

Twenty Admitted To Medical School

Twenty students on campus have been admitted to the October, 1947, first-year class of the University of Oregon medical school in Portland, according to A. H. Kunz, head of the chemistry department, and chairman of the premedical and pre-dental advisory committee.

The list from Caroline O. Hoopman, registrar at the medical school, includes: Amos M. Gregson, Charles Carlyle Henriques, Harry Lee Harris, Oaks Hoover, Laurence E. Lanfston, Arthur Albert Lee Jr., Donald Lee Mack, Robert E. Mass, Donald Clarence Nelson, Genevieve S. Norton, Kenneth Q. Pershall, Wayne McKay Pidgeon, Paul Edwin Schaff Jr., Virginia May Scholl, Marthe Elizabeth Smith, James M. Stubblebine, David Chalmers Wiley, Dorothea R. Weybright, Lynn Ernest Wolfe, and Elmer Zenger.

More students are to be considered later by the admissions committee, explained Miss Hoopman.

Dr. D. E. Clark Soon To Contribute Articles

Dr. Dan E. Clark, head of the department of history in the University, has been invited to write a long general article on Oregon for the forthcoming Collier's standard encyclopedia.

The reference work will be published by the P. F. Collier and Sons corporation early in 1948 and will carry contributions from at least three other local authorities.

Dr. Clark is also preparing an article on the Lewis and Clark expedition for a volume on famous explorers to be issued in France soon.

WAA Cups, Curtains Must Be Turned in

Houses having booths at the WAA carnival may pick up their earnings now at the educational activities offices. The money must be called for by March 1 or it will go into the WAA fund, the cabinet announced Friday.

The WAA also asks that 13 missing curtains be returned. These were carried off by groups having concessions at the carnival.

Houses in possession of WAA cups must turn them in to either Mary Anne Hansen or Barbara Borrevik, Virginia Scholl, president, requests. A check up is being made on all of these cups.

Shanghai Architect To Speak Here Friday

W. P. Lai, architect from Shanghai will be a visitor on the University campus Friday, and will speak to the upper-division architecture students on hospital planning, according to word received last week by Dean S. W. Little at the art school.

At present visiting in Portland, Lai is in the United States, studying the American hospitals for the Chinese government and working for a private client, Dean Little said.

Speech Slated Friday

Dr. Warren D. Smith, head of the geology and geography department, will give a talk on "Minerals Around the World" at the meeting of the Eugene mineral society Friday night. The meeting will be held at the Community house in back of Skinner's butte in combination with a pot-luck supper.

Chair Newest Addition To Geology's Museum

The geology department has recently accepted an unusual contribution to its museum. The new scientific discovery is a 75-year-old hickory chair, the favorite of Dr. Thomas Condon, pioneer geologist of the Oregon country and first professor of geology at the University.

Dr. Warren D. Smith announced Monday that the addition was made by Dr. Condon's grandson, Senator E. A. McCormack. Dr. Condon, who died in 1907, is perhaps the best known name in Oregon science. He has a building on the Oregon campus, the chapel in the Eugene Congregational church, and a town in eastern Oregon named after him.

U S Health Service Seeks Trainees

Examinations for regular corps appointments for scientific officers in the service are now open to qualified graduate students, the U. S. public health service has announced. Approximately 75 appointments are to be made.

Oral examinations will be held at the University on February 21 at 9 a. m. Written examinations will be held on April 14 and 15 at places convenient to the candidate and the service, and will be given over a two-day period. The tests will cover the candidates' own particular field and related fields of science.

Requirements include United States citizenship, graduation diploma in the field of science, professional training, and a physical examination by the U. S. public health service.

Entrance pay for assistant grade with dependents is \$3811 a year. Senior assistant grade with dependents pays \$4351 a year. Promotions are regular up to and including the grade of scientist director which corresponds to full colonel at \$8551 a year.

Applications and additional information may be obtained by writing to the Surgeon General, U. S. Public Health service, Washington 25, D. C.

Study of Mennonites Told in Second Volume

The second volume of "Hutterian Chronicle," a study of the migrations of the Mennonites through Europe from 1665 to 1947, has just been completed by A. J. F. Zieglschmid, professor of Germanic languages. The book, which is a continuation of a volume already published by Zieglschmid and Dr. G. F. Lussky, will be out around May 1.

