**Exuberant Emeraldite Elucidates  
Extensive Election Explanation**

By JO GILBERT

Don't be confused! We have here a simple elemental explanation of the preferential voting system which will be used again this year.

This type of voting system is designed for elections where there are more candidates than offices, to better represent the opinion of the voters.

Basically, it works like this: candidates are voted for in the order of the voters' preference. There are four ASUO council offices vacant with five candidates running for them this year at the University. Candidates may be voted for, regardless of any affiliation, in any order. There will be no "lost" votes.

In other words, though Joe Schmo may be running on the Western party ticket as a number two candidate he can win the election. And similarly, if Bessie Blatz is running for number three on the Eastern Party ticket and "Lucky" Lager is running for number one on the Western Party ticket, if the votes fall differently than as provided on the party slate, Lager could get one with Bessie two.

When a candidate for the num-

ber one position has reached his quota of votes, the first place votes for the other candidates count in determining the winner of number two position. When the number two position has been discovered, the number one and two votes of the three remaining are counted in determining the number three officer and then the number one, two, and three votes are added with the number four votes in determining the winner of number four position. The final losing candidate is presented with the condolences of his friends. This same system is applicable to the class elections.

You are still confused? Take a gander at the Constitution and be confused-er.

**TNE Present**

(Continued from page one) that such a group exists nationally, that national fraternity leaders are firmly opposed to it as a subversive, rotten group, and I will state again that it does exist on the campus.

"The cause of good student government can be damaged irreparably by such attempts as this present one to make a joke of such a group as TNE. As long as the students act like infants, it's for sure the administration will treat them as such," he said.

**Near-Riot Develops**

ald M. DuShane, who asked police and firemen to return home. DuShane told an Emerald reporter, "My primary concern was to get everything broken up before anyone got hurt, and that's why I asked the policemen and firemen to leave."

DuShane was waterbagged by students in a nearby living organization while on the scene.

Chief of Police Keith L. Jones stated that no further action was planned by his department. He said, "It was just one of those things, and it got out of hand."

No actual violence was reported other than the brief hosing. Students on the scene claimed that permission had been obtained from the police department to use half of Alder street between 14th and 15th for the dance.
