

Murray Student to Lead SU Dance Lessons

Dance lessons, sponsored by the Students Union recreation committee, will be given in the Dad's Lounge of the Student Union today at 7 p.m. Bill Owen, a former Arthur Murray student, will be the instructor for the lessons.

A dance contest will be held Feb. 12 and 19 in the Student Union.

Army Will Call ROTC Reserves

ROTC students commissioned into the US army reserve during spring and summer of 1952, who are being deferred by ROTC deferment agreements, will be called to active service between June and September, the army has announced.

This information was released in an armed forces reserve news bulletin which stated that the army was making its plans known early

to give military students the maximum amount of advance notice.

Veterans who served less than two years active duty between Dec. 7, 1941 and Sept. 2, 1945 will also be ordered to active duty upon commissioning, the bulletin stated. It is not currently planned, however, to take veterans receiving commissions with more than two years service during the period stated.

Electronics Into Ditches

PARKERSBURG, W. Va. (U.P.)—Electronics is aiding the city water department—and throwing ditch-diggers out of potential jobs. The department is using a "pipe locator" device to trace lines and valves located as deep as 12 feet underground. It saves costly digging.

Iowa contains 25 per cent of all the grade A soil in the United States.

Dixon to Lead Seminar

The second of three annual joint seminars between the departments of mathematics at the University and Oregon State college will be held here Tuesday. W. J. Dixon, associate professor of mathematics at the University, will discuss "A Problem in Serial Correlation."

Indiana contains 8,000 industries, 200 coal mines, and ranks 10th in U. S. farm income.

When accident taps a worker on the shoulder and calls "Time Out," it may be for a day, a week, a month—or forever!

Every year time runs out for some 16,000 workers, killed in action on their jobs. 80,000 are so severely injured that they may never work again. Two million are injured in greater or lesser degree. The cost to workers and industry—\$4,500,000,000 annually. Over eighteen and a half million dollars every working day.

When you're inclined to be a bit careless, a little too tired to be cautious, remember, every 32 minutes some worker gets "tapped for life," every 16 seconds one is injured, temporarily or permanently. Know your job, be alert while on it. Vehicle accidents are the No. 1 killers and cause most permanent disabilities. Machinery is the principal source for partially disabling injuries, while the handling of objects knocks out more workers temporarily. Falls are occurring continuously, in all kinds of work, and cause anything from a slight injury to death.

So watch yourself at work. Think safely—use your head to save your job—maybe your life!
