

# Spirit of men answer, Magnin says in talk

By KAREN MAUNEY  
Assistant News Editor

"To catch something of the spirit of the great men" of the ages was the answer Rabbi Edgar F. Magnin made to his own question "How can we make religion a transforming, transmitting force in our lives?"

The statement was made during Tuesday evening's RE Week addresses.

Magnin said that "the great things come from the outside" and that organizations, including the church and synogogue, are able only to attempt to "catch this spirit."

Besides the prophets of Israel, he included among the world's revolutionists three contemporary personalities: Einstein, Schweitzer and Ghandi.

Einstein he called "the closest to a saint as anyone I have ever known."

The revolutionary spirit of the prophets was based on the divine concept of right and wrong that stressed that the word of God was absolute. From this point Magnin claimed as "utter nonsense" the "alibis" which psychology and sociology present to those who do wrong. Responsibility must lie more directly with those who have committed wrongs.

Only when we recognize that there is something beyond ourselves, that "if we were what we are, we would be something," can we come to understand what "we are one world, one cosmos."

Professor John Magee in the second address of the evening emphasized how easy it was in this age of revolution to "look like a person, yet be a thing."

Magee described the revolution as resulting in three obstacles in our struggle to be a person: an immense expansion in awareness of the world's size, the ambiguity of the contact of cultures, and the increase of tempo which is moving "faster than biological time."

The revolution tests the revolutionary power of religion to give meaning to human existence.

Faith gives man a point of reference outside his social self, "breaking through the enclosure

of society... so that outside of myself I am able to be myself."

The magnitude of the revolution finds man limited in spirit and mind to be overcome only by a life of vocation which is "stamped with the life of the eternal."

This inward life is a "key to a life of relatedness. Without faith," Magee concluded, "I don't believe it's possible to be a person."

## Dean Gordon returns from test

Walter Gordon, Dean of the School of Architecture and Allied Arts, returned to the campus from Berkeley, Calif. He was one of ten architects in the country to be invited to Berkeley by the Institute for Personality Assessment and Research.

Architects, scientists, writers, poets and mathematicians were assembled for a three day testing program. Each was assigned to a group and given tests designed to help determine the nature of artistic and scientific creativity.

The Carnegie Corporation sponsored the testing.

ACTRESS Joy Harmon, 18, gives photographer an idea of why she wants to change her name in pose at New York's Manhattan Supreme Court. She petitioned the court to change her name to Joy "Forty-Two." She said in court petition "my proportions have become my hallmark." Her proportions, she said, are 42-22-35. She is appearing in Broadway play, "Make a Million."

COMEDIAN JERRY LEWIS, left, goes into his act as he was introduced to Russia's Deputy Premier Anastas I. Mikoyan, asking "Is this the guy?" Mikoyan, who doesn't speak English, maintained his composure for a moment, then burst into laughter. They met at Paramount Studio, Hollywood, where Lewis is playing the role of Navy officer.

FUR CAPPED MUSCOVITES, all smiles at the news, discuss the new Soviet cosmic rocket on a street in the Russian capital.

WILLIAM F. BLOOMFIELD, B.S.I.E., LEHIGH, '53, SAYS:

## "Join me for a day at work?"

Bill is Plant Service Supervisor for New Jersey Bell Telephone Company at Dover. He joined the telephone company after graduation, has held many jobs to gain valuable experience. Now he has three foremen and 32 craft people working for him. "It's a challenging job and keeps me hopping," says Bill. "See for yourself."

"8:30 a.m. With my test bureau foreman, I plan work schedules for the coming week. Maintaining equitable schedules and being ready for emergencies is imperative for good morale and service."

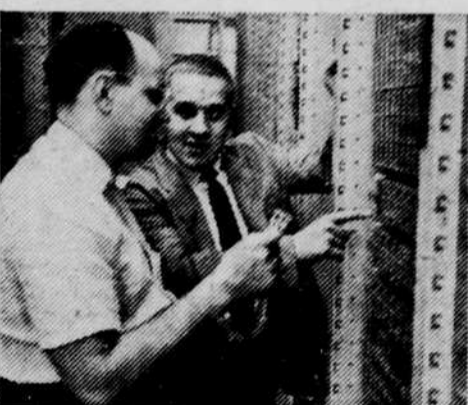

"9:10 a.m. The State Police at Andover have reported trouble with a mobile radio telephone. I discuss it with the test deskman. Naturally, we send a repairman out pronto to take care of it."

"11:00 a.m. As soon as things are lined up at the office, I drive out to check on the mobile radio repair job. The repairman has found the trouble—and together we run a test on the equipment."

"1:30 p.m. After lunch, I look in on a PBX and room-phone installation at an out-of-town motel. The installation supervisor, foreman and I discuss plans for running cable in from the highway."

"2:45 p.m. Next, I drive over to the central office at Denville, which is cutting over 7000 local telephones to dial service tomorrow night. I go over final arrangements with the supervisor."

"4:00 p.m. When I get back to my office, I find there are several phone messages to answer. As soon as I get them out of the way, I'll check over tomorrow's work schedule—then call it a day."

## Newspaper man to lecture Friday

J. Wesley Sullivan, news editor of the Oregon Statesman in Salem, will speak to two journalism classes Friday.

Sullivan, a Nieman Fellow at Harvard last year, will lecture at 10 a.m. in Allen 215 and at 1 p.m. in Allen 214. His subject will be the Nieman program, a plan which brings a small number of highly-selected young newspapermen to Harvard for a year of advanced study.

Sullivan is a 1943 graduate of the University's School of Journalism. Visitors are welcome to attend the lectures.

"Well, that's my job. You can see there's nothing monotonous about it. I'm responsible for keeping 50,000 subscriber lines over a 260-square-mile area in A-1 operating order. It's a big responsibility—but I love it."

Bill Bloomfield is moving ahead, like many young engineers in supervisory positions in the Bell Telephone Companies. There may be opportunities for you, too. Talk with the Bell interviewer when he visits your campus and get the whole story.
