials, according to Wood.

A new file is being developed which will contain under the proper headings the curriculum materials of specific school systems in Oregon and the Northwest. Textbooks and studies on curriculum are kept on the non-circulating shelf for the laboratory worker. These have been selected and recommended by noted educators.

Bibliographies and references on various phases of curriculum, elementary and secondary school text and reference books, and publishers' catalogs are on file.

were accompanied by an obligato by the whistle of an Espee freight train which was passing by.

All in all it was just about as perfect a weekend as one could possibly expect. Being so original and typical of Oregon, Junior Weekends at the University clearly outclass anything put, on by any Pacific coast school, even UCLA.

Magic Bullet

In true Warner Brothers style, "Dr. Ehrlich's Magic Bullet," follows the success of "The Story of Louis Pasteur." Like its predecessor, the story revolves around man's fight in the field of science against disease.

"Magic Bullet" has been widely and sensationally played up as the picture which tells the story of the search for a cure for syphilis. Syphilis is called by its own name, but there is no sensationalism and the film remains decent throughout. The discovery of "606" which Dr. Ehrlich gave to the medical world is only a part of the story. Much of the screenplay is devoted to Ehrlich's experiments with aniline dyes in the diagnosis of tuberculosis, diphtheria, and other communicable diseases.

Good Cast

Edward G. Robinson gives a convincing portrayal of Dr. Ehrlich, in fact many critics think it is his finest role. Ruth Gordon as his wife seems rather high-schoolish in her acting. Otto Kruger, Donald Crisp, Maria Ouspenskaya, Sig Rumann, and Montagu Love are all good in supporting roles.

Of special interest is the use of color slides in Ehrlich's microscopes, showing syphilis bacteria

Two Recitals

(Continued from page one) three students of Rex Underwood and Aurora Potter Underwood will be presented in a recital of piano and violin music. Jane Young and Jeanette Gordon will open the program with "Concerto for Two Violins," by Bach. Solo selections of Miss Young will be Beethoven's "Romance in F" and Vieuxtemps' "Ballade and Polonaise."

Margaret Mills, pianist, will play "Malaguena" by Lecuona, and "Andante and Variations, Opus 26" by Beethoven. Concluding violin numbers will be Miss Gordon's interpretation of Dvorak's "Slavonic Dance in E Minor" and a Vieuxtemps violin concerto. Anyone interested may attend.

Alec Templeton, blind pianist, has learned to play the chimes in the tower of the campanile at the University of California at Berkeley.

Fire Bells Ring, Lady Discovers House in Flames

Did you ever hear the fire engine, follow the screaming beckoning? Of course. But did you ever find that what lay at the end of the chase was your own house? That's what happened to Mrs. Howard R. Taylor, wife of the dean of the graduate division and head of the psychology department Friday.

With Mrs. R. R. Huestis, she was visiting at a friend's house at the opposite end of Villard street. Because it was in the general direction of her house, she and Mrs. Huestis started down that way, broke into a run along with other would-be spectators. When they arrived, firemen and neighbors had already begun to evacuate removable articles.

Estimate of the damage was unavailable, but the major part of the roof was burned. Clothes, too, suffered from the fire. The fire started, the fire department reports, in a wall switch into which a radio had been plugged.

and other diseases that get in the blood. "Dr. Ehrlich's Magic Bullet" is really a "must see" production and worthy of all the praise it has received. This review might give the impression that the picture is all science, full of high-sounding terms and test tubes, but the story is interesting, even to those not particularly interested in science. The picture is now playing at the Heilig with the usual selected short subjects.

University Student Gets Position With Goodrich Rubber

Harold Hansen, senior, will go to Akron, Ohio, in June to work for the B. F. Goodrich Rubber company, it was announced by the University employment bureau. Hansen was selected from a group of 25 applicants for the position by E. A. Seeley, personnel manager for the Goodrich company.

Also announced were appointments of Bill Essary and Walter Elliott to the A. M. Williams department store staff. Essary will be an accountant in the main office of the Williams company stores, The Dalles, Oregon, and Elliott, who was graduated winter term, will enter the Eugene branch as advertising man. Following an apprenticeship period he will be transferred to the main office.

Casteel and Hanna To Speak to High School Graduates

J. L. Casteel, director of the speech department, and H. H. Hanna, instructor in speech, will give commencement speeches in four Oregon high schools this week, Casteel said Friday.

Hanna will deliver commencement addresses in high schools at Wasco and Rufus May 16 and 17, and Casteel will travel to Langlois and Port Orford the same days to deliver high school commencement speeches there.
