

Girls Needed For Red Cross Social Work

More girls are needed to help with the social work that the Red Cross has been doing for the past several weeks in Springfield, according to Jane Alice Pengra, chairman of the committee of University Red Cross workers.

Each girl is asked to spend two hours typing and filing during the afternoon. Miss Pengra stressed the work done by the girls must be kept strictly confidential.

All girls interested in the work should get in touch with Miss Pengra at the YWCA. A station wagon will meet them at 3:30 p.m. on the days they are to work, take them to Springfield and return them to the Y at 5:30 p.m.

During the biggest weekend at the University Red Cross in Chapman hall, January 30 to 31, the highest record turned out over one weekend was broken. Almost 950 surgical dressings were rolled, and nearly 80 girls did the work.

The quota asked by the government is 1,000 per weekend. If the girls who have helped one weekend will come back for another there should be no difficulty in reaching the mark.

The weather tomorrow will be fine, if it doesn't rain. Should it rain, the weather will be only fair.

If you think it snowed down here, you should have spent last week in the high country.

ADPis Lead Red Cross

After the busiest weekend in Red Cross since the beginning of the term, Alpha Delta Pi came in first with highest number of hours of work, according to Mary McCandless, secretary of the University chapter.

Second was Alpha Chi Omega and third Gamma Phi Beta.

Ruth Merritt's Recital Planned

With the singing of songs by classicists of the 18th century and modernists of the 20th century, Ruth Merritt, lyric soprano and senior in music at the University will present her graduation recital February 9 at 8:15 p.m. in the school of music auditorium.

Miss Merritt is a pupil of Sigurd Nilssen, professor of voice at the University. Mr. Nilssen has described her voice as "one of the finer voices on the campus."

Among the numbers which Miss Merritt will present is the aria, "With Verdure Clad," from Haydn's oratorio, "The Creation," and a recitative, "And God Said, Let the Earth Bring Forth" from the same work.

Miss Merritt has also chosen "Orpheus with His Lute" by Arthur Sullivan, "Should Florindo be Faithful" by Scarlatti, "Rose, How Enchanting Art Thou," from the opera, "Zemire and Azon" by Spohr, and "I Am Thy Harp," by R. H. Woodman.

Dr. Secoy Called For War Survey

Dr. Charles H. Secoy, professor of chemistry at the University, announced that he would leave for Columbia university in New York about March 1 on a leave of absence granted him. In the east he will engage in government war research.

At Columbia Dr. Secoy will work under Dr. George Cady, who directed his work at the University of Washington when he was working for his doctor's degree. He has been instructing classes in essentials of physics and a physical science survey in addition to his chemistry classes because of the large enrollments in physics classics.

Granted a leave for the spring term, Dr. Secoy said he may find it necessary to request a longer absence.

Girls Won't Need Extra Sweaters

Although the University has been using less fuel this year, no serious shortage of "hog fuel" (sawdust) is expected, since the worst of the winter cold is over, predicts Mr. D. L. Lewis, superintendent of the physical plant.

In the main, Mr. Lewis said, campus buildings are heated by burning sawdust, although some crude oil is burned. Only one car of oil has been used by the plant, while last year, the plant saw three cars used.

"We used less oil not because of the shortage, but because this winter has not been so hard," he explained.

Fuel rationing is expected, he stated, but what the University allotment will be can not be known until a definite system has been established and the figure set for campus fuel consumption for this year.

Brown sox were predominant at the military ball, a society reporter found.

UO Orchestra To Play Sunday

Two piano concertos in D minor, one by Rubenstein and the other by MacDowell, will be presented by the University symphony orchestra when it plays its second concert of the school year Sunday, February 7, at 3 p.m. in the school of music auditorium.

Leone LaDuke, senior in music, will play first and second movements of the MacDowell concerto.

Everett Fulton, senior in Eugene high school, will play the first movement of the Rubenstein concerto, a rarely performed example of Polish nationalistic music.

A concerto grosso by Arcangelo Corelli for two violins, violoncello, and string orchestra will be played by the string section of the orchestra. Soloists for the work will be Verne Sellin and James Gibson, violins, and Barbara Bagley, cello.

The overture, "Russian Easter," by Rimsky-Korsakoff completes the program. This is an overture on Russian church themes.

The concert is presented by the University school of music in cooperation with the educational activities board. Rex Underwood, professor of music at the University school of music, is director. Verne Sellin, sophomore in music, is concert master.

Five o'Clock Shadow

(Continued from page one) America up to Alaska. As to viewing the eclipse, Mr. Pruett explained, "The very best way to see it is, if they had field glasses, to put photographic film over the lens and look through it." Mr. Pruett pointed out that smoked glass would also be effective. "One should be away from nearby hills, else the sun will set too soon," Mr. Pruett warned.

Old Stuff
Mr. Pruett has taken many photographs of eclipses, and plans to take one of this eclipse, "if it's clear." The best way to photograph eclipses, he says, is to use slow film and set the camera at the smallest stop and shortest exposure possible. The camera should be pointing in the general direction of the sun and not be disturbed during exposure.

One Chance
"My best bet is we won't see it because of clouds," Mr. Pruett stated. "Chances are 99 to 1 it won't be clear."

Solar eclipses can occur only during a new moon. New moons happen about once a month, but since most times the moon passes to one side of the sun, an eclipse takes place but seldom. An eclipse of the sun takes place when the moon comes between the earth and the sun, thus shutting off the rays of the sun from the earth.

Local Art Invited To Shed Inhibitions

Campus cartoonists who have been thirsting a bit for freedom to draw what they please, may now let their cup of brilliancy run over and materialize on a sheet of paper in a splashy manner, according to the order of the "Half-Shut Eye."

Enter the resulting curves and figures, based on student activities, in to the Oregana office by Saturday. They will then be judged for their attractive interest and the ten best will be selected for publication in the Oregana Lemon Punch section.

Battle without headlines!
The men and women of Bell Telephone Laboratories are directing their energy these days to developing new and better communication equipment so vital in today's swift-moving global war.
Peacetime developments, pioneered by Bell Laboratories, are seeing action on every front. Many of their war-time achievements should prove stepping stones to progress in the coming days of victory and peace.
Service to the Nation — in war or peace, that's the one ideal of Bell System people.

WAR CALLS COME FIRST!
