

# Sell-out Crowds See Moon Is Blue

"The Moon is Blue," current production of the University theater, opened Friday evening with Helene Robertson playing the lead role of Patty O'Neil.

All seats for the run have been sold out, according to the theater's business manager, Mrs. Gene Wilty. Any further seats for the production, which runs daily except Sundays through Feb. 18, will have to be obtained by cancellations.

Leads for the F. Hugh Herbert comedy are double-cast. Sharing the role of Patty O'Neil with Miss Robertson is Gloria Lee, and playing Don Gresham are Harry Smith and Don MacDonald.

David Slater, the protagonist, is played by Clarence Suiter, and Tom Angle plays the part of Michael O'Neil.

Playing to Full House

## Forum To Feature Bricker Discussion

"Bricker Amendment: Necessity or Menace?" is the subject of tonight's faculty forum radio program, to be broadcast over KOAC at 8:30 p. m.

Kenneth S. Wood, associate professor of speech, will serve as moderator for the program, which will be conducted as a panel discussion.

Members of the panel are Charles Howard, professor of law, Charles P. Schleicher, professor of political science and Cecil Stickney, Eugene attorney.

## Civic Orchestra Gives First Concert Tonight

Tonight at 8:15 the first performance of the Eugene Civic orchestra will be presented at the Eugene high school auditorium. Admission to the concert, which is open to everyone interested, is free.

University students and townspeople make up the orchestra, which was started last fall. Director for the group is Edmund Cykler, professor of music.

Program for the concert includes "Prelude to the Meistersingers," by Wagner; "Symphony 88 in G Major," by Haydn, and "Caprica Espanol," by Rimsky-Korsakov.

A soprano solo by Exine M. Anderson, assistant professor of voice, will be featured. Miss Anderson will sing arias from "The Cid," an opera by Massenet, and selections from Verdi's "Aida."

## Alums Raise Question

(Continued from Page One)

men study, why two of the fresh dorms were at the bottom of the campus grade list.

At this point, Donald DuShane, director of student affairs, took the floor to answer his questions.

### Grades Rising

DuShane pointed out that for the last three years, both freshmen and fraternity grades have risen. Admitting that the question was a "tough one to answer," DuShane continued by pointing out that this year, for the first time, fraternities held fall term rushing.

However, he did not believe the grade drop to be the fault of the fraternities. Some of the pledge

classes made very good grades, he said.

The low grades are a source of concern both to the Inter-Fraternity council and the office of student affairs, he said. He added that 47 percent of the Greek pledges did not make a 2. GPA, but 40 percent of the unaffiliated men did not make their grades either, he said.

### Cooperation Paying Off

DuShane also said that this year, for the first time, one aspect of the program is beginning to pay-off. This is a combination of help from both fraternities and sororities and from the counselors. "Students are more loyal to the University and their classes now, and no less loyal to their houses," DuShane said.

He also offered an explanation for the two dorms below a 2. GPA. Freshmen grades are always low, but the class GPA is becoming higher each year they are in school. DuShane said. He also pointed out that there are no upper classmen in the dorms to help raise the hall GPA.

Some of the men present expressed the belief that the low grades might have been because the men did not apply themselves to their study. The counselors agreed with this, pointing out that in high school, many of the students did not have to work for their grades.

## Med School Forms Available Now

Students planning to enroll in medical technology at the University of Oregon medical school in September may obtain application blanks and brochures in Science 121 beginning today.

Medical technology, a field of medical study, performs specialized tests in clinical laboratories to assist physicians in the diagnosis and treatment of disease.

At the present time, approximately 20 students are enrolled annually in the course, which covers 12 continuous months of training. Preference is given to students who have completed three years of college.

## Yearbook Groups Asked to 'Pay Up'

All organizations who have ordered space in the 1954 Oregon and who have not yet made payment for them are urged to do so immediately to insure their inclusion in the yearbook, according to Jim Light, business manager.
