**Police Checking On Explosion**

Police are checking on several cars reported driving in a reckless manner around the scene of Tuesday night's campus explosion shortly after the blast which left a hole in the intramural athletic field near the practice track.

Detective E. G. Bunch, who is working on the investigation, reported that the source of the fuse found at the scene of the explosion has not been determined. No sales of fuses or dynamite caps have been reported in this area, so the fuse was probably stolen from some other place, Bunch said.

Forty sticks of blasting caps were stolen from a job near Fall Creek, he said, and this may have some connection with the explosion and with the 25 pounds of black stumping powder stolen from a powder magazine in the Cal Young District and apparently used in setting off the blast.

Bunch said that one lead fizzled out when a high school class admission slip found at the scene of the explosion and traced to the boy who dropped it, a Lowell high school student, was found to have been dropped there when the boy attended a high school track meet on Hayward field.
