

## College Records Recorded on Film

Within the near future, valuable University documents housed in the administration building, including academic and personal records of graduates, are to be photographed on micro-film as an insurance against loss or damage, Earl M. Pallett, registrar, revealed this week.

The entire history of a graduating class, including both academic and personal records and photographs, will go on a roll of non-inflammable micro-film which can be put in the hip pocket. It will be possible to store 1600 records in a space four inches square and 1½ inches deep, Mr. Pallett said.

The University decided to safeguard its records from fire or bombing early this year. Because photographic equipment is now out of production, it was impossible to buy a camera to make the microscopic photographs, so J. Warren Teter, manager of the photograph bureau, built one from parts already on hand.

The camera made by Teter is semi-automatic, motor driven, and can be operated by anyone with little or no photographic experience. From 600 to 800 copies an hour can be made. When filming of records is completed the camera can be converted into a projector to magnify the minute pictures and to make prints.

Under the direction of the photographic bureau, filming of the records of the last 10 classes will begin soon.

The micro-film process records pictures on a film approximately the same size as a movie film, the pictures being reproduced singly. This process makes it possible to place a large number

# IF A BUDDY MEET A BUDDY-

By BETTY LU SIEGMAN

With the annual sophomore Whiskerino coming off tomorrow night many sophomores with their two weeks growth are in the same predicament that hundreds of University of Oregon men, now in our armed forces, went through back in their unforgettable yet cherished college days.

Just as these men are probably interested in what is going on at their alma mater and what its students are doing so is the University interested in them, where they are stationed, and what they are doing.

Galen P. Robbins, ex-'39, a graduate of West Point last May, was to be commissioned in the coast artillery corps with a detail in the air corps. Bob Lovell, '42, is training at Harvard business school, Soldiers Field, Boston, Mass. He will receive his commission in September, 1943.

Corporal Samuel Curtis Dashiell, '40, is doing cartographical work with the army at the Command and General Staff school, Ft. Leavenworth, Kansas. Robert Emmet Douglas, Jr., ex-'41, a captain in the air corps, is somewhere in New Guinea.

Lieutenant Eston Elmer Balsiger, '41, is an instructor in advanced flying at Luke field, Phoenix, Arizona.

James Albert Carney, Jr., '42, is a second lieutenant in the quartermaster corps at Camp Lee, Virginia. Lt. Dean A. Cadle, '41, is reported missing since June 1, 1942, flying over Alaska. His last official address known was 11th Hdq. Sqn., Elmendorf Field, Anchorage, Alaska.

Rex Applegate, '40, is a first lieutenant in military intelligence stationed in Washington, D. C. Franklin Staples Allen, '39, a captain in the air corps, is overseas and is a flight leader as well as pilot of the "world's fastest bomber."

Three men who attended the

### Ticket Booth Closed

The Greater Artists series ticket booth maintained by Phi Beta in Miller's store will close Saturday, it was announced. The organization received a percentage of all tickets sold at the booth. Those wishing to help the Phi Betas are asked to remember the deadline.

The money obtained from ticket sales is used for the following purposes: (1) to provide a one-year scholarship for a music student on the campus; (2) to furnish one part-time scholarship; (3) to aid in building up a music library of rare old scores; (4) to establish a shelf of books on drama and the dance at the library.

### Infirmiry Visiting

Since the infirmiry is operating a skeleton staff, Dr. F. N. Miller, director of the health service, asked yesterday that the hours set aside for visiting be observed.

"Wandering visitors interfere with the necessary routine of the nurses," he said. Visiting hours are from 2 to 4 and 7 to 8 p.m.

University, Elvert S. Wilson of The Dalles, Robert E. Petersen of Portland, and Jerrold K. MacDonald also of Portland, were recently appointed naval aviation cadets and were transferred to the naval air station, Pensacola, Fla., for flight training. They began preliminary training at the U.S. naval reserve aviation base in Pasco, Washington, early in July, and upon successful completion of the elimination course late in September were sent to "Annapolis of the Air."

Paul T. Rowe, ex-'40, is reported "somewhere in England." He has been cited for bravery while in action in England. Edwin McFall Wheeler, '42, is a second lieutenant in the army stationed at Savannah, Georgia.

Henry "Hank" Anderson, '42, is a private taking technical training at the air force replacement center, Kearns, Utah. George Arnold Smith, '41, is a lieutenant in the candidates' class at Quantico, Virginia.

Paul Warren Seibert, ex-'41, is a seaman first class in the coast guard at Astoria, Oregon. F. Brock Miller, '41, a midshipman, is attending officers training school in Chicago, Illinois. He will be commissioned an ensign the first part of November.

## CAMPUS CALENDAR

ADS meets 4:30 Monday in room 104 journalism.

Fireside sing Monday night at the Westminster house, 9:40.

### Mrs. Wright's Purse Filched from Church

Mrs. Leavitt O. Wright, wife of Dr. Wright, professor of Romance languages had her purse stolen while at the First Congregational church Tuesday night. Mrs. Wright had gone upstairs, leaving her purse downstairs. Hearing someone enter the church, she went down to investigate, but before she could get downstairs both thief and purse were gone.

Mrs. Wright immediately notified the police, who later located the purse at a nearby filling station. All that was missing was \$15 in cash. The station operator had seen a boy he did not recognize hanging around the station earlier that night, but other than that he could give no clue as to the identity of the culprit.

Students commuting from their homes to Massachusetts State college and back again pile up 2,479 miles each day.
