

Mid-term Reports Available to Frosh

Freshmen men who live off campus and who submitted mid-term progress cards may pick up the cards this week at the office of student affairs, according to Bradford Blaine, counselor for men.

Freshmen filled out the cards earlier this term for distribution to their instructors. The instruc-

tors note the progress of the student on the cards and return them to the student affairs office.

Cards for freshman men living on campus have been given to the dormitory counselors.

"Fraternities are welcome to contact the counselors and examine the cards of their pledges," Blaine reported.

Freshmen Elect Booth With Margin

Brian Booth was elected president of the freshman class Wednesday with 153 number one votes, 15 over the quota necessary for election. He was not elected on the tenth ballot transfer as reported in the Emerald.

Oregana Pictures Sold This Week

Glossy prints which appeared in last year's Oregana are on sale today, according to Sharon Snyder, chairman of Oregana picture sales.

Photos will be sold from 9 to 12 a.m. and 2 to 5 p.m. today in the cloak room on the main floor of the Student Union.

The pictures will be priced from 10 to 50 cents a piece.

A few photos from the 1953 yearbook will be sold, as well as those from last year's Oregana.

Pictures will be listed under activities, with photos of students in living organizations being listed under the names of the houses.

Grandfather never had it this good

Most people today work only two-thirds as many hours as their grandfather did. Yet they earn at least three times as much each day.

If, for example, your grandfather had been on Union Oil's payroll in 1890, he'd have put in an average week of at least 60 hours. For which he'd have received about \$2.25 a day.

If—for comparison—you had been with us last year, you'd have averaged \$2.25 also. But for an hour's work, not a day's! And you'd have worked only 40 hours a week.

