

Atomic Energy Exhibit

USE OF RADIOISOTOPES in agriculture is explained by Carolyn Bradford of the American Museum of Atomic Energy. The exhibit is part of the Atomic Energy display which opens in the Student Union today at 1 p.m. The exhibit will be on campus through Thursday.

(Continued from page one) isotopes in agriculture, industry, medicine and biology, among others, will be shown as well as a typical tracer experiment and a model of the atom-smashing Van de Graff generator.

The production of radioisotopes is demonstrated by making some of the silver atoms in a dime radioactive. The radiation is extremely short-lived and is harmless and if a spectator wishes to contribute his dime, the coin will be encased to an hour and a half to complete the circuit.

Oregon is the only Pacific coast

state in which the exhibit will be shown. It is being sponsored by the general extension division of the Oregon state system of higher education, and is brought to Eugene through the cooperation of the University of Oregon. Other cities in Oregon which have shown or will show this exhibit are Medford, Corvallis and Portland. in a plastic and aluminum container as a souvenir of the exhibit.

Many other features are included in this exhibit which is shown in a guided tour requiring one hour

Precedent Found

(Continued from page one)

"2. Meet a standard of good standing with the University of Illinois, i.e.:

- "a. Be a recognized organized independent house.
- "b. Have on file in the office of the dean of men or women an approved copy of their current constitution.
- "c. Home duly elected, responsible officers.
- "d. Have on file with the dean of men or women a current membership list.

"3. Submit a request for such service in writing . . . outlining:

- "a. Reasons for requesting such service.
- "b. The proposed method of handling toll charges placed on the phone.
- "c. The name and age of the house officer to be responsible for contracting for the phone and for paying and receiving all bills.
- "d. Approval of the house owner or operator stating his acceptance of the proposed service."

A form is filled out, and then turned in to a student-administration committee of approval. The committee then recommends or disapproves the house's application for business rate telephone service.

Only 500 luncheon tickets remain. Be sure you have one for Dad.

Fire Razes Den In Sorority House

A cigarette, smoldering in a davenport, started a fire at the Alpha Gamma Delta sorority house early Sunday morning. The fire razed the den; damage was estimated by the Eugene Fire Department at "several hundred dollars."

The cigarette blaze was first noticed during the sorority's house dance. The davenport was moved to the porch and thoroughly drenched, then moved back into the den. At 5:40 a.m. Saturday, the housemother, Mrs. Kent Roe, awoke and discovered the den was on fire.

"Another 10 minutes and the blaze would have spread to the rest of the house," said Assistant Fire Chief Frederick von Appen, who inspected the house. "The girls were lucky that their fire doors were closed; they prevented the blaze from spreading up the

stair well." He emphasized that all living organizations are required to have "one-hour" doors on all floor entrances from the stair wells. These doors are designed to withstand a fire for one hour, thus giving occupants time to escape.

Also, he said that many University living organizations are violating city regulations by using flammable materials in their house dance decorations.

"I checked six houses where house dances were to be held last weekend," he said. "Three of them were using untreated materials as part of their decorations." He pointed out that houses have been put on social probation for violations of this fire ordinance in the past; also, a city ordinance provides for other fines.

Job Opportunities

Information about all job opportunities may be obtained at the graduate placement office in Emerald hall.

The officer procurement office of the U.S. Marine Corps announces its officer candidate course to be held at Quantico, Virginia, on March 17, 1952. Applicants must clear Portland by Feb. 15.

This program is for recent graduates of the University. The Marine Corps headquarters is assigned a quota of 15 men for the class and at the present there are only 6 men accepted. Beyond physical requirements all a candi-

date has to have is a degree and be between the ages of 20-27. Eye and dental requirements have been reduced to 13-29 vision for each eye and 18 serviceable teeth.

Tom Marshall, of General Electric's interviewing staff, will be on the Oregon campus, Feb. 4 to interview members of the March and June graduating classes.

Although from G.E.'s Hanford plant, Marshall will speak with those interested in the Schenectady operations of the company. Physicists, chemists, and business administration graduates are needed at this time, his company has announced.

Any interested students are urged to register at the graduate placement office.

CHESTERFIELD—LARGEST SELLING CIGARETTE IN AMERICA'S COLLEGES

AT MINNESOTA
