Individualism to Make Comeback--Dr. Souers

Personal Responsibility Must Be Developed to Face Contemporary World Struggle

Developing the individual in mind and moral nature is the remedy for the disharmony in the world today, asserted Dr. Philipu Souers in an assembly held yesterday in McArthur court. "The disharmony you see round about you comes from a thoughtless acceptance of a materialistic view of life that

does not belong to the spirit, you should have," he stated.

The University of Oregon is one of the places in the United States that possess a harmony that is a suitable setting for a university, said Dr. Souers.

"You have an Oregonian harmony, and if you will give yourself up to its benign influence, you will I feel sure, find order even in a world out of joint," he continued. "You have a harmony earth that upholds them."

Travelers in Italy and England have experienced this same feeling of harmony, Dr. Souers aserted, although there is a difference even between these two countries. The English possess a preference for "an order that comes out of the people, over an order that is imposed upon the people from above." Individualism

In the current popularity of the poetry of William Wadsworth, especially among the soldiers, Dr. Souers sees a return of interest in individualism. It was Wordsworth who led the return to individualism in England after the Napoleonic wars, according to Dr. Souers. A similar struggle is being faced now in the world, he said.

"But the individual must develop not only his mind but his whole (Please turn to page six)

"I would like to see you go ahead with this," President Newburn said. "I think the living units are the best basis for representation. The congress could be very useful to the University and the administration as a source of determining student opinion."
