

Werner von Braun set as Failing lecturer

Werner von Braun, Director of the Development Operations Division of the Army Ballistic Missile Agency, will deliver a Failing Distinguished Lecture here April 3.

Von Braun, world-renowned for his work with rockets and ballistic missiles, will discuss some aspects of his work in his address.

In space group in 1930

The German-born scientist joined the German Society for Space Travel in 1930.

Jobless bill okayed

WASHINGTON (UPI) — The House Ways and Means committee Thursday approved a measure to prevent some 300,000 jobless workers from losing unemployment compensation April 1.

The bill, which goes to the House Monday, would extend the emergency program only for workers who file valid jobless claims by April 1.

The measure provides for no payments to jobless persons who exhaust their state benefits after that date.

British position told

BONN, Germany (UPI) — British Prime Minister Macmillan—who started talks Thursday here with West German Chancellor Adenauer outlined Britain's position on armed forces in central Europe.

A spokesman said Macmillan told Adenauer Britain is willing to negotiate a limitation of armed forces in Central Europe without creating a military vacuum in the area.

But the limitation would involve no discrimination against any weapon or nation, the spokesman said.

Ike nixes wage boost

WASHINGTON (AP) — The Eisenhower administration came out Thursday against any increase in the present \$1 an hour minimum wage. Organized labor and some Democrats in Congress are seeking a rise to \$1.25.

Secretary of Labor James P. Mitchell made known the administration's position. He said in a statement he would soon recommend to Congress legislation to bring under the law "several million workers" now exempt from its provisions.

He came to the United States in 1945 under contract with the U.S. Army Ordnance Corps and became an American citizen in 1955.

Van Braun, who is only 47, received his B.S. degree from the Institute Technical in Zurich, Switzerland, in 1931, and his Ph.D. from the University of Berlin in 1934.

Rocket fuel worker

He was one of the first experimenters with liquid fuel rocket motors.

From 1932 to 1937, he was a liquid fuel rocket expert for the German Ordnance Dept., and from 1937 to 1945 was technical director of the German Rocket Research Center on the Baltic Sea.

He developed the V-2 Long Range Rocket and the A.A. Guided Missile during the latter period.

Worked at White Sands

From 1945 to 1950, von Braun was with the U.S. Dept. of Defense Ordnance Dept. as technical advisor to the White Sands Proving Grounds project.

In 1950, the rocket expert was appointed chief of the Guided Missile Development Division at the Redstone Arsenal, Huntsville, Alabama.

He has also written several books on space travel.

AWS to continue frosh handbook

The AWS Legislature will ask the ASUO Senate for the previous year's sum of \$350 to be again included in the AWS budget for publication of the AWS handbook.

AWS vice-president Molly Burke reported the decision of the AWS cabinet to continue publication of the pamphlet at the March 5 meeting of the Legislature.

It was agreed that questionnaires be sent to freshman women concerning the value of the booklet sent during the past summer to incoming freshman girls.

Diana Scott, AWS president, announced the appointment of Lorcy Hoyt as IAWS representative from the University and Janet Lewis as chairman of the newly-organized AWS Scholarship Foundation.
