

Armed Forces Seek Men For Meteorology Courses

All University students interested in training for meteorology, whether they are now qualified for the advanced course in the subject or not, are being urged to contact A. F. Mour-sund, head of mathematics department, or W. V. Norris, acting head of the physics department, in order to make the number of possible Oregon candidates for the course known to the University of Chicago where the joint meteorological board is located.

Students chosen for the course will go to a training center where they will be classed as aviation cadets, non-flying status.

Urgent Need

Because of the urgent need for meteorologists, and in order to more efficiently coordinate the services that universities can give the armed forces, the university meteorology committee has been organized with Professor C. G. Rossby of the University of Chicago as chairman.

This committee has set up a joint meteorological recruiting boards at the University of Chicago in order to centralize and standardize the recruitment of candidates for advanced training, and in order to promote the preparation by all colleges and universities, of the greatest number of men and women for the advanced courses.

Large Number

The advanced class which will start in January urgently needs

a large number of students, and everyone interested should make inquiries and applications at once.

The committee is eager to receive inquiries from all men and women in college who are interested in training in meteorology, whether they are now qualified for the advanced course or not, so that they can be prepared to offer accurate data in the future regarding the number of available trainees.

Qualifications

To qualify for the course the prospective candidate must meet the following requirements:

He must have completed his sophomore year in college, have specialized in the sciences of engineering, and must have satisfactorily completed thorough courses in mathematics, including differential and integral calculus, and at least a thorough one-year course in general physics.

He must be a citizen of the United States, between the ages of 18 and 30 inclusive, of good character, sound physique and excellent health. While the physical requirements are less than those for flying training, the candidate must meet the standards prescribed for appointments in the officers reserve corps of the army. If he is married, he must certify that his dependents have sufficient means of support while he is undergoing aviation cadet training.

Aviation Cadets

Those chosen for the course will enter the military service as aviation cadets in non-flying status. They will receive free tuition and in addition receive the regular pay and allowances of an aviation cadet; \$75 per month plus \$1 per day ration allowance, and \$1.15 per day quarters allowance, or a total of about \$140 per month.

All successful applicants for this training will be enlisted in the air corps enlisted reserve on inactive duty for subsequent assignment to a future cadet meteorology class and will consequently be free from induction under the selective service act.

Commissions

Those who satisfactorily complete the course, covering a period of approximately nine months will be eligible for commissions as second lieutenants in the air corps reserves.

Students meeting the qualifications and interested in this course should furnish the nearest training center with the following papers:

1. Application for aviation cadet. Indicate thereon that meteorology training is desired.
2. Three letters of recommendation.
3. Birth certificate.

Waac-Wave

(Continued from page one) ant Hathaway may be on hand.

General instructions for qualifications to sign up and general rules and regulations after enlistment will be discussed by each of the women. Then the meeting will be thrown open to discussion and questions.

This will be the only time when students will be able to get first-hand information about the WAVES and WAACS and their connection with university women.

FOUR RECRUITS . . .

. . . receive cigarettes collected in the recent fag drive from Marian Schaefer, Florence Hamilton, Mrs. Kelly, Eugene USO head, Dean Karl W. Onthink, and Len Barde, head of the student war council.

Draftees Get Smokes

Campus USO Drive Proceeds Play Part in Send-off Party

By ARLISS BOONE

Last Tuesday, November 10, the first of the cigarettes from the campus USO drive were used for the draftees leaving Eugene at a send-off party given them at noon, according to Rohda Harkson, chairman of the drive.

As the 28 newly-inducted soldiers from Lane county were given a farewell gift of cookies, candy, cigarettes and magazines they seemed just a little surprized, but a good deal happier. Send-off parties will be held about once a week.

Draftees Get Fags

Cigarettes from the drive will be used hereafter only for draft parties. The student war council has decided against sending any to Camp Adair. Soldiers can get them for 6 cents while the draftees, not yet actually in the army, are still on civilian privileges.

About 35 of the 2,022 packages collected on the campus were used, the others will be given out little by little as the boys leave. The magazines given were from the box in Claypool's drug store, collection depot of the campus. Magazines and books are still welcomed by the USO committee.

