**Co-ed Housing Re-check Set**

All women students living off-campus are asked to re-check their housing in the Director of Women's Affairs Office immediately, according to Mrs. Edith Jacobs, women's counselor. Reason for the re-check is that temporary permits were granted previously until Mrs. Golda P. Wickham, director of women's affairs, could check them. The girls are being asked to come to the office to get their permanent permits.

**Foreign Student Luncheons Begin**

The first of a series of foreign student luncheons sponsored by the campus YMCA will be held at noon Tuesday in the Student Union. Foreign students speaking at the luncheon will be Johannes Hock, from Austria, and Hiroya Katayama, from Japan. Any interested students or faculty members may make reservations at the YMCA office, 318 Student Union.

**Yanks Over 38th As Wonsan Close**

Compiled by John Barton  
(From the Wires of Associated Press)

American troops are pouring into Communist North Korea today after General MacArthur's "final" order to the Korean Reds to surrender. South Korean Republic forces are already deep inside Red territory in heavy strength.

United States forces crossed the 38th parallel late Saturday on the west side of the Korean peninsula. The first troops were members of the First Cavalry division.

**Twelve Infantry Divisions...**

... and overwhelming air and sea forces are at the command of MacArthur to help him back up his surrender demands. More than 40,000 men fighting under the United Nations flag have now crossed the 38th—and more are on the way. The South Korean third division is within 10 miles of the east coast port of Wonsan.

**Surrounded Red Troops...**

... are continuing to surrender in batches south of the parallel. The total of prisoners now exceeds 50,000—and more than 10,000 of these have come in with their hands up in the last two days. Reports from the northern front near Wonsan indicate the Reds are running short of manpower.

**More Billions For Europe...**

... maybe asked by the administration when Congress meets again early next year. Reports to this effect are becoming more numerous in Washington as Britain's economic minister, Hugh Gaitskell, already in the capital, and France's Maurice Petsche, on his way, get ready to meet next week with U. S. Secretary of the Treasury Snyder.

The money reportedly is being asked to set up a defense force against possible Russian aggression in Western Europe. State and defense department officials are rushing preparations for a series of high level meetings with European leaders on setting up and equipping an international army powerful enough to stop the Reds.

**French Reds Are Changing...**

... their tactics for disrupting rearmament of France. The shift of policy is being called radical by some authorities. Up to now, the French Communists have been using any method—including sabotage—to slow shipments of American arms to France, as well as foul France's own arms manufacture.

The new policy has apparently been ordered by the Cominform because many previously pro-Red groups in France were becoming shocked at the methods employed by Communists there. The new plans must please the freshmen, says the Cominform, so that they will toss in their lot with Communism in France.

**Relief For War-Torn Korea...**

... is being planned by the United Nations this week. All organs of the U. N.—the new Korean commission, the economic and social council, the agencies for health, feeding and technical assistance, and the U. N. staff—are working on plans to coordinate help for Korea. This program was authorized by the U. N. assembly in its 47 to 5 vote Saturday.

Right now, the primary cost of rehabilitating Korea is figured to be \$4 million dollars—and that figure is rising fast. What it will cost eventually is anyone's guess.

**Overriding A U. N. Veto...**

... may become possible in the near future if a U. S. sponsored plan for emergency meetings of the general assembly is accepted by the political committee of the U. N.

As things stand now, no action can be made by the U. N. if the security council is deadlocked by a veto. John Foster Dulles will open debate today before the political committee on the Acheson program. This plan calls for emergency sessions of the assembly if the security council is paralyzed.

**Wage Increasing Demands...**

... will be made soon when the powerful CIO United Steelworkers union meets with employers. Philip Murray, president of the union, says he wants a wage boost for his men. They are now averaging \$1.70 an hour. He isn't saying how much—just that raises must be "very healthy and substantial."

The steelworkers' contract says that new talks for wages start Nov. 1, but Murray asked that the date be advanced. Any change of wages in the steel industry is generally the go-ahead signal for changes in the rest of our national economy. Green may want to open new contract talks before the scheduled date because:

**Wage And Price Stabilization...**

... machinery is nearly set up in Washington—or so all signs indicate today. But it may be weeks or months before the final gears for stopping the spiral of wage and price increases start to roll.

Dr. Alan Valentine, 49-year-old educator and business man has been appointed top man in the controls program by President Truman. He will go to work this week to start setting up the remainder of the Economic Stabilization Agency (ESA). The final action on building ceilings over prices and wages probably will be after the November 7 elections—or so say politically-minded Washingtonians.

**Canadian Army Officers And Men...**

... will arrive at Fort Lewis, Wash., today as the advance party of a large number of Canadian troops which will serve as a U. N. force. The force is believed to be the first foreign military group ever to set up on a reservation operated by U. S. military personnel. The exact strength of the Canadian force isn't being disclosed, but it's estimated to be about brigade strength.
