

# Ducks, Beavers Tangle Today

## OREGON *Daily* EMERALD

Fiftieth Year of Publication and Service to the University

UNIVERSITY OF OREGON, EUGENE, SATURDAY, NOVEMBER 20, 1948

VOLUME L

NUMBER 48

### New Prof To Instruct Short Story

Mr. Robeson Bailey, a teacher of creative writing and a writer himself has been appointed associate professor of English, Dr. Philip W. Souers, head of the English department has announced. Bailey will come to Oregon winter term.

Since Mr. Bailey graduated from Harvard, he has, in addition to teaching, written book reviews for *Saturday Review of Literature* and *Field and Stream* magazine, a column for the latter magazine, has held several posts with publishing companies, and has had published numerous stories and articles.

He taught from 1940 to 1948 at Smith college, before that at Harvard and Radcliffe, as well as holding summer posts at Bread Loaf Writers conference and Harvard summer school.

At Oregon Mr. Bailey will teach beginning and advanced short story, and a new course new to the University, novel writing. He is quoted as believing that writing can be taught:

"The student of writing can and must be taught to read, to self-criticize, to learn the acquired skills of writing," Bailey said.

An editor of Houghton Mifflin publishing company said of him, "His approach to writing is at all times professional. Whereas he in no way inhibits the creative ability of the student, he is at all times directing the student's thinking toward the reader."

Mr. Bailey is co-author of "From Fact to Fiction," a book on writing techniques, and "A Chronicle of Cookery." In addition he was written "A Man and His Meals," and "Article Writing."

### IRC Clubs Plan Confab at UO

About 200 delegates to the northwest conference of International Relations clubs in Oregon, Washington, Idaho, Montana, British Columbia and Alberta will gather at the University December 3 and 4.

The conference, sponsored by the Carnegie Endowment of International Peace, will deal with problems of American and Canadian foreign policies and how they affect the United Nations and countries in Europe, the Far East and Latin America.

Dr. C. Easton Rothwell, a graduate of Reed college and now the vice-chairman of the Hoover Institute and Library on War, Peace, and Revolution at Stanford, will be the principal speaker. Dr. Rothwell was the executive secretary of the United Nations conference in San Francisco in 1945, secretary general to the U. S. delegation to the United Nations in 1945-46, and executive secretary of the secretariat of the department of state.

### Bowl, Jewelry, Painting Sale to Start on Sunday

Student creations from sculpture, painting, weaving, jewelry, ceramics and other art classes are ready for the opening of the Art Bazaar at 1 Sunday afternoon in the Little Gallery of the school of architecture and allied arts.

The annual exhibition and sale sponsored by the associated students of architecture and allied arts will be open from 1 to 8 p.m. Monday, Tuesday, Wednesday and Thursday of next week, according to Pat Patrick, association president.

Profits of the sale go towards a proposed scholarship for an outstanding art student.

Work for exhibition and sale has been produced by students of almost every department in the school. The producing artists include both beginners and ad-

vanced students, some of whom have sold works every year for several years.

Shoppers will see the usual favorites in ceramic ware, decorated bowls, tiles, waterproof ware for table use, as well as decorative pottery, hand woven textiles and costume jewelry.

### Cal Tech Undertakes Plant Study

Opportunities for young scientists were offered by Dr. Frits W. Went, Dutch plant physiologist, in a talk Thursday night in Chapman hall.

The head of the California Institute of Technology department of plant physiology spoke of expanded program being undertaken at Pasadena to determine the importance of climate factors to plant growth.

Six greenhouses, air-conditioned, are being constructed at Cal Tech in which it will be possible to maintain any climate. Different degrees of temperature, fog and rain can be artificially reproduced, and even wind velocity can be controlled.

Dr. Went who has been particularly interested in the effect of night temperature on the maturation of the tomato feels that it will be a great asset to both farmers and scientists to determine the effect of these factors on plant growth.

Sugar, niacin, vitamin B1, and sunlight are important to plant growth, he said, explaining how their removal or absence can retard or stimulate plant growth. Dr. Went outlined and explained a series of experimental work in this field which he has been conducting at Cal Tech during the past few years.

The talk was sponsored jointly by the University Lecture Series committee and Sigma Xi, science honorary. The next presentation will be on December 2 when Dr. Quirinus Breen, professor of history, will discuss "the Quarrel Between Rhetoric and Philosophy."

### Fine Arts Prof To Inspect UO Music Facilities

Dr. E. E. Harper, director of the school of fine arts at the University of Iowa, will visit the campus Monday to inspect facilities and work offered in music and graphic and plastic arts. The Iowa school includes all of these major divisions.

