

Allies, Reds Presumed Discussing Final Details of Prisoner Exchange

Allied and communist liaison officers are presumed to be holding another meeting at Panmunjom—a meeting expected to be climactic in the current negotiations for an exchange of sick and wounded prisoners.

This meeting was scheduled to get under way at 6 a.m. PST Friday. Only a few details remain to be worked out before the formal exchange agreement is to be signed. If things go off on schedule, then the exchange may possibly begin in about ten days.

The Reds say they have about 600 sick and wounded, no more than 125 of them being Americans, to be handed over at the rate of 100 a day. The Allies will deliver about 5,800 Red sick and wounded at the rate of 500 a day.

Talks May Resume

The talks for exchanging the sick have gone so well that there is belief that the truce talks themselves may be reopened shortly. However, so far, neither side has mentioned such a reopening at the conferences on sick and wounded.

In the United Nations Friday, however, Soviet delegate Andrie Vishinsky did not turn out to be a very good salesman of Kremlin peace doves.

Would Be Happy

Vishinsky spoke long and earnestly and went far back into Soviet history to prove, he said, that the Reds want peace. He spoke calmly—something unusual for Vishinsky—and he didn't call the

west the usual long names he has used in the past, like warmonger and cannibal.

Instead, he urged the west to stop building up its armed forces, dissolve the North Atlantic treaty organization, stop plans for rearming western Germany, abandon the Schuman plan and ban the atomic bomb. Then, he said, Russia would be happy to live peacefully with the west.

Career Day Planned To Ease Job Choice

The first UO Career Day will be held Tuesday in the Student Union. Members of the administration, together with the SU Board, have planned this day in hopes that freshmen and sophomores will find it easier to decide upon a major field, and upperclassmen will be provided with help in choosing a career.

Leading men and women in the respective fields from this state will be on campus to speak to these groups.

Although Career Day will not cover every field of work, most of the areas of interest are to be included in the program.

As a further source of information, an exhibit of books concerning professions and occupations is now on display in the library.

Amphibian Group Elects New Co-ed Officers

New officers for Amphibians, women's swimming honorary, have been elected.

They are Sally Stadleman, president; Nickie Trump, vice president; Sue Morris, secretary; Sue Ralston, treasurer; Pat Fox, historian, and Jean Singleton, WRA representative.

Industrialized World Predicted By Visiting Architect Lecturer

(Continued from page one)

Pictures of Dymaxion transport units—a series of three-wheeled, rear-engined automobiles—produced exclamations of amazement from the audience. The last of the series was exhibited in the Chicago World's Fair.

The white-haired speaker transferred much of his energetic enthusiasm to his listeners in a rapid-

paced presentation of pictures showing the development of his Dymaxion house, a hexagon-shaped structure suspended on cables.

Among the many novel features of the dwelling is a mass-production bathroom which occupies a space only five feet square. The design represents a complete departure from conventional architecture from conventional archi-

fellow citizens," he stated. The process of obtaining appointment to a professor's chair is a long and difficult one, especially in Italy and France where the prospective candidate must first gain inscription on the national aptitude list and then await the vacancy of a chair at some institution.

Newburn declared it was "a rather sad aspect of the system to see a man of 45 or 50 still awaiting appointment to his chair.

Speeding drivers involved in 1 out of 3 fatal traffic accidents

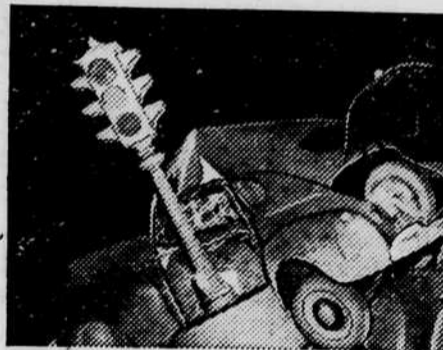

Watch out—the time you save by speeding may be spent in the cemetery. According to official traffic records, speed is the most frequently reported violation in fatal traffic accidents.

So exercise your foot someplace else than on the accelerator. Remember that a speeding car is harder to handle, takes longer to stop, does

more damage. Make it a point to drive at safe speed . . . always.

When driving conditions are bad, safe speed is often much lower than the legal, posted limit. Be sure to slow down when weather or visibility is poor. It may take a little longer—but chances are you'll live a lot longer.

Lights out for another speed merchant. Somebody tried to outguess a traffic light and now somebody is dead. Don't let this happen to you. Slow down at intersections. Remember—when you step on the gas instead of the brakes, it may be your last step.

Too late for the doctor. This driver couldn't wait. He speeded past another car on a hill, and look what happened! Remember this and be extra careful. Don't pass on hills or curves. Don't weave in and out of traffic. Always drive at a safe speed.