The book is being published by the Carl Schurz memorial foundation and financed by the American Council of Learned Societies.

Donald Goodchild, secretary of the society, said in reviewing the book, "I find it one of the most interesting pieces of work that I have had a chance to examine in connection with our grants in aid of publication."

The first volume, which traced the history of the Mennonites from 1525 to 1665, has been used in many colleges throughout the United States and Europe, and has received favorable reviews in many countries of South America.

Mr. Zieglschmid is formerly of Northwestern university.

Theta Sigs Open Fashion Contest

All women's living organizations are asked to choose two girls to appear in the Theta Sigma Phi fashion show, scheduled February 27, Barbara Johns, co-chairman of the contest committee, announced Monday.

Requirements for the positions are not based on beauty or costliness of clothes, Miss Johns stressed, but on the models' general appearance, taking into consideration poise, grooming, good taste, and attractiveness. In this way, Miss Johns asserted, the models, one of whom will be named Oregon's Miss Vogue, will be a representative, not of campus beauty or expensive clothes, but of well-dressed coeds.

The names of the models from each house, with their favorite outfit which they will model, are to be submitted to Miss Johns at the Delta Gamma house or to Carolyn Jacobs at the Chi Omega house, by Thursday.

Eliminations for Miss Vogue will be held February 18 and 19 in Alumni hall, and the winner will be announced at the fashion show. Miss Vogue will receive a full page in the 196-47 Oregonian, it has been promised by Roy Paul Nelson, Oregon editor.

Summer Job Seekers Urged to Apply Now

University juniors and seniors interested in summer employment in preparation for permanent positions with the Bonneville Administration should present applications and credentials at the student placement bureau, according to Karl W. Orthank, dean of personnel administration.

Merrill J. Collett, director of personnel for the Bonneville Administration, will appear on the campus during the winter term and will interview applicants for entrance in the "training experience program" which will prepare the trainees for permanent employment.

Fellowship Now Offered In Industrial Relations

The Clarence J. Hicks memorial fellowship for 1947-48, which will be awarded to a graduate of any United States or Canadian college or university who shows outstanding promise as an executive or teacher in the field of industrial relations, has been announced by Princeton university.

The fellowship will provide \$1000 and will carry free tuition

CAMPUS CALENDAR

Riding club meeting in 204 Chapman, 5 p.m. tonight.

University chess club meeting upstairs in the Side at 7 p.m.

Newman club meeting in the YMCA at 6:45 p.m.

World religions class at Westminster house at 12 noon. Lunch will be served for 35 cents.

Deutsche Gesellschaft reorganization meeting in the Anchorage cafe at 7 p.m.

Professor Defends Edison's Research

Greater recognition of the extensive research organization of Thomas A. Edison, whose birth centennial was observed Saturday, was defended by A. E. Caswell, physics head, who also announced the department's acquisition of new equipment for work on spectrology and nuclear physics.

"Edison, more than any man in his time, turned out more inventions of note," said Dr. Caswell, "but he alone could not do everything."

Spetrograph Arrives

To be removed this week from the crating of the Bausch and Lomb Optical company, according to Dr. Caswell, is a 630-pound, 9-foot-long Littrow spectrograph, which is an apparatus for photographing a spectrum or for forming a representation of the spectrum in any way.

Dr. Caswell revealed specifically that the spectrograph will be used in the study of spectra of various elements and compounds, particularly in the visible spectrum and the near infra red spectrum.

Other new equipment includes a Geiger-Muller counter, to be used in counting particles from disintegrating atoms. The instrument will be put to use shortly in the study of radiation from radio active molybdenum, not for the purpose of discovering anything new, it was explained by Dr. Caswell, but to practice the technique involved in counting the particles associated with the decay of the radio active molybdenum.

The counter, mentioned Dr. Caswell, is a standard piece of equipment used for counting electrons, beta gamma, and cosmic rays, and other impulses from other forms of radiation.

Interested students may obtain full information on the fellowship at the University graduate placement office in room 6 Friendly.
