

Alpha Hall, Sigma Kappa Win First Spring Softball Matches

The smack of the softball bat and the ping of tennis rackets could be heard yesterday on the diamond next to Gerlinger and the courts behind John Straub as the women's intramural softball and tennis tournaments officially opened.

Winner of the two softball games were Alpha hall and Sigma Kappa, who defeated their opponents, Pi Beta Phi and Alpha Chi Omega, 19-4 and 19-3. The tennis matches were won by Pi Beta Phi and University house as Alpha Chi Omega and Zeta hall yielded to the scores of 3-0 and 3-2.

hall team, who led her team to victory. Despite the efforts of Peggy Finnell, captain, and Anita Young, pitcher, the Pi Phi team was unable to catch their opponents as they set out on their scoring spree early in the game.

Paced by Jackie Bogan, pitcher, Elsie Ball and Bernice Reese, who each made a triple, the Sigma Kappa team virtually swamped their opponents, Alpha Chi Omega, who despite strong support from the sidelines, failed to stop their five-run win.

In a very close tennis contest, University house slipped by the girls from Zeta hall 3-2, despite the failure of their No. 1 girl to stop the fast balls of Jeanne Simmonds. Pi Beta Phi overran their opponents with a score of 3-0. One match ended in a draw and will be played tomorrow.

DISPATCH

An acute coke shortage was reported yesterday at the ROTC drill field. This was caused, observers believe, by the entire ROTC class drilling for two hours in the blazing sun wearing complete winter woolen uniforms, including coats.

Gregor, then ASUO president. A \$10 pledge was taken from the members of the class at that time. By April of 1924 \$219,000 had been raised.

By 1938, only \$33,313 was available because of the construction of several other buildings. At that time, ASUO President Barney Hall appointed a committee to work on the financing of the student union building, and in 1941, the legislature okayed a bill for \$250,000 to be borrowed for use in financing construction.

Oregon's late President Donald Erb was very strongly in favor of the student union, and was able to convince the state board of higher education of its necessity, Conklin explained. Because of his interest and help with the program, the building will be named the Erb Memorial hall.

Plans for the building, already started, include such facilities as a post office, bank, game rooms, bowling alleys, ballrooms, lounges, and offices for the student government and other student organizations. Conklin also reported that Dr. W. V. Norris, technical adviser to the president, has just returned from a conference with a consultant architect in the east who has had a great deal of experience with similar student union buildings. Dr. Norris also conferred with the director of the student union building at Madison, Wis., who seemed very pleased with U. of O. plans.

Summing up what had been done toward the development of the student union building, Conklin listed three things: the building has been put No. 1 on the postwar construction list; the contract has been let to the architect firm of Lawrence and Lawrence of Portland; and Dr. Norris has begun to work on the details.

In fact, many of the workers refused to return to their jobs until the band folded its instruments and indicated its intention to depart from the grandstand.

Tickets may be purchased at the door, from chairman Harry Lee, or from any of the 70 campus houseboys for the sum of \$1.80. As the dance will be formal, checking facilities will also be available for everyone.

Fighting moisture and fungus—communication's jungle enemies

Ever-present dangers to military communications are the twin enemies of the jungle—moisture and fungus. By impairing the efficient working of telephones and radios, they can halt vital messages as effectively as cutting the wires.

The long experience of Bell Laboratories engineers in designing telephone equipment for use under all climatic conditions has helped the Signal Corps in counter-attacking these enemies of the jungle.

Lessons learned in this wartime emergency will aid in building better communications equipment for war and peace.
