

Understanding Necessary Between Trial and Press

By Joan Kraus
Emerald Reporter

"It is an absolute necessity to have an understanding between the trial and the press," said Judge William G. East Wednesday night in a browsing room lecture in the Student Union.

The topic for the lecture was "Free Trial versus the Free Press." East said that "the bench vs. the bar might meet in a death struggle. The mediums of mass communication demand an audience at all sessions and trials, and when asked to state their right for their demands adopt a 'holier than thou' attitude."

He said that "he knew of no reason why the press and the courts can't have a good rela-

tionship if they work in harmony so that each one's rights are not encroached upon by another."

East stated that the bad influences of mass communication on trials is that (1) the press can give the defendant a pre-trial and (2) the press can have an influencing result on the trial.

East was recently recommended by the United States Justice department for a judgeship in the Portland federal district court.

Long an outspoken advocate of the lawyer's viewpoint on the battle between the "robe and the reporter," East has spoken on the subject several times.

Porter Confident Of '54 Demo Win

Charles O. Porter, 1952 Democratic candidate for the House of Representatives, told the campus Young Democrats Wednesday night that "we'll win in 1956 because we're right on the issues."

Porter charged that the Republican policy was weak because it has no articulate leaders who will come forward and debate the issues. He said that the Democratic party must follow a positive campaign to win the next election, and expressed confidence that it would do so.

He warned that the Democrats will have to "take off their gloves" with President Eisenhower.

Porter charged that Eisenhower has failed to heal the split in the

Republican party and has shown poor leadership. He used the President's "admitted lack of knowledge" on the release of the Yalta papers as an example.

Reid to Brief Freshmen On Weekend Customs

Bob Reid, president of the Order of the O, will discuss Junior Weekend traditions today in a meeting with all freshman presidents, to be held today at 4 p.m. in the Student Union.

The meeting will be posted on the Student Union bulletin board. Pairings will be drawn for the all-campus clean-up.

FRIDAY AND SATURDAY SPECIAL!

BANANA CAKE

Made with the Whole Fresh Pulp of Ripe Bananas. It's light and so tender!

A prominent banker tells you
Why it's wise to hold U.S. Savings Bonds more than 10 years

By Homer J. Livingston, President of The First National Bank of Chicago and President, American Bankers Association

LIKE MILLIONS OF OTHER AMERICANS, you probably know that our government's Series E Savings Bonds rank among the surest, safest and best investments in the world. But I wonder if you realize that an extremely attractive feature has been added to them.

Today, you no longer need cash your Bonds at maturity (9 years, 8 months after purchase). You can hold them for as long as 19 years, 8 months. And this enables you to get a far greater total yield from them, since the interest paid on Savings Bonds is cumulative. That is to say, your Bonds pay interest not only on the principal, but on the accumulated interest itself! Now, the longer you hold your Bonds the bigger this accumulation gets—and, correspondingly, the more money your Bonds pay in interest every year.

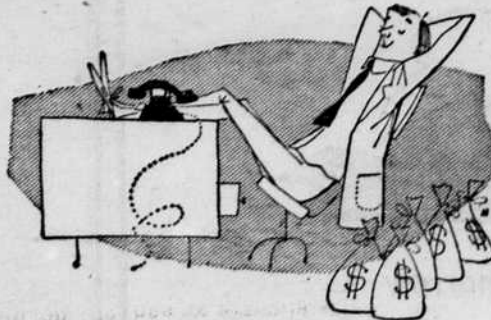

If you invested \$37.50 in a Savings Bond ten years ago, it could be redeemed for \$50.00

today. You would make \$12.50. But if you keep that Bond for ten more years, you will make a total of \$29.84 on your original investment. In other words, if you hold your U. S. Savings Bonds for double their original period, your total yield is considerably more than just double.

So, if you can possibly arrange it, hold your Bonds for the maximum period—19 years, 8 months. You don't have to sign any papers or visit your bank to do this. The extended earning period is automatic.

And, of course, go on investing in U. S. Series E Savings Bonds—through the Payroll Savings Plan where you work. If self-employed, invest in Savings Bonds regularly where you bank.

Want your interest paid as current income? Invest in 3% Series H.

United States Government Series H Bonds are new current income Bonds in denominations of \$500 to \$10,000. Redeemable at par after 6 months and on 30 days' notice. Mature in 9 years, 8 months and pay an average of 3% per annum if held to maturity. Interest paid semiannually by Treasury check. Series H may be purchased through any bank. Annual limit: \$20,000.

Extended Maturity Value...	\$134.68
Original Maturity Value...	100.00
Period After Maturity Date	Redemption Values During Each Year
1/2 to 1 year.....	\$101.50
1 1/2 to 2 years.....	104.50
2 1/2 to 3 years.....	107.60
3 1/2 to 4 years.....	110.80
4 1/2 to 5 years.....	114.00
5 1/2 to 6 years.....	117.60
6 1/2 to 7 years.....	121.20
7 1/2 to 8 years.....	124.80
8 1/2 to 9 years.....	128.60
9 1/2 to 10 years.....	132.60
Extended maturity value (10 years from original maturity date).....	134.68
