11	Mother's Day	15	Baccalaureate & Commencement
23-24	Drama		

## Speeding drivers involved in 1 out of 3 fatal traffic accidents

**Watch out**—the time you save by speeding may be spent in the cemetery. According to official traffic records, speed is the most frequently reported violation in fatal traffic accidents.

So exercise your foot someplace else than on the accelerator. Remember that a speeding car is harder to handle, takes longer to stop, does

more damage. Make it a point to drive at safe speed . . . always.

When driving conditions are bad, *safe* speed is often much lower than the legal, posted limit. Be sure to slow down when weather or visibility is poor. It may take a little longer—but chances are you'll live a lot longer.

**Lights out** for another speed merchant. Somebody tried to outguess a traffic light and now somebody is dead. Don't let this happen to you. Slow down at intersections. Remember—when you step on the gas instead of the brakes, it may be your last step.

**Too late for the doctor.** This driver couldn't wait. He speeded past another car on a hill, and look what happened! Remember this and be extra careful. Don't pass on hills or curves. Don't weave in and out of traffic. Always drive at a safe speed.

**BE CAREFUL—**  
the life you save  
may be your own!
