Agenda for SU Board Meeting Includes Interviews, Talks, Reports

The agenda for the SU Board meeting at 3:30 p.m. today includes the following:

1. The interviewing of Marian Cass and Elaine Cutting, for chairmanship of the recorded music committee.
2. "Let's Talk Shop," which will be a discussion of the possibility of a career day sponsored by the SU board.
3. A discussion on the regional conference to be held at Oregon State college, Nov. 6 and 7.
4. A report on the Don Cossack chorus concert to be given Nov. 13.
5. The appointment of two committees to investigate the possibility of moving up the selection machinery for the SU board, and investigate the "members at large" question in the perpetuation plan.

Alton to Lead Sing Sunday Evening

A campus community sing, led by Donald Alton, assistant professor of music, will be held Sunday night from 7:30 to 8:15 p.m. in the Student Union ballroom.

This is an informal get-together sponsored by the SU music committee for the singing of old familiar and new songs and students and faculty both are welcome, Committee Chairman Dorothy Anderson announced. Campus clothes are in order and the admission is free.

Nastasia Etchings On Exhibit in SU

A group of paintings, drawings, and etching by James Nastasia, from Oswego, Oregon, will be exhibited in the SU art gallery starting today. This display, which will be up for two weeks, shows landscapes, still-lives, and figures of abstract forms. Nastasia teaches art at Lake Oswego union high school and has taught drawing at Southern California. His works have been on display at the Boston Museum of Fine Arts, the Grand Central gallery in New York, and the Landeau gallery in Los Angeles.

NOSE, THROAT,

and Accessory Organs not Adversely Affected by Smoking Chesterfields

FIRST SUCH REPORT EVER PUBLISHED ABOUT ANY CIGARETTE

A responsible consulting organization has reported the results of a continuing study by a competent medical specialist and his staff on the effects of smoking Chesterfield cigarettes.

A group of people from various walks of life was organized to smoke only Chesterfields. For six months this group of men and women smoked their normal amount of Chesterfields—10 to 40 a day. 45% of the group have smoked Chesterfields continually from one to thirty years for an average of 10 years each.

At the beginning and at the end of the six-months period each smoker was given a thorough

examination, including X-ray pictures, by the medical specialist and his assistants. The examination covered the sinuses as well as the nose, ears and throat.

The medical specialist, after a thorough examination of every member of the group, stated: "It is my opinion that the ears, nose, throat and accessory organs of all participating subjects examined by me were not adversely affected in the six-months period by smoking the cigarettes provided."
