

# Ike's Setback Only Temporary; New Bulletin Says Condition Good

DENVER (AP)—President Eisenhower—cheerful again after a worrisome period of fatigue—Monday sent a letter to Vice President Nixon and handled another small batch of official business.

The chief executive's physicians reported his condition "satisfactory" and without complications Monday, whereas he didn't feel "as well as usual" Sunday night.

Monday, however, in a 10-minute business conference with his top lieutenant, Sherman Adams, Eisenhower:

1. Signed a letter to Nixon saying he hoped the vice president would continue to hold and preside at meetings of the Cabinet and National Security Council as he has done in the past during presidential absences from Washington.

2. Signed a memorandum to Secretary of Treasury Humphrey which, in effect, makes Japan a member of the General Agreement on Tariff and Trade (GATT).

3. Put his name on another routine memorandum authorizing John B. Hollister, director of the International Cooperation Administration, to send to six congressional committees a report which will say that no additional decisions have been made since June 30 on continuing foreign aid for various nations.

4. Approved an extension of time, from Oct. 1 to Oct. 21, for a presidential emergency to report on a labor dispute between the Pennsylvania Railroad and 35,000 non-operating employees.

These actions were announced by presidential press secretary James C. Hagerty, who told reporters that "of course" Eisenhower is cheerful.

### Concern Sunday

A period of concern had set in Sunday night when his doctors found the chief executive tired and feeling under par. The physicians, trying to determine the cause, took an X-ray of his damaged heart Monday to see whether there had been any enlargement. They found none.

Still further evidence of presidential improvement was the half hour, Hagerty said, the chief executive spent Monday morning playing a picture quiz game with the help of a nurse.

### Relief Felt

And in Boston, the internationally-famed heart specialist, Dr. Paul Dudley White, said that "I feel relieved."

He had been suspicious earlier that Eisenhower's weariness Sunday night meant something might be wrong.

### Bulletin Says "Good Day"

The chief executive's doctors summed things up as "a good day" in their latest medical bulletin at 8:45 p.m. (MST). It said:

"The President had a good day. He was in a cheerful mood. "There was no evidence of fatigue.

"The President had supper and again visited with Mrs. Eisenhower.

"His condition continues to be satisfactory without complications."

## Brazilian Election In Mud, Muddle

RIO DE JANEIRO, Brazil (AP)—Brazilians elected a President in drizzling rain Monday. The turnout was poor and a court battle loomed to settle the final results because of closeness of the race.

Supporters of the three leading candidates proclaimed victory for their nominees but results will not be known for 10 days or 2 weeks. The count starts at noon Tuesday and communications with remote interior areas are poor.

## AEC In New Drive To Harness H-Bomb

WASHINGTON (AP)—Top U.S. atomic scientists are joining forces at five research centers in an effort to harness the terrific power of the hydrogen bomb for peace-time energy purposes, Chairman Lewis L. Strauss of the Atomic Energy commission announced Monday.

Scientists connected with the long-range program, known as "Project Sherwood," said it holds the promise of supplying mankind with all the energy it will need for all time to come.

## 'I Shall Return' Says Peron From Paraguayan Exile

ASUNCION, Paraguay (AP)—Juan D. Peron implied Monday he plans to return some day to his Argentine homeland. Until then, he said, he is through with politics.

"I will not move a finger in political affairs, but will live a purely private life as Juan Peron," the deposed dictator said in a handwritten statement to a group of newsmen who asked an interview.

"When I do indulge in political affairs," he added, "I will return to my country."

The former Argentine strongman who arrived here Sunday to begin a life in exile, gave no indication when he might try to go back home.

## Typhoon Margie Dies Near Japan

TOKYO (AP)—Typhoon Margie blew itself out on Japan's doorstep Tuesday with winds of diminishing velocity crossing Southern Honshu at Hiroshima. Little damage was reported.

The storm had headed for Japan in the wake of destructive typhoon Louise. But by the time it reached Hiroshima its winds of 115 miles per hour had diminished to 58 miles an hour.

## Ike Illness Sends Stock Down in \$4-Million Loss

NEW YORK (AP)—Prices dropped \$5 a share and more Monday as selling came into the stock market on renewed concern over President Eisenhower's illness.

More than four billion dollars was estimated to have been wiped from the valuation of all shares listed on the New York Stock Exchange despite the fact only briefly did the selling show much urgency.

