

Senate Meeting Set for Thursday

A senate meeting will be held Thursday evening at 6:30 p.m. in the Student Union, according to Pat Dignan, ASUO president. An agenda is not available.

Cambridge Lecturer to Talk Here on 'Irish Drama'

Thomas R. Henn, senior lecturer in English and senior tutor, both at Cambridge university, will talk on "Irish Drama" Thursday at 8 p.m. in the Dads lounge of the Student Union.

Henn, who will be on campus Wednesday and Thursday, will be in this country for a year as a vis-

iting lecturer at Yale university. While in this country, he will speak at Northwestern, Chicago and Wisconsin universities as well as Oregon.

Wednesday at 3 p.m. Henn will talk to members of the Shakespeare classes in 105 Friendly. Thursday at 10 a.m. he will be in-

troduced to faculty members at an informal coffee hour at the Faculty club. He will also speak to several English classes during his visit.

The speaker is currently chairman of the faculty board of fine arts and director of the studies of English in St. Catharine's college,

Cambridge. He was formerly director of English studies at Trinity, Clare, Magdalene, Jesus, Sidney Sussex, Peterhouse and Selwyn colleges, all at Cambridge.

He is being brought to the University under the sponsorship of the University lectures committee.

A VAST SOURCE OF U.S. OIL STILL UNTOUCHED!

1. Many Americans have probably never heard about oil shale—one of our country's greatest natural resources. Shale is a rock formation that contains kerogen—a solid that breaks down into oil and coke when heated. There are a number of shale formations in the U. S., the richest of which is in the Green River Basin of Colorado and Wyoming. This single 1000-square-mile deposit contains *three times as much* oil as the total proven crude oil reserves of the U.S.!

2. However, the big problem has been how to extract the oil from this shale on an *economical* basis. Union Oil research men have been experimenting with shale oil extraction since 1943. One of their accomplishments was the development of a retort that can extract shale oil far more economically than any previous method.

3. This retort—along with improved mining and refining techniques—has reduced the cost of producing oil from shale more than most people realize. And each year the cost of finding and producing crude oil continues to rise. At some time, then, it is probable that oil can be obtained from shale at a cost competitive with crude oil.

4. When this will come about is anybody's guess. But one thing is certain: the American people can be sure that this natural resource of

theirs will be developed at the earliest possible date with the greatest efficiency *only if private enterprise* is left free to do the job. For our *competitive* private enterprise system has demonstrated time and time again that it can develop better products, for more people, at lower prices than any method yet devised by man.

UNION OIL COMPANY OF CALIFORNIA

INCORPORATED IN CALIFORNIA, OCTOBER 17, 1890

This series, sponsored by the people of Union Oil Company, is dedicated to a discussion of how and why American business functions. We hope you'll feel free to send in any suggestions or criticisms you have to offer. Write: The President, Union Oil Company, Union Oil Building, Los Angeles 17, California.
