

# Ore-nter May Be Mailed To Students Next Year

A proposal to have the Ore-nter, freshman orientation handbook, sent to prospective Oregon students was discussed yesterday at the meeting of the Executive Council of the ASUO. The group decided to back the proposal and to consult with administration officials to see if the plan is feasible.

ASUO President Ed Allen pointed out that the council has budgeted \$200 for the booklet and expects to receive an equal amount in contributions. He added that any surplus funds could be turned over to financing the book and additional contributions could be raised.

The council also designated a committee of seniors to investigate the possibilities of eliminating or changing exams for the senior during spring term. Ed Allen appointed Phyllis Evans, D. Lu Simonsen, and Louise Goodwin to serve with him on the committee, which will seek an arrangement similar to that existing at Oregon State college.

### OSC Exams

Allen explained that at OSC seniors may be given their exams during the last one-hour class sessions of courses and that some schools or departments have eliminated the exams altogether.

After an explanation of the

duties and responsibilities of senior athletic manager, the council recommended that men holding such posts should be put on the work program for the full year. The recommendation will be referred to the athletic board.

## AIRLINE TRAGEDY

(Continued from page one)

active in Westminster house events. Miss Carter took flying lessons during the summers in LaGrande, and, after teaching high school near LaGrande for a year, she started training as a stewardess last September, in Chicago. Miss Carter was stationed with the United Airlines office in Portland and flew two routes, one to Vancouver, B. C., and one to Cheyenne, Wyoming.

Three weeks ago Miss Carter was on the campus with Miss Anne Craven, last year's Emerald editor, visiting friends.

## Vet Administration Adds Two to Staff

Miss Virginia Murphey and Mrs. Patricia Young have been added recently to the staff of the veterinarian's administration guidance center, it was announced today. Miss Murphey is a clerk in the training division and Mrs. Young fills the position of secretary in the advisement division.

Miss Murphey, a Eugene girl, attended the University in 1943, majoring in liberal arts. Since then she has worked for the navy department in San Francisco and at the physical education building at the University. Virginia is a member of Chi Omega sorority.

Mrs. Young and her husband, who is a senior in the school of architecture, arrived here from Terre Haute, Indiana, on January 1, while at Terre Haute, Mrs. Young was director of a YMCA teen canteen. Since she has been here she says that at least she's discovered why Oregonians are called Webfoots.

## Radin To Discuss Japanese in U.S.

The moral and political implications involved in the movement of Japanese-Americans from the West Coast during the national emergency will be defined by Dr. Max Radin, professor of law at the University of California, at 7:30 p.m. Thursday, February 7, in 207 Chapman hall.

Under the title, "Japanese-Americans and the Race Problem," Dr. Radkin will give the second faculty lecture of the winter term. He has been a professor of law at California since 1919. He was admitted to the New York bar in 1902 and to the United States supreme court bar in 1939.

### Award of Cups

Another event of half-time will be the awarding of cups to living organizations having the largest number of fathers registered for Dads' Day events. The houses with the highest proportion in attendance will receive the Norblad and Shaw trophies, and the living organization with largest percentage of freshman dads registered will be awarded the Laurgaard cup. However, dads of women living in Eugene are not eligible, and their daughters are not included in house membership for these awards.

Campus contest winners in 1943 were Pi Beta Phi, Norblad trophy; Phi Gamma Delta, Shaw trophy; and Alpha Gamma Delta, Laurgaard trophy.

## Atomic Bomb Illustrations At Natural History Exhibit

A series of 18 illustrations and an exhibit of various minerals constitutes the atomic bomb display now being shown at the museum of natural history. The display was arranged by Jack DeMent, research chemist in the Portland mineralogy laboratory, who recently presented the exhibit to the University.

The minerals were contributed by the geology department and contain the substances from which uranium is secured, uranium being a vital component of the atomic bomb. A map showing the distribution of these minerals through-

out the world has also been contributed by the University. The accompanying illustrations show the general process in the construction of the bomb.

DeMent, former Reed college student, has recently published a book, "Uranium and Atomic Power." The Condon club has scheduled him to speak on the campus sometime this spring.

H. C. Dake, Portland dentist, is assisting DeMent in the construction of the exhibit. Dake publishes "The Mineralogist," a mineralogy magazine with a world-wide circulation.
