

XO Attendance Takes Prize At AWS Assembly

Chi Omega, appearing en masse, won the attendance prize at the AWS assembly Thursday night. Tied with Alpha Chi Omega who also boasted 100 per cent present, the Chi Omegas emerged victorious by a drawing.

Entertaining at the assembly was a variety of campus talent including a new campus combo which featured Sid Rosen, co-chairman of the assembly, at the piano in "Jamming Blues."

Student Talent Displayed

Helen McPetridge, co-chairman of the assembly, sang two of her own compositions, "The Right Kind of a Boy" and "The Worrying Kind." She was accompanied by Sally Watson.

Adding humor to the program were George Watkins who did an original dialogue and a student quizz show with Marv Horenstein acting as quiz master. Contestants were chosen from the audience.

Madelaine Adler, special student in music, played Chopin's "Fantasie Impromptu" and Wayne Sherwood, senior in music, sang "Begin the Beguine" and "Summertime."

Faculty Entertains

Faculty entertainment was highlighted in a skit about an Oregon State student. Dr. Earl Pallett sang "Old Black Joe" accompanied by Dean Theodore Kratt of the music school.

Bill Bishop was master of ceremonies and pulled "a few rabbits out of the hat" doing some of his tricks of magic.

Winners of the Nickel Hop held Friday night will be announced later at a campus event, Laura Olson and Beth Basler, co-chairman of the dance, said yesterday.

'Deutsche' Club Slates Meeting

"Sprechen Sie Deutsch?" will be the question again Thursday night when the Deutsche Gesellschaft holds its first fall term meeting.

The club was organized last year, mainly by returned veterans as a meeting place for those interested in practicing conversational German and learning more about the past, present and future of the defeated enemy.

Banquet, Picnic Held

A German banquet at the faculty club, and a spring picnic were featured events. Various persons who have been to Germany or were acquainted with its culture spoke on such subjects as architecture and music, and members sang German songs and learned German games.

Offices to Be Filled

At the meeting this Thursday at 7:30 p.m. on Gerlinger sunporch will be primarily to decide on activities for the coming year and to fill office vacancies. Refreshments will be served.

Bob Bailey, club president, urges those in beginning German classes as well as old members and persons interested in German to attend.

Duck Advisor Studies Prices

Mrs. Genevieve Turnipseed, director of dormitories, will be in Portland October 20 and 21 to appear as a witness at consumer price hearings of western subcommittee of the congressional joint committee on the economic report. Mrs. Turnipseed will appear with other witnesses during discussions de-

voted to consumers' groups and labor representatives, she reported yesterday.

Designed to study consumer prices and cost of living, Portland hearing will be the fifth in a series of six public hearings held by the subcommittee.

Girls Set the Stage

(Continued from page one)

class of 21 students under the direction of Williams in the shop on Onyx street. The sections were built, painted, and then brought to the theater in Johnson hall to be set up. The lighting system is the last to go up for dress rehearsals when adjustments are made.

After a play, the set is broken down and stored in the warehouse in Friendly hall basement. Everything from a night club in Babylon to a hill billy cabin can be found in the warehouse. The stage crew prides itself on the fact that it can produce anything that a playwright may demand which can include an ornate boudoir, a Greek temple, or a Japanese bath house.

Spanish Films to Play

Two Spanish language films, "The Adventures of Chico," and "People of Mexico," will be shown Thursday, October 16, in room 3, Fenton hall. There will be one showing, beginning at 8 p.m.

\$15,000 Award

termine the chemical structure of the eye color pigments of the fly as a part of the present project. An organic chemist will handle this part of the work.

Previous work initiated in 1935 and carried out by Professor G. W. Beadle, now chairman of the department of biology at California Institute of Technology, and Professor Boris Ephrussi, now at the Sorbonne, had shown that one of the pigment components of the fly's eye was directly dependent upon the presence of a hormone (kynurenine) which can be easily recovered from the body fluids and certain tissues of the fly. The present work is an integral part of this earlier work, according to Dr. Clancy.

Forming a background for much

of the practical applications of genetics are the studies in the field of developmental genetics. Dr. Clancy states that this is of particular importance to the agriculture of the country since, as he puts it, "the geneticists are the boys who teach the farmers how to raise better cows."

Laboratory in Deady

As the project progresses, Dr. Clancy will be aided by research assistants and graduate assistants. To allow for the expansion necessary to carry on the research, new laboratory is presently under construction on the top floor of Deady hall.

A series of special "stocks" of tiny vinegar flies, which have been synthesized and propagated by Dr. Clancy in his seven years on the Oregon campus, will constitute the nucleus of the research.
