

Student Talent Used in Show

Student variety performances for the veterans' memorial hospital in Roseburg will continue to be one of the main features of the 1947-48 program of the Lane county Red Cross campus unit.

Under the directorship of Helen McFetridge, junior in music, Sunday afternoon programs are put on every two weeks. Miss McFetridge arranges the entertainment and selects the talent.

Music is usually emphasized," she said, "but many of our performances include skits and dances as well." After a general program presented in the main auditorium of hospital, the entertainers visit each ward.

Five to ten performers are usually scheduled for each program. The Red Cross supplies transportation. The project will be continued spring term, Miss McFetridge said.

Just Like Fishing

Jacques Filliol (left) and Tommy Hall have invented a new way to hunt coyotes—you just fly over the fleeing prey in a helicopter, drop a rope, and the frightened coyote bites the rope and hangs on till you drop him from say a hundred feet up. Filliol and Hall are shown at Yakima, Wash., ready to collect bounty on a catch.

Condon Lecture Set for April

The Condon lectures have been rescheduled for April 20 and 21, the anthropology department has announced.

The lecture series, previously set for the middle of February, were postponed due to the illness of the speaker, Dr. Franz Weidenreich of the American Museum of Natural History.

Dr. Weidenreich has been carrying on research in this country since 1941 when the outbreak of the war forced him to leave China. Until his departure from the Far East, he was head of the Cenozoic research laboratory in Peking.

Particularly noted for his studies of the fossils of the "sinanthropus pekinensis," Dr. Weidenreich is the author of a number of articles and books on human evolution.

The lectures will be held in room 3 Fenton hall.
