Here, in question and answer form, are some facts on the U. S. Air Force Aviation Cadet program. They cover details you may have been wondering about—and will be useful to you if you want to learn to fly and begin a career in one of today's fastest-moving fields.

- 1. Who is eligible for appointment to the Cadets?**
You, if you're physically fit, single, between 20 and 26½ years old, and have completed at least one-half the requirements for a college degree from an accredited institution — or pass an equivalent examination.
- 2. How long does the training last — and what does it cover?**
You receive approximately 52 weeks' training — worth \$35,000 — in primary, basic and advanced flying, along with other related courses designed to give you the finest background in your specialty.
- 3. What's the story on duty after graduation?**
After successful completion of the course, you will be commissioned a Second Lieutenant, Officers Re-

serve Corps, and assigned to pilot duty with the U. S. Air Force at a starting monthly salary of \$336 (including flight pay). You will serve on active duty for three years unless sooner relieved, and be eligible for \$500 a year bonus for each year of active duty as a Reserve Officer. If you're interested in a Regular Air Force commission, you'll be given a chance to qualify.

- 4. What are the civilian career opportunities?**
That's one you can answer for yourself by taking into consideration these facts: Contrary to what some people think, aviation is not overcrowded — for pilots or anyone else. No field is expanding more rapidly or offering more profitable openings to qualified men. After Aviation Cadet training, you can compete on an equal basis with any flier in the world.

These are only a few of the advantages. Why not stop in today at your nearest U. S. Army and U. S. Air Force Recruiting Station and get all the details?