While on the campus, Dr. Harper will speak to a small group of faculty members interested in these fields. He will discuss some of the latest developments and mutual problems of education in these areas. Prior to his talk he will inspect some of the work in the school of architecture and allied arts.

Dr. Harper, whose major field is music, will come here from California where he has been holding meetings with graduates of the Iowa school. He will leave Tuesday for Portland where he plans to conduct a church choral group. He is accompanied by Mrs. Harper.

Considered to be one of the outstanding scholars in his field, Dr. Harper was president of Simpson college, at Indianola, Iowa, and Evansville college at Evansville, Indiana, prior to accepting the Iowa university position. He has traveled widely in Europe and is the author of several books on church music.

### More Dire Effects from Nearsightedness

By Larry Lau

This'll slay you . . . it's a yarn about a Model A, a bucket of water, and how war is hell no matter how you look at it.

It all starts Thursday evening, just about the time all you guys and gals were finishing dinner.

There was an old Model A gallantly weaving up and down 11th avenue, jammed with innumerable Beaver rooters, all chanting "Beat

the Ducks" and other dirges of irreligious nature. The millrace section of the campus watched these goings on with dour humor and at last, although stuffed with dinner, mastered their post-meal lethargy long enough to devise a counter-measure.

They would wait behind some parked cars until the visitors came by again, and then douse the interlopers with many buckets of cold

### Rose Bowl Chance Hangs on Outcome

By Stan Turnbull

If we do we might not, but if we don't we won't.

That's the way things will stand with regard to a possible New Year's Day trip to Pasadena when the Oregon Webfoots trot onto Bell field's soggy turf at 2 this afternoon.

An Oregon win over the Oregon State Beavers would leave the Ducks still in the running for the Rose Bowl, but a loss would put them out. If California beats Stanford.

No matter how the games come out, balloting by all nine

JIM AIKEN

members of the Pacific Coast conference will decide the coast's Rose Bowl contestant. Balloting begins by telegraph one hour after today's game, with the deadline Monday noon. It is expected that the vote will be known sometime Monday morning.

The ancient stands at Bell field will hold some 1500 Oregon rooters in a special section, and undoubtedly many more Duck partisans will wedge themselves in, somehow.

Rated as wobbly two touchdown favorites, the Oregon team will be gunning for their second win at Corvallis since Lon Stiner took over at the Beaver helm, some 14 "Civil Wars" ago.

It will be a high-scoring, enthusiastic gang of Staters that Oregon

### Albert Oyama Wins Pre-Med \$1000 Award

Albert Akira Oyama was awarded the Kenneth A. J. Mackenzie Memorial scholarship, given each year to the outstanding Oregon pre-med student in his last year of college work who plans to enter the University Medical school in Portland.

The award, announced yesterday, is \$1000. Of this sum, Oyama will receive \$200 immediately and \$200 for each of his four years of training in Portland, providing he maintains a high scholastic record. This record at Oregon earned him a 3.79 cumulative GPA, according to A. H. Kunz, chemistry department head.

Oyama, a resident of Portland, took his first year of college work at Vanport. Chemistry is his major at Portland.

The Mackenzie scholarship winner is selected by considering pre-med students with averages of 3.00 or better; rating them through their science instructors; and recommending them by the pre-medical and pre-dental advisory committee to President Harry Newburn for approval.

Endowed through a bequest from the late Mildred Anna Williams, the award is a memorial to Dr. Kenneth A. J. Mackenzie, first dean of the medical school.

### In Seats by 12:30

UO students attending today's game at Corvallis must be in their seats by 12:30, according to a release from OSC athletic director Roy S. Keene.

Students arriving after the 12:30 deadline will not be assured of seats even though they have tickets, according to Keene. It is expected that crowded conditions will make it difficult for officials to hold seats in the Oregon rooting section, although attempts will be made to hold at least a few seats until 1 p. m.

will meet today. They haven't won as many games this year as the Webfoots, but the predictions and form in all other games of the season don't mean a thing in this one.

### Wright to Attend World Affairs Meet

Dr. Gordon Wright, associate professor of history, will attend the twenty-fifth session of the Institute of World Affairs, December 5 to 8 at Riverside Mission Inn, Riverside, Calif. He will be chairman of a roundtable discussion of the "Responsibility of the United States."

Government officials and university authorities from twelve Pacific coast institutions will discuss the theme, "The Conflict of Two Worlds" during the four day session.

was George who first gave the alert. "Here they come!" he boomed heroically.

There were some who, as the car approached, were doubtful of its identity . . . but not George. This was it!

"George . . . wait!" someone screamed.

It was too late. George let go with a thunderously damp bar-
