Ten years along in his telephone career

After graduation in 1947 from Kalamazoo College with a B.A. in Physics and Mathematics, Ken Boekeloo joined Michigan Bell Telephone Company as a trainee.

Today, ten years later, Ken is a Division Plant Superintendent in Detroit. Eight district supervisors report to him, and they supervise some 1700 people. Ken is responsible for the installation and maintenance of plant facilities valued at \$135,000,000 including more than 500,000 telephones.

A big jump in ten years? Here's

what Ken Boekeloo says about it:

"The way the telephone business is growing, you can advance just as fast, and just as far, as you're able. ... And all along the way, from the student period through each assignment, the training and experience you get really prepare you for advancement.

"If you like to make contributions and take responsibility, and if you value the opportunities a growing business can offer, then the telephone company's the place to look for a career."

Ken Boekeloo is one of many young men who are finding rewarding careers in Bell Telephone Companies, Bell Telephone Laboratories, Western Electric and Sandia Corporation. Your placement officer can give you more information about all Bell System Companies.
