How YOU can help her speed vital war calls

WHEN you're about to telephone, remember that the wires—especially Long Distance circuits—are busier than ever before, with war calls. We can't build new equipment to carry the load because the materials we need are going into ships and planes and shells.

Here's how you can help to keep the lines open for war calls. Unless your message is really urgent, please don't use Long Distance service. But if you must, please make your calls as short as you can.

Thanks!—we know you'll be glad to help!
