Dr. E. H. Moore, head of the sociology department, was elected a member of the faculty advisory council at the faculty meeting Wednesday. Dr. Moore succeeds Acting President Orlando J. Hollis, who will be ex-officio president of the advisory council.

In a report on the exact enrollment at the University as of January 15, Mr. Hollis stated that there are now 1668 students of whom 366 are men. At that time last year there were 2579 students. Men's

enrollment is down 74 per cent, while 11 per cent more women are enrolled, 1302 as compared to last year's figure of 1174.

Acting President Hollis also announced that a campus calendar bureau will be conducted in Dean Onthank's office as a service to faculty, thereby preventing duplication of important events.

She added that the fundamental aspect of human life with which personality evaluation must be concerned is motivation rather than specific habits or superficial traits. Moreover, Miss Tyler believes that there is a difference between the direction of any personality trend, positive or negative, and its strength. There is a need for further research in two areas, according to Miss Tyler, first, the present technique for the measurement of per-
