Some of our gloomy forecasters seem to be returning to the old theory that the world is flat.

Who Lives Next Door?

Stop worrying, Joe. You'll find them *real* Americans. You may even get to like them. If you don't, that's all right too. Just leave them alone and they'll leave you alone. But the chances are, once you really get to know them, you'll find them okay.

In the meantime, count your blessings. You're in a fine new house with improvements that you couldn't find anywhere else but in America. And how did America get that way? Because of a lot of people with even funnier sounding names than the ones your neighbors have. Names like **Kosciusko, Pulaski, Haym Salomon.**

Make sure that you are not spreading rumors against a race or a religion. Speak up, wherever you are, against prejudice, and work for better understanding. Remember that's being a good American.

● What's wrong, Joe? You finally got that new house, didn't you? You ought to be real happy. But you look like you ate something that didn't agree with you.

Worried about the people next door? Why? Different religion? Different sounding names?

So what?
