

Atom Control Said Problem of Society

Atomic control is not a problem of physics but of human relations, both Dr. Wengert and Dr. Ellickson told a joint meeting of the International Relations club and United World Federalists Tuesday.

Ellickson, associate dean of the graduate school and professor of physics, pointed out that while a physicist may be an expert in nu-

clear fission, he is not necessarily one in other fields.

Having answered the questions concerning the "hows" of the atom bomb, he continued, the physicist's interest goes on to other subjects.

The vast field of applied atomic energy is a job for the engineer, the sociologist, the political scientist, and the biologist, he said.

"With control and use of atomic energy, physics is not and cannot be interested," he concluded.

Wengert, head of the political science department who has worked with the atomic energy commission, outlined existing plans of control and discussed the problems yet to be overcome.

"We have a fifty-fifty chance of surviving the atom bomb," he said, "but survival involves a price.

"The price is one of attitude . . . we must exchange certain ideas by which we live for new and untried ones. We must cross an untried chasm of human relations and ideas to reach effective international control."

Wengert pointed out two "starting points" toward effective control existing in the present atomic energy law.

First, he said, the act recognizes the "scientific method" by providing for continuing research, experimentation, and change.

Second, he continued, the act has set a precedent and "nationalized" a whole industry. So when the time comes for international control, the government monopoly of atomic energy will prevent conflicting private interests from complicating the problem.

The two discussions followed the movie, "Where Will You Hide," a technicolor cartoon dramatizing the horrors of an atomic war.

Scientists Plan Joint Meeting

Meeting jointly for the first time in years, the geology and geography honoraries of the University and Oregon State college will hold a dinner meeting at the Faculty club March 3 at 6:30.

Oregon's Condon club, composed of about 30 upper-division students and faculty members, will play host to members of Sigma Gamma Epsilon, national geology honorary from Oregon State. Colored slides on central Idaho will be shown by E. M. Baldwin, assistant professor of geology at the University. Preceding the dinner, the guests will visit the geology and geography department and the museum in Condon hall, which was named for Thomas Condon, pioneer Oregon geologist.

Robert Brown, senior in geology and geography and president of Condon club, said yesterday, "We hope that the two departments will be able to exchange research papers and ideas at the meeting, thus bringing better relations between the schools."

Today's Staff

Dick McLaughlin
Day Manager

Layout staff: Margaret Ann Hunt, Shirley Hilliard, Shirley Dalton, Kathy Newman, Jean Lovell.

Night staff: Bob Downs, editor; Joan Skordahl, Wally Benson, Frances Healey, Jo Anne Hewitt, Marilyn Thompson.

"Does your girl smoke?"
"No, not quite."

Brotherhood Week: Rabbi to Speak Here

Brotherhood week, February 21 to 27, will open on the University campus Monday with Rabbi Saul B. Appelbaum, of Congregation Beth Israel, Portland, addressing a University assembly Monday evening, February 21, at 8 p.m. 207 Chapman, on the theme, "Are Men Brothers or Bothers?"

After graduating from Western Reserve university, Cleveland, Mr. Appelbaum studied at the Chicago Divinity school. In 1931 he was graduated from the Hebrew Union college at Cincinnati in completion of his course for the Rabbinate. He has served with Dr. Wise at the Central Synagogue in New York City, and has had pastorates in Miami, Florida and St. Paul, Minnesota. For several years he was program director of "The Message of Israel" which was broadcast by NBC Blue Network. Rabbi Appelbaum has been a member of the Commission on Jewish Education of the Union of American Hebrew Congregations and the Central Conference of American Rabbis.

Vocalist Featured

Dolores Kletzing, freshman voice major, will entertain Oregon Newspaper Publishers association conference delegates with two vocal numbers at their luncheon Friday noon.

Accompanied by Irene Philan, freshman in piano, Dolores will sing "Love's a Merchant" by Carew and "One Kiss" by Sigmund Romberg.

At the present time Rabbi Appelbaum is officiating at Congregation on Beth Israel, on Portland where he is relieving Dr. Henry J. Berkowitz who is on leave of absence.

Recently Rabbi Appelbaum was one of the principal speakers at Religious Emphasis Week on the campus of the University of Washington.

His lecture here next week will be held as a University assembly program in connection with Brotherhood Week and it will be under the auspices of the University Lectures committee and the University Religious council.

Law Session Due Tonight in Fenton

The third session in the oral arguments at the University law school will be held tonight in room 3 Fenton hall at 7:30. The sessions this term constitute the preliminaries in a series of arguments running through next fall term.

The series is designed to give freshmen law students understanding of cases studied in class and experience in appellate work.

February 17—State v. Welsh. Chief Justice, Ralph Johnson; associate justices, Morris Falen and Robert Meyers. Attorneys, for the appellant, Irwin Landeholm and Richard Lewis; for the respondent, Dewey H. Wilson and Donald Dole.