The Associated Press average of 60 stocks declined \$3.80 to close at \$169.50. That was below the closing figure of \$170.10 a week earlier, when the market plummeted on news of President Eisenhower's heart attack.

Lack of encouraging reports on President Eisenhower's condition was cited by some Wall Streeters as a factor in Monday's decline. However, many analysts have been predicting lower markets over the next few weeks because of nervousness engendered by the size of last Monday's fall.

## FBI Head Urges Public Support

PHILADELPHIA (AP)—J. Edgar Hoover said Monday that law-abiding citizens must mobilize to help "take the handcuffs off law enforcement."

The director of the Federal Bureau of Investigation told the 62nd annual meeting of the Association of Chiefs of Police that the crime picture in the U.S. is a "national disgrace" and declared that the problem is primarily a youth problem.

## Power Debate Continues

ONTARIO, Ore. (AP)—Rep. Coon (R-Ore) told farmers of this Eastern Oregon region Monday night that his "partnership" bill for construction of John Day Dam would mean more power sooner for domestic uses and industry.

But Sen. Neuberger (D-Ore) said that what farmers of the region really need is expanded markets for their produce. And

# Morocco Riots Flare Anew

RABAT, Morocco (AP)—French troops supported by planes struck back hard Monday at an estimated 2,000 Moorish rebel horsemen in the North near the Spanish Moroccan zone and in the East along the border with Algeria.

Sketchy reports reaching here gave a picture of reinforcements swarming over the rocky mountain roads to relieve hard pressed garrisons in the Beau Geste type forts which the French have manned since the Riff wars of the 1920's.

The fighting broke out Saturday night a few hours after Ben Youssef's successor, Sultan Mohammed Ben Moulay Arafa, bowed to French wishes and withdrew to retirement in Morocco's international city of Tangier.

### Commando Groups

Well organized rebel commando groups, each 100 men strong, made surprise attacks on three small French posts along the French-Spanish zonal border in the Riff Mountains.

The posts were abandoned, then retaken when French reinforcements arrived. Seven were reported killed, including two Europeans, and six missing at one of the posts. Losses inflicted on the rebels were not known.

### New Fights Flared

As French military commanders dispatched troops to the frontier with the Spanish Zone, new fighting flared on the high plateau of the middle Atlas Mountains 65 miles southeast of the Moslem holy city of Fez, along French Morocco's eastern frontier with Algeria.

The French-Moroccan garrison of Imouzer-Des-Marmoucha fought more than 18 hours to repulse an attack by hundreds of Marmoucha tribesmen.

### Fighting "Fierce"

Authorities in Fez described the fighting at Imouzer-Des-Marmoucha and nearby Berkine

as "fierce." The rebels were armed with submachine guns, they said.

Eleven of Imouzer's 50 Europeans were killed, including three women and two children. Military casualties, although not disclosed, were said to be high.

## French Heads Cancel Trip

PARIS (AP)—Premier Edgar Faure and Foreign Minister Antoine Pinay cancelled Monday a scheduled "courtesy and friendship visit" to Moscow, with the explanation that the atmosphere is not favorable now for this type of trip.

The French action reflected the bitterness in Paris at what was apparently considered a gratuitous blow to French prestige in the United Nations General Assembly's vote to discuss the Algerian situation.

In Moscow, Communist Party boss Nikita S. Khrushchev, in effect the spokesman for world communism, announced the Soviet Union supports the independence movement in North Africa. He called it the "national liberation" movement.

## the future resides in MEN WITH IMAGINATION!

Los Alamos Scientific Laboratory, the nation's most important institution for the development of atomic weapons, is interested in interviewing young graduate engineers and scientists—particularly those wanting to help in the development of the atomic age.

In addition to its continuing and ever expanding achievement in nuclear weapons research, the Laboratory is now pioneering in the fascinating fields of nuclear power and nuclear propulsion.

At the Laboratory, staff members have the opportunity of associating with leaders in research and experimentation... of working with some of the Western World's finest equipment and facilities... of winning recognition... of achieving advancement commensurate with ability.

If you would like more information about the Laboratory's career opportunities which are not civil service... about the delightful climate and area in which Los Alamos is located,

send your inquiry to DEPARTMENT OF SCIENTIFIC PERSONNEL Division 1
