

Plan for Theater Attendance Devised Campus Organizations Will Profit

As an added incentive to theater attendance, the University Theater announced Tuesday a broad new scheme which it hopes will enlist the support of all University organizations and become an established part of campus social entertainment.

The three-part plan is directed towards organizations which desire to increase their social activities without too much added expense. Under any of the plans, the University Theater will sell all or part of the house to a group for a certain sum.

GROUPS SELL TICKETS

The group in turn will sell its tickets in any way it sees fit while the University Theater will bear all other technical charges, including tax, royalty charges, production costs and extra expenses.

Under the plan, an organization buying the house may make a profit of no less than \$35 and a maximum profit of \$201. In addition, the theater will undertake to provide all the other necessary requirements to make the evening a complete social venture without extra effort on the part of the organization, other than the selling, or disposing of its tickets.

THREE PLANS

Three plans are offered. Under plan A, University Theater will sell all 401 seats to an organization for \$200. These seats, when resold at the established price of \$1.00, would gross \$401, or a net profit of \$201 to the organization.

Under plan B, University Theater will offer a block of 200 seats, half of the house, in conjunction with some other organization which would buy the other half of the house.

The price of the 200 seats would be \$110, a net profit of \$90. Under some conditions, the Theater could also set aside 200 seats within a regularly scheduled series on the same basis.

Operating under plan C, the Theater would set aside a block of 100 seats for some one of the regularly scheduled productions for \$65. The resale of the tickets would net the organization \$35.

An organization undertaking Plan C could arrange to buy the house during the presentation of four productions: "Thunder Rock," February 3, 4, 8, 9, and 10; "The Warrior's Husband" in March; the opera "Martha" in April; and "The Girl I Left Behind Me" in May.

As each of these productions begin the last of one week and continue into the next, the organization would buy the house during the middle of the run.

IMPROVED FACILITIES

Because of limited facilities in the past, the Theater has been unable to bring its productions to as much of the University audience as it wished, but with the completion of the new theater, it

can provide more desirable seating and staging conditions for twice as many patrons.

The theater is prepared to extend credit on any of the three plans and insists only that the purchase price and any unsold tickets be checked in at the theater business office within five days following the specified performance night.

A theater representative will call upon any interested group and explain the plans in detail.

Additional information may be secured through the business office of the University Theater.
