Graduates to Enter Essay in Competition

Institute for National Policy directed by the College of William and Mary in Virginia is sponsoring a contest for an essay on the next decade of American foreign policy. Each cooperating institution is asked to select a group of three students and a faculty adviser to draft the essay.

Faculty adviser for Oregon is Dean Victor P. Morris of the school of business administration and Graduate Assistants Fred W. Rasor and Aldus C. Smith of social science, and Lloyd Koehler of business administration.

Three \$450 national prizes and \$300 regional prizes will be awarded by judges, who are men of national reputation in the field. Three will make the national award, and three in each of the nine regions will make the awards for their respective regions.

The subject is open to individual interpretation of the economic, political, geographic, and other factors most likely to influence our foreign policy. It is planned that the more significant essays will be published in book form at the end of the academic year.