USOers at the station were Mrs. Kelly, director of the USO in Eugene, Dean Karl W. Onthank, Dean Hazel P. Schwering, Len Barde, chairman of the student war council, Florence Hamilton, Marion Schaefer, and Roh-

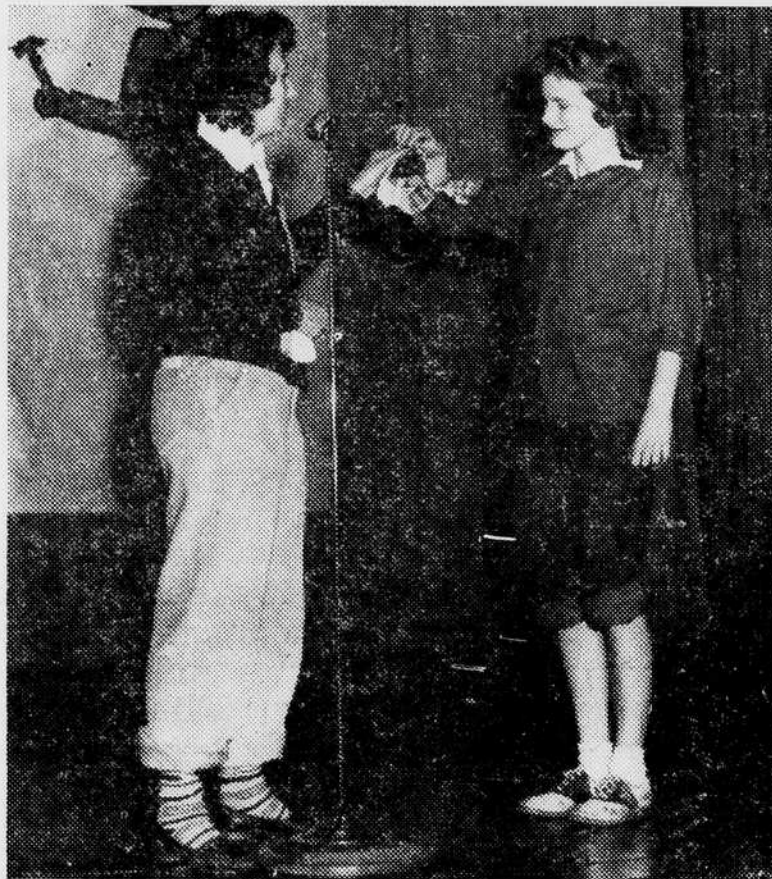

da Harkson, chairman for the USO on the campus.

Norma Trevorror was to be a member of the party, but, by necessity was late. The photographer took her bicycle to arrive on time to get pictures.

At first shy and a little timid, the future army men spoke freely about themselves, their military life to be, and everything but their destination, which is unknown even to them.

As his last gesture before leaving, one of the boys carefully entrusted Miss Harkson with two big folders, trusting in her to mail them after the train had left.

The boys and the seeing-off party were in good spirits when the train finally pulled out. One sailor leaned out of the window, trying frantically to find someone on the platform who knew his only acquaintance in town. When he did, he yelled back, "For gosh sakes, tell her that her brother came through and will be back Sunday."

A COWBELL IS PRESENTED . . .

. . . to Marguerite Keating, right, representative of the Pi Beta Phi-iremen, for the most original costumes at Coed Capers. Marge Dibble, left, AWS president, made the presentation.

Social Problems Series Opened Sunday by Club

The first in the new series of discussions sponsored by the Newman club will be given Sunday at 7 p.m. at the YMCA house, by Father F. P. Leipzig of St. Mary's Catholic church, it was announced by Ferdy Reinike, president of the Newman club.

The subject of discussion in a series treating of vital social problems, is, "Sex, a Frank Discussion of the Problem, and an Explanation of the Natural Catholic Standards."

At the close of the discussion an opportunity will be given the students to ask questions. The meeting will close with entertainment for all and refreshments. Marian Schaefer and Helen Gilson will be in charge of this portion of the program. All Catholic students are urged to attend. Others are welcome.

Pill Palace Loses Three

Behind the greenish-cream colored doors of the University sick bay all is quiet. The "brawny" men of Oregon—and women—are upholding the reputation given them by Captain Collins of the marines for being resistant physical specimens. There were no admittances Friday and three people were released. Those freed were Henry Ford, Bud Fenton, and Dorothy Paddock.

Five, however, are still between the sheets. They are Evelyn Webb, Barbara Bock, John Bubalo, Willson Maynard, and Bob Hays.

The Girls' Rifle club at the University of Nebraska are receiving instructions on the skill of handling rifles. They are charged a fee of \$1 to pay for the blanks.
