

Eugene Hobbyist Exhibits Circus Animal Carvings

Wood carvings of circus animals by a Eugene hobbyist are on exhibit in the Student Union art

gallery until March 15. They are the work of Lee Altland, a travelling freight agent for a railroad company.

Altland, whose wife is head bookkeeper in the SU, has carved this group of circus animals, acrobats and wagons during the last 10 years.

Included in the display are teams of horses drawing circus wagons, lions, giraffes, elephants, clowns and a ringmaster. One highlight of this group is a miniature calliope.

Posts Still Open In YWCA Cabinet

Sophomore and junior women may petition for Senior YWCA Cabinet positions. Petition forms and information about these jobs are available at the YWCA office in Gerlinger Hall, according to Elizabeth Jallie, YW director.

Fresh adviser positions, for girls who want to serve as advisers to next year's freshmen, currently are open. Needed also by the YW are chairmen for international projects, current affairs, fine arts and promotion groups.

Cosmo Club To Take 'Good Look' at Oregon

Cosmopolitan Club will meet this Friday at 8 p.m. for a good look at Oregon. Students and members are invited to the meeting, held at the Congregational Church, 23rd and Potter St., to view two scenic movies on the state.

Dancing and refreshments are slated after the program. Information for foreign students about the spring term bus tour of Oregon will be available at this meeting.

Letters to the Editor

(Continued on page 2)
belts. The flag should be neatly folded as prescribed in AR 260-10." On the last line of section (b) paragraph 47 the manual states, "The flag should not be allowed to touch the ground."

We believe that the R.O.T.C. Department, being part of the Armed forces, should follow the prescribed rules for this time-honored ceremony. This department is supposed to be training future officers for our armed services. We ask, "how can these future officers be trained in the honored traditions of our military service when their instructors make such gross errors every evening at retreat?"

Emerald Editor:

Mr. Dudick has pointed out the perils of smoking, and he suggests that drinking is harmful. Unfortunately, many poor souls are hopeless alcoholics and nicotine addicts. To all such people, I offer the following sure-fire remedy. With each carton of "little white slavers," drink a quart of iso-propyl alcohol (commonly called rubbing alcohol) which, upon oxidation by the body, forms acetone. Now I ask you, Mr. Dudick, what solvent could be more effective than acetone for removing tar and soot from the heart and other internal organs? Thus one may continue to indulge in his favorite vices and at the same time preclude untimely ill health.

Inferior? Oregon? Discussion Slated

"Is Oregon Inferior?" will be the question for discussion Thursday evening in the YMCA-YWCA-sponsored Faculty-at-Home.

This program, designed to enable students to meet professors outside the classroom for exchange of views, will take students to the home of E. R. Bingham, assistant professor of history.

Interested students are asked to meet Thursday, Feb. 27, at 7:30 p.m. in the YMCA offices, 318 Student Union. Further information can be obtained by calling Russ Walker at Ext. 429.

Job Opportunities

March 3-4. National Security Agency. Physics, math. Mr. C. H. Penland will interview interested students.

March 4. Owens-Illinois. Business administration majors. Mr. M. L. Cannoy will interview on campus.

General Mills. Accounting, sales, chemistry. Mr. E. E. Youngman will interview.

March 5. General Electric Company. Accounting and financial careers. Accounting and financial careers are offered to graduates majoring in accounting, business administration, economics, mathematics and liberal arts. Students interested in other than an accounting and business type career should not sign up for interviews. Mr. R. M. Watkins will interview.

Carnation Company. Sales. Mr. E. C. Van Hoesen will interview interested students. Mr. W. L. Fritzingler will interview for the Can Factory Division—students interested must be mechanically inclined.

Arthur Young & Company. CPA. Accounting. Mr. Grant M. Bakewell will interview on campus.

March 6. Montgomery Ward. Trainee program. Mr. Larry Jones will interview interested students.

Campus Briefs

• All members of Kwama are asked to meet in the Side today at noon.

• KWAX will hold a Five and Dime record sale today on the terrace of the Student Union from 1-5 p.m. 75 r.p.m. records will sell for 5 cents and 45 r.p.m. records for a dime.