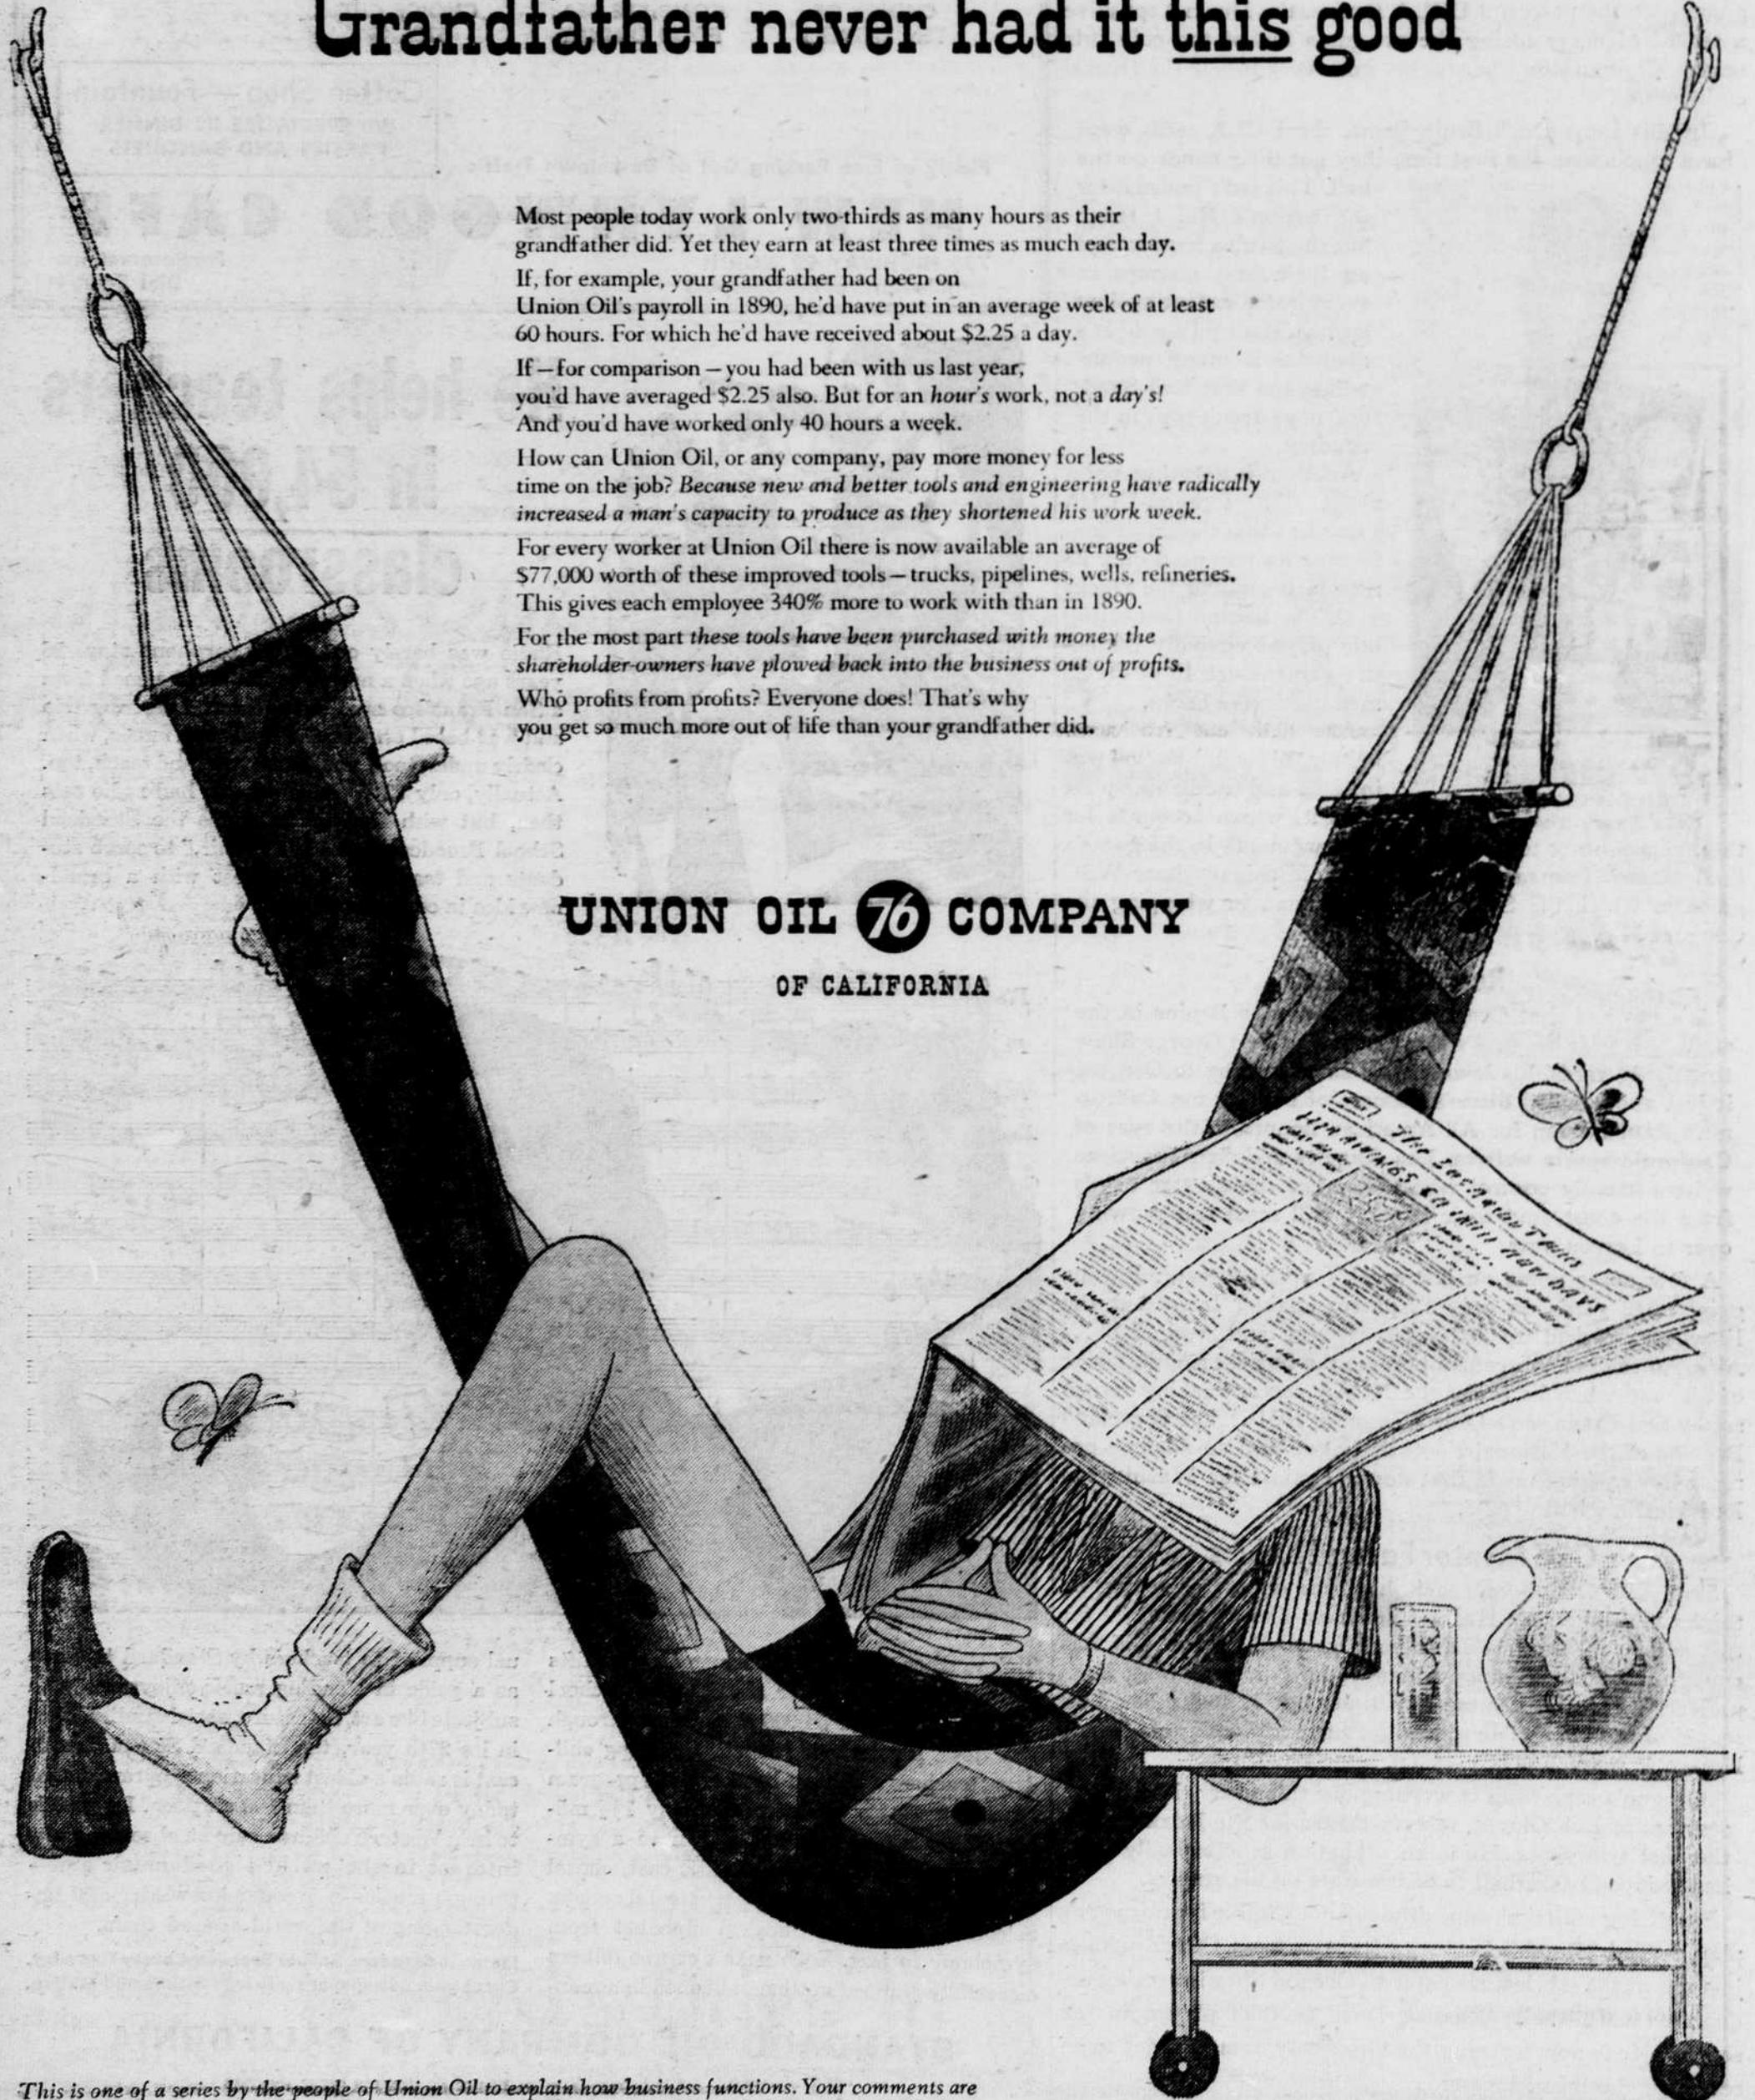

How can Union Oil, or any company, pay more money for less time on the job? *Because new and better tools and engineering have radically increased a man's capacity to produce as they shortened his work week.*

For every worker at Union Oil there is now available an average of \$77,000 worth of these improved tools—trucks, pipelines, wells, refineries. This gives each employee 340% more to work with than in 1890.

For the most part *these tools have been purchased with money the shareholder-owners have plowed back into the business out of profits.*

Who profits from profits? Everyone does! That's why you get so much more out of life than your grandfather did.
