

Enforcement Due On Parking Traffic Rules

Traffic rules on the campus—especially those concerning student parking—will be strictly enforced fall term, I. I. Wright, physical plant superintendent announced yesterday.

"We realize that many students have autos," he said, "but they all simply won't fit on the campus."

The University has graveled Fiji lot for student parking, Wright stressed, and part of the parking lot on the Erb Memorial site has been reserved for students.

Parking areas by Johnson and Villard halls are restricted and are NOT available available for student parking, he continued. Other taboo spots are East 13th between University and Alder streets, and driveways along the heating and physical plants.

"We don't like to give students tickets," Wright emphasized, "and we hope that they will remove any necessity by cooperating with the traffic regulations."

Progress Made In Construction Of UO Buildings

Progress in the construction on four new campus buildings—Villard annex, the women's dormitory, the physical plant warehouse, and the new music building, was described by physical plant superintendent, I. I. Wright yesterday.

First to be completed, the new physical plant located north of the Millrace will be ready for use later this term. The two story building will house the physical plant, warehouse and storeroom.

Villard Ready by Winter

The Villard annex auditorium should be completed by fall 1949. The new theatre will seat 420. The interior of villard hall is being remodeled for the use of the speech, drama and radio department and should be ready for use Winter term. The second floor will include radio classrooms and a studio. The first floor will be used for speech clinics, classrooms and offices. A small practice theater, dressing, sewing and wardrobe rooms will be built in Villard's basement.

Scheduled to be opened next fall, the new five story women's dormitory will provide living accommodations for 333 University women. Each floor will be arranged in living units for 20 women, with a large study room, five double bedrooms, and a kitchenette.

New Music Studios

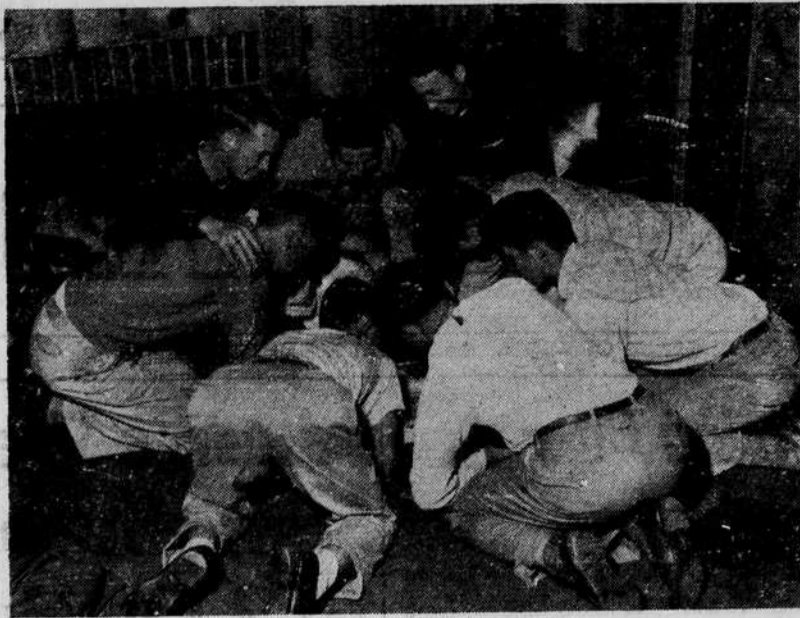

The new music building should be ready by winter term, Wright said. Administration offices, nine studios, a classroom, a research room, and a composition room will be located on the first floor. The second story will house nine more studios, a class room and a choral room. A covered passageway will connect the new building with the present auditorium.

Another step toward the Erb memorial building will be accomplished with the removal of the Johnson and the Sheldon houses from the Union's site. The houses will be moved east of Hayward field and will be used for women's cooperatives.

Chairmen to Meet

Social chairmen are to meet with Dean Golda P. Wickham Monday at 4 p.m. in Alumni hall, Gerlinger, to select the dates of house dances. No alternate representatives may be sent to the meeting.

'Now Here's a Queen'

Gathered around their 1948 Oregana, upperclassmen help pledges find their blind dates for the "Hello" dance tonight. The photographer caught these Oregon men in the familiar pre-dance pose Friday afternoon. Freshmen pictured said they hope to have more recognizable photographs in the 1949 Oregana, which is being ordered by students this week. (Nuttman Photo)

Numerous Activities Slated for Oregana Open House Tuesday

So "the campus can take a peek," the Oregana staff is arranging an open house at their office Tuesday evening.

Planned from 7:30 to 9:30 p.m., it will feature entertainment by the Phi Psi trio, refreshments, demonstrations of layout work on the yearbook, and a "tour" across the office's bulletin board.

Prospective business and editorial workers for the 1949 Oregana will be interviewed at the open house. Staff members stressed that all students and faculty members, not just freshmen, are invited to visit the Oregana's home.

The office is located in the northwest corner of McArthur court on the balcony. On display during the evening will be several pieces of artwork by Ed Cauduro, art editor of the 1949 yearbook. He has asked that students interested in doing artwork for the book be present.

Oreganas from previous years will be exhibited along with year-

books from other colleges and universities, especially those on the Pacific coast.

Orders for the 1949 book, to be distributed next spring, will be taken at the open house for students who didn't place orders during registration.

Interviews Next Week

Also planned for next week by the Oregana staff are interviews of students who wish to work on the editorial or business sides of the publication this year.

Editorial interviews will be conducted in the office from 11 to 12 noon, 1 to 5 p.m. and at the open house Tuesday from 3 to 5 Wednesday; and from 9 a.m. to 5 p.m. Thursday.

Tuesday evening and afternoon from 3 to 5 p.m., business interviews will be conducted. Students interested in doing artwork for the 1949 Oregana should bring samples of their work, according to upper staff members.

Reed College Man Appointed Associate Dean Of Grad School

Dr. Raymond T. Ellickson, from Reed College will be the new graduate school associate dean and professor of physics at the University of Oregon. He will join the staff on September 1, in a position that will place him in 1949 at the head of the university physics department when Dr. A. E. Caswell retires.

The young scientist is a North Dakotan. He received his baccalaureate degree in 1935 from Reed College and his master's from Oregon State College in 1936. He then went east and in 1938 was awarded his doctor of philosophy degree from the University of Chicago. His fields of study, undergraduate as well as graduate, were in physics, mathematics and chemistry.

Following his academic work in 1938 he went to the Polytechnic

Institute of Brooklyn as an instructor in physics. He was advanced to assistant professor in 1942 and in 1946 came west to become an associate professor of physics at Reed. His advancement to department head and professor of physics was recently announced.

In addition to educational work Dr. Ellickson has also carried on extensive research work. During the summer of 1941 he was a research engineer with United Aircraft. In 1943 he did research work for RCA Communication, held a Radiation Laboratory contract, and did work for the U. S. Signal Corps.

From 1944 to 1946 he did work with the Office of Scientific Research and Development, and during the past two years has done work under the Office of Naval Research. In 1946 he was invited to

* Denotes letters won at Oregon.

give a paper before the Symposium on Luminescent Materials at Cornell.

Dr. Ellickson's work in the University will be divided, with part spent in administrative work in the graduate school and the remainder spent in active teaching in the physics department.

Plymouth Supper

An informal supper and get-together meeting will be held Sunday at the Congregational church Plymouth club. The group will meet at 5 p.m., and all Congregational students and their friends are invited to attend.

Welcome
U of O
Students!

To the downtown cafe that has been the meeting place of students for 20 years. You'll find good food and a friendly atmosphere and meet your friends. We cash small checks for your convenience.
