# SX Sweetheart Starts Reign Tonight

Blonde, brown-eyed Joan Nelson is five feet, four inches and 110 pounds of charming personality and sparkle. Eighteen years old and a freshman, she hails from Portland and is pledged to Delta Gamma. She hopes to major in English.

Joan says she was "surprised and pleased" to hear of her selection as this year's Sigma Chi sweetheart. "I am grateful to the boys at Sigma Chi," she said, "and will try to be deserving of the honor which they have bestowed upon me."

Joan enjoys dancing and music, spends her summers at Ocean Lake, on the Oregon coast, and is an expert skier. At Grant high school in Portland, she was the only girl on an all-boy ski team. She competes for the Cascade Ski club of Portland.

She was active in high school activities, being a member of the rally squad and holder of various class offices at Grant high.

Joan and five other finalists for sweetheart honors will be guests of Sigma Chi at a formal dance,

the annual Sweetheart ball, tonight at 9. The sweetheart trophy will be presented at intermission time, and gifts will be given to the runners-up.

Hob Deuel, Sigma Chi president, expressed pleasure with the choice made by the fraternity. He said, "I am speaking for the entire house when I say that I'm sure we have made a fine

choice. Joan Nelson has the looks, grace, and personality of a wonderful sweetheart, and we consider ourselves indeed fortunate in having her as such."

As sweetheart, Joan will attend all house social functions, and as many as possible of the intramural sports events, for the remainder of the school year. Her picture will be entered in this year's Sigma Chi national sweetheart contest.

### This Was Written

(Continued from page six) ternity, too, and besides, he thought he'd have a little fun with George—so everytime he found an "XX" carved on a desk, he immediately carved the initials of his own house in letters just a little bigger.

It got to be quite a battle of pocket-knives and eventually evolved into axes. School officials became quite alarmed when they began finding these symbols carved out of trees on the campus, sometimes in letters a couple of feet high.

Well, the whole affair came to a climax one night, when George was out with his axe on his shoulder, looking for a new tree. He discovered Pete on his hands and knees, with hammer and chisel in hand, carving out Greek symbols on the sidewalk. This was too much for George and in a blind rage, he murdered Pete on the spot.

No one saw the deed and George might have gotten away with it, had he not insisted on one more sadistic touch. On the chest of the corpse, he carved a bloody "XX."

They sent George up for life but when he kicked off after serving seven years of his sentence, it was from sheer frustration. For there just wasn't a blank space left in his padded cell big enough in which he could scratch just one more set of the symbols, "XX."

One disadvantage of living a long time is that it gives one a chance to get sick and tired of a popular song twice—once when it's new and once when it's revived.

"Irresponsible elements, in the language of Great Power diplomacy, are men who might be called patriots if Small Powers were putting out the statements.

Fascism is the greater danger, it is said, because its secret advocates have learned there is no better camouflage than a flag.
