meals consumed, are both reflected in the current rate of fees.

University Invests \$14,000

In discussing the second or temporary, phase of University housing, Dr. Newburn emphasized the fact that the University is not making any money on any of the veterans' projects. A total of \$14,000 was invested in developing the site for the vets' dorm now in operation and the second one will be completed by winter term. The money was used in preparation of the site and the installation of utilities.

The University, which operates the dormitory as an agent of the FPHA, is allocated \$3 per year per occupant by the government to help defray these costs. With this money the indebtedness on the building will be paid off in approximately six to seven years.

Veterans Surveyed

When asked why the first unit of the vets' dorm was overloaded this term, he answered that an informal survey among a group of veterans had been taken this summer and that they had agreed that they would live in overcrowded conditions until the second dorm was completed, in order to allow more men to attend college.

In explaining the allocation of rooms, Dr. Newburn said that as many non-veterans may live in the vets dorm as there are veterans living in John Straub. New students are assigned rooms on the basis of the position of their names on the waiting list. Dr. Newburn expressed the belief, however, that all single veterans wishing to attend the University had been provided for.

Vets to Use Cafeteria

When the common cafeteria between the vets' dorms is completed all men living in the dorms will eat there. The cafeteria, which the University considered necessary in

view of the increased enrollment, cost \$90,000 and this indebtedness must be retired while the dorms are still in use.

Off-campus living units, including the married units behind Skinner's butte, the Amazon and Columbia projects and the house trailers, are not owned by the University, but are operated through the FPHA. The University provided the sites, the utilities, and all streets and walks that were necessary.

Labor, Material Short

The government moved the buildings and assembled them on the sites. If any profits are made on these projects, the money goes to the government. Due to the high maintenance costs, Dr. Newburn doubts that any profits will be realized. If they are, they will probably be reflected in reduced rent rates.

"Many things have not been done because we just can't get them done," Dr. Newburn said. "We have concentrated on the completion of the vets' dorm and on the cafeteria, but we have been constantly faced with a labor problem. Improvements will be made as soon as it is possible."

The Amphibians, women's swimming honorary, pledged girls to their organization. These are: Harriet Vannatta, Joan Smith, Leslie Clerin, Gloria Bates, Janet Ratt-ray, Sylvia Branden, Cora Lee Thompson, Barbara Bozarth, Helen Huestis, Louise Hastrup, Shirley Saut, and Little Berger.

Fall Fashions

(Continued from page three)

handbags is more often truth than fiction, now is the time to remove the excess. It will pay dividends when digging time is scarce and that added touch of lipstick is necessary.

To clean or not to clean that is the question when it comes to our

empty saddles in the old closet. There is a difference between plain dirt and the wiles of wear. Try them white; you might like the change. The tipsy effect given by run down heels is faux pas in shoe etiquette. The essence of good grooming is neatness. Make it your by-word. Stick to it, and you'll never go wrong.

Telling the Editor

(Continued from page two)

This is one of the first student-participated contests in which Greek parties were not highly emphasized. Other issues, both within the Emerald and elsewhere on the campus should be dealt with equally as well. If this were done, I feel independents would be much more tolerant in their criticism of student affairs. The Emerald would also be gaining more prestige, as it has in this case, in that it serves as a representative of the entire student body, independents and Greeks alike.

"How many of 'em can YOU remember?"

"Some of the old-timers must look pretty strange to you. But not to me... I made all of them.

"I started making telephone apparatus of all sorts in 1877... did such a good job that I was asked to join the Bell Telephone team way back in 1882.

"Telephone users get more and better service for their money in this country than anywhere else in the world. I've helped to make this possible by efficient manufacturing of uniform, high quality equipment... by volume purchasing of all manner of supplies for the Bell Telephone Companies... by distributing to them, through my warehouses in 29 principal cities, the telephone equipment I make and the supplies I buy... by skillful installation of central office equipment. That is a huge job... especially now when the demand for telephone service is at an all-time peak.

"Remember my name... it's Western Electric."
