GEN. JAMES M. GAVIN, center, goes over papers with Sen. Leverett Saltonstall (R-Mass), left, and Sen. Lyndon Johnson (D-Tex). Gavin, army research and development chief who has announced plans to retire, met behind closed doors with the Senate Preparedness Subcommittee looking into the U.S. missiles and satellite programs. Gavin has blamed the "Pentagon system" for slowing up development of new weapons. (AP Wirephoto).

MODEL AUDREY GARCIA (right) displays her tomorrowland garb—a dazzling space suit with an umbrella-like "beep-beep" radio receiver—with which she led the procession of models at the Los Angeles California Fashion Creators spring show. Model Roxann Delman displays something a bit more practical—a midday playsuit with a pirate's hat.

NEW SESSION OF CONGRESS begins with a prayer by the chaplain in the House of Representatives chamber. Members, some 300 were on hand, are in foreground, their backs to camera. Speaker Sam Rayburn stands in front of his high-backed chair at center. Chaplain Bernard Braskamp is at rostrum in front of and on a level below the speaker. Reporters stand in press gallery at top. Congress faces grave problem brought on by space and missile developments here and in Russia. (AP Wirephoto)

CAPTION FOR THIS drawing taken from "Journey into the Cosmos," published in Moscow in 1955, is headed "perhaps this is how the first manned artificial satellite would look." It consists of jet motor (1); parachute (2) for braking its descent; movable wings (3) for gliding; hermetically sealed pilot's cabin (4) made of synthetic glass and equipped with metallic blings to protect pilot from burns by sun's rays; tanks for fuel (5); and oxydizer (6) for operation of jet engines in case of need to increase speed of flight when retarded by air resistance, and also for landing.
