

Pre-Dental Students Get Advice Good Lib Arts Course Suggested

Dr. Ellis B. Jump, professor of anatomy at the University dental school in Portland, was on the campus Tuesday to advise pre-dental students during registration. Over 40 students received this aid which was formerly given by members of Eugene faculty.

The requirements for dental students are similar to those for medical students with one year of physics, one year of zoology, and a year and a half of chemistry being mandatory. As the dental school is highly specialized, Dr. Jump suggested that the students get a good liberal arts program in addition to filling requirements.

Available Soon

Mimeographed copies of the curriculum will soon be made. They will be available in room 1, McClure hall or by writing to the dental school in Portland. Also the first catalogs to be distributed by the school will be available shortly after the first of the year.

Dr. Jump, the chairman of the faculty committee of admissions, emphasized that all professional schools are now oversubscribed and that students are admitted into the dental school on the basis of their scholastic record, the amount of previous schooling, and personal factors.

Although it is possible to enter dental school after two years of preparatory work, a three-year preparatory course is recommended. Students are accepted from all accredited schools in the state on the same basis.

Clinical Approach

The University of Oregon dental school prepares students for the clinical approach to dentistry with regard for the immediate need in Oregon and the Northwest.

As official adviser of pre-dental students liaison between the dental school in Portland, Dr. Jump will be glad to help any students who wish to write to him. He served in a similar capacity for four years preceding February, 1947 when he was liaison between the University of California and the San Francisco Medical Center where he headed the department of anatomy.

According to Dr. Jump it is probable that arrangements will be made to have representatives of the dental school meet with University students during the school year.

Schedule Changes Announced

Late changes of the time schedule were announced yesterday. Among them were the scheduling of the classic myths class at 4 p.m. Wednesday in 105 journalism building and the addition of a Shakespeare section taught by Dr. E. C. A. Lesch at 9 a.m. Monday, Wednesday, and Friday in 301 Condon hall.

The course in play writing was dropped from the schedule.

The general chemistry laboratory from 8 to 11 Monday and Wednesday was dropped, the 1 to 3 labs changed from 1 to 4, and the 2 to 4 changed from 2 to 5. The organic chemistry laboratory section from 2 to 5 Monday and Wednesday was also dropped.

A new class in versification (Rht 316,8,9) was added. The two-hour course taught by A. Ernst is scheduled for 3 p.m. Tuesday and Thursday in 108 Villard.

Section Dropped

Changes in clothing selection include the dropping of section at 10 Tuesday and 10 Thursday and the re-scheduling of CT 114 for 3 Friday and 8 Saturday.

The 9 Tuesday, Thursday, and Saturday section of general sociology was dropped. Berreman will instruct the fall term sociology seminar and Moore the winter term course. A three-hour course in philosophy of education (Ed 586) has been scheduled for 2 to 4:30 p.m. Thursday in room 3 education building. Stevens will be instructor.

A 3 Monday, Wednesday, and Friday section of backgrounds of publishing has been added. It will be taught in 104 journalism building by Price.

Geologists Complete Research

Dr. Warren D. Smith, retired head and professor emeritus of the University's department of geology and geography, and Dr. Lloyd Staples, associate professor of geology and geography here, have returned to Eugene from south Coos and Curry counties where they have been conducting investigations concerning the Indian lands case preparatory to testifying at a hearing slated for October 20.

Appraisal Made

The month's investigation consisted of an appraisal of the value of territory obtained by the United States in a treaty with the Indians made in 1855. The Indians were later moved to reservations.

A decision in favor of the original owners was recently handed down by the U. S. supreme court, and is now in the hands of the court of claims. The investigation made by Dr. Smith and Dr. Staples was ordered to estimate the value of minerals present in the territory at the time of the treaty.

Aids Project

Historical work for the project

was done by Miss Nadie Strayer, daughter of the late Senator Strayer of Lake county, chairman of the state mining board for many years.

Accompanying Drs. Smith and Staples was Wilfred Wasson of the Coquille Indians, a student at Oregon College of Education in Monmouth. Wasson was elected on the death of his father in July of this year, as chief of all the Coast Indians.

Campus Life Slates Meeting Tonight

An explanation of the AWS "Campus Life" program will be given at a meeting for faculty sponsors, student leaders, and their assistants tonight at 7:30 in alumni hall at Gerlinger hall.

The year's schedule will be outlined at the meeting and it is asked that sponsors, leaders and assistants attend. They will receive the handbook, directory, and the names in their respective group. The wives and husbands of faculty sponsors are requested to attend the meeting.

Songs by the Alpha Phi trio and piano numbers by Gloria Merten will form the entertainment for the evening. Refreshments will be served. Co-chairman for the meet-

ing are Mildred Chetty and Marie Lombard.

The "campus Life" program was planned by Barbara Johns, AWS president, and Golda P. Wickham, dean of women, to help orientate freshman women and transfers to social and scholastic phases of campus life.

Football Band to Meet

All former members of the football band are asked to meet at the band room at 1 p.m. Saturday. They will play for the game Saturday afternoon.

Social Heads to Meet

Old and new social chairmen of all living organizations will meet at 4 p.m. September 24 in Gerlinger hall. House dances and other social activities will be planned and scheduled at that time.

Women teachers in New York schools are absent twice as often as men teachers, a study shows.

Home economics enrollment at Hunter college has more than doubled in three years.

Simmons college freshmen observe May Day by hanging May baskets on the doors of their junior sisters.

City Helps Ease Housing

The University's student housing problems have been eased this fall, but not entirely solved, by the response of Eugene townspeople to a current radio-press campaign in this area urging home owners to rent rooms to students, according to Mrs. Alice B. Macduff, University housing secretary.

Over 260 offers to room or board students have been received by the housing secretary since the radio stations KUGN, KORE and the Eugene Register Guard launched their "rooms for students" campaign early this month. Mrs. Macduff asserted that virtually all the offers came as a result of the publicity afforded the University's housing needs through these radio-press releases.

The housing secretary pointed out that close-to-the-campus housing for both single and married students is still urgently needed, and a few faculty members are still searching for apartments.

Man with a system

Simply pick up your telephone and you can route your voice through any one of thousands of central offices—some with dial mechanisms so complex they stagger the imagination, yet so efficient they seem to work like magic—others staffed by competent, courteous operators whose standards of work have long been a fine tradition.

You command, in effect, millions of miles of telephone wire and cable.

You can direct your call—one of some 110,000,000 that will be made today — to

any one of some 53,000,000 telephones here and abroad.

The operation of this vast system is big business. It is a complex, many-sided business in which thousands of college trained men are working in their chosen fields—development or research, engineering planning, accounting or statistics, public contacts, supervision of operations or other phases of management. These men have found highly interesting and rewarding careers.
