Rev. Frederick A. Schiotz, national executive secretary of the Lutheran Student Association of America, from Chicago, Illinois, will be on the campus this weekend to hold an area training conference of new LSA officers of the University, Oregon State College, and Monmouth.

This year's convention will begin Saturday and continue during most of Sunday, according to Kenneth Erickson, retiring regional president. Plans are being made for panel discussions to be held during the day in the AWS room of Gerlinger hall, he said. The meetings are open to the public.

Evening sessions will feature reading and discussion of new and old programs for each school. The outgoing officers will confer with the newly-elected ones to discuss student problems. Clarence Lindquist, president of the local student group will act as chairman at the meetings.

Rev. Schiotz will come to the Oregon campus from Washington where he has conducted the annual conventions at Pullman and Seattle.

Albany Conference Slated by DeMolay

Albany will be the host city to approximately 400 DeMolay boys when the nineteenth annual conclave opens here for a two-day session, April 11 and 12. Special degree teams from the W. A. Johnston chapter in The Dalles, and Chemeketa chapter in Salem will exemplify the degree work at the Friday evening session. Extensive effort has been put forth in order to provide suitable entertainment during the conclave, the highlights of which include a grand ball, a banquet, and a midnight matinee.

Final Exam for telephones

THIS electrical mouth at Bell Telephone Laboratories is putting a new telephone to one of its final tests. Over and over, it can repeat these odd sentences without the slightest variation. They contain all the fundamental sounds that contribute to the loudness of sound in our speech. This mouth can also make tests with simple tones of known pitch and intensity. At the same time other telephones are being steamed, baked, frozen, lifted and dropped into their cradles by tireless machines. All this is part of a carefully planned curriculum that makes every piece of telephone equipment *prove* it is capable of giving you the best possible service—under any and all conditions.
