Coon, Neuberger Continue Debate in Eastern Oregon

LA GRANDE, Ore. (AP)—Sen. Richard L. Neuberger (D-Ore.) contended Thursday night that private utilities in the Northwest are not discriminated against by federal agencies in the distribution of Bonneville-produced power as he and Rep. Sam Coon (D-Ore.) carried their series of public debates farther into Eastern Oregon.

"In the last 16 years, Bonneville has sold 28 billion kilowatt hours of current to public organizations and 32 billion to private concerns," Neuberger asserted. "Private utilities pay Bonneville the rate of 2.34 mills per kilowatt hour while public bodies pay 2.81 mills."

The series of 10 debates cen-

ters on a bill introduced by Coon for "partnership" construction of the John Day dam on the Columbia River. Neuberger contends the bill is not in the public interest. Coon is arguing the affirmative.

"Rep. Coon complains that Oregon gets only 24 per cent of Bonneville power to Washington's 76 per cent," the senator asserted. "But let us remember that Oregon produced only 17 per cent of the power. If he divides it up by states as he foolishly wants to do, then we would be down to 17 per cent."

Wednesday night, Coon said the preference clause, which gives public agencies first call on the federally-produced power, should be modified because it favors the State of Washington.

Coon reiterated he is the author of the bill and accused Neuberger of "misleading the people." The representative, referring again to a national magazine article in which he said the senator had admitted deviating from the truth on occasions, said:

"Perhaps he (Neuberger) was immature then. But he is a senator now, and he shouldn't be misleading and misrepresenting."