Bridge Tourney Set for Tonight

The University of Oregon's annual bridge tourney, held in conjunction with the 1958 National Intercollegiate Bridge Tournament, will take place tonight at 6:30 in the Student Union.

Open to all University students, the contest is being held on more than 100 college campuses throughout the United States between Feb. 23 and March 5.

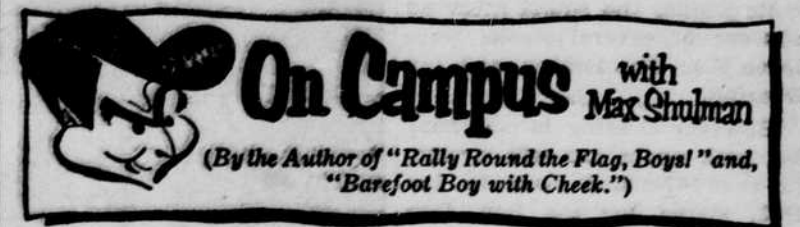

The hands from each college will be sent to the tournament headquarters at the University of Texas. Geoffrey Mott-Smith, contract bridge authority, will score the hands and determine the cam-

pus, regional and national winners.

The National Tournament Committee is a part of the Games Committee, Association of College Unions, of which the Erb Memorial SU is a member. The SU Recreation Committee is sponsoring tonight's program.

Those interested in participating in the tourney should contact DyAnne Schneider at DI 4-4281.

SCIENCE MADE SIMPLE: NO. 2

Though this column is intended solely as a vehicle for well-tempered drollery, the makers of Marlboro have agreed to let me use this space from time to time for a short lesson in science. They are the most decent and obliging of men, the makers of Marlboro, as anyone can tell from sampling their product. Only from bounteous hearts could come such a lot to like—such filter, such flavor, such flip-top box. The filter works; the flavor pleases; the box protects. Who can resist such a winning combination? Surely not I.

Today let us take up the science of medicine, which was invented in 1066 by a Greek named Hippocrates. He soon gathered around him a group of devoted disciples whom he called "doctors." The reason he called them "doctors" was that they spent all their time sitting around the dock and shooting the breeze. In truth, there was little else for them to do because disease was not invented until 1477.

After that, doctors became very busy, but it must be admitted that their knowledge of medicine was lamentably meagre. They knew only one treatment—a change of climate. For example, a French doctor would send all his patients to Switzerland. A Swiss doctor, on the other hand, would send all his patients to France. By 1789 the entire population of France was living in Switzerland, and vice versa. This later became known as the Black Tom Explosion.

Not until 1924 did medicine, as we know it, come into being. In that year in the little Bavarian village of Pago-Pago an elderly physician named Winko Sigafos discovered the hot water bottle. He was, of course, burned as a witch, but his son Lydia, disguised as a linotype, made his way to America where he invented the Mayo Brothers.

Medicine, as it is taught at your very own college, can be divided roughly into two classifications. There is internal medicine, which is the treatment of interns, and external medicine, which is the treatment of externs.

Diseases also fall into two broad categories—chronic and acute. Chronic disease is, of course, inflammation of the chron, which can be mighty painful, believe you me! Last summer my cousin Haskell was stricken with a chron attack while he was out picking up tinfoil, and it was months before the wretched boy could straighten up. In fact, even after he was cured, Haskell continued to walk around bent over double. This went on for several years before Dr. Caligari, the lovable old country practitioner who treats Haskell, discovered that Haskell had his trousers buttoned to his vest.

Two years ago Haskell had Addison's disease. (Addison, curiously enough, had Haskell's.) Poor Haskell catches everything that comes along. Lovable old Dr. Caligari once said to him, "Son, I guess you are what they call a natural born catcher."

"The joke is on you, Doc," replied Haskell. "I am a third basemen." He thereupon fell into such a fit of giggling that the doctor had to put him under sedation, where he is to this day.

But I digress. We were discussing medicine. I have now told you all I can; the rest is up to you. Go over to your med school and poke around. Bring popcorn and watch an operation. X-ray each other. Contribute to the bone bank . . . And remember, medicine can be fun!
