

Pre-nursing students receive caps tonight

Jane Bodenweiser, a former pre-nursing student of the University, has received a \$350 scholarship from the Medical Auxiliary of Salem so that she can continue her nurses training. She and 30 other members of her class will receive their caps today at the University School of Nursing in Portland.

Among the 82 students to be recognized by the School of Nursing are Caroline Barney, Penelope Bellstram, Rosemary Berger, Jane Bodenweiser, Lynne Buono, Barbara Crozier, Eleanor Greene Danner, Sharon Golden, Susan Goss, Barbara Grant.

Marvis Grimm, Judith Hearn, Dorothy Hingson, Ann Hoffstaed, Janet Holman, Penelope Kortge, Karen Lantz, Leta Lovelace, Linda McKay, Ruth McNeely, Tarley McMillan, Susan Miller, Adreanna Nelson, Margaret Peterson, Susan Rafferty, Sandra Reinikka, Roberta Roehig, Sandra Schneider, Donna Story, Ellen Sumida and Alice West.

These students attended the University for three to six terms of pre-nursing before transferring to the Portland campus. When they graduate in June, 1963, they will receive Bachelor of Science degrees as well as qualifying as Registered Nurses.

Billiard champion to give exhibition lessons at Union

Willie Mosconi, world's pocket billiard champion, will visit the University to give exhibitions and instruction next Monday and Tuesday, Oct. 24-25. The exhibitions will be presented in the basement of the Student Union building.

Mosconi has been champion in his sport since 1942. *Sports Illustrated* magazine once featured him in a story and full page color picture.

Following is his schedule of exhibitions and lessons:

- MONDAY**
 10-12 open instruction
 2-4 open instruction
 4-5 exhibition
 7-8 exhibition
 8-9 question-answer period
- TUESDAY**
 10-12 open instruction
 2-2:30 open instruction
 3:30-5:30 girls only (refreshments)
 7-8 exhibition
 8-9 question-answer period

Additions enlarge sociology division

Three new faculty members are on the staff of the University's sociology department this fall and two members have returned from leaves.

Returning to his position as research professor after a one-year absence is Dr. Robert Dubin. He was a Ford visiting professor of behavioral sciences at the school of commerce of the University of Wisconsin. During the year he published six articles and worked on a new book, "Theory Building." He also worked on the second edition of "Human Relations in Administration."

Dr. Joel Berreman, professor of sociology, returned this fall

after two years as research associate with the Oregon Study of Rehabilitation of mental hospital patients.

Robert A. Ellis, who received his doctorate from Yale University and has taught at UCLA and Stanford, is a new associate professor on the staff. Ted T. Jitodai and Kenneth Polk have joined the department as instructors.

Ski club plans races, trips, fashion show

Several University racers plan to attend the Turkey Day Slalom at Mt. Hood over Thanksgiving vacation, according to John Beer, president of Ski Quacks.

Also planned by the group are a fashion show of ski equipment, sponsored by White Stag, an overnight trip to Hoodoo Bowl, several routine ski trips to local areas, and a ski equipment swap night for members.

A men's ski team, headed by Tore Steen and Beer, and a women's team, headed by Irene Longacker, plan to race in intercollegiate meets this season.

Research manual published by Chile

A research monograph by Gene E. Martin, assistant professor of geography, has been published by the University of Chile.

Martin's monograph, "Land Division in Central Chile," is a study of the different types of land utilization and their effect on land utilization and social organization.

The book is based on a year's work in Chile in 1954 when the Oregon geographer studied 330 different farm properties, made 1500 interviews with farmers, and did extensive mapping. His project was supported by the Social Research Council, the Grace L. Doherty Foundation, and the University of Chile.

Latin American land reforms are an integral aspect of the economy of these countries and outside studies are very important, according to Martin.

one of the library minions tapped me on the shoulder and reminded me that it was closing time.

All night I pondered over my inability to find a lead to the information I needed. I could not bring myself to believe that the wings being sported by Republicans are real, nor could I see how a library as complete as ours could fail to have a shelf or two of information on such an important and timely subject. I am reluctantly driven to the conclusion that our librarian has either been intimidated, or is himself a Black Republican.

Bayard H. McConnaughey,
 Asst. Professor, Biology.

Emerald Editor:

On behalf of the ASUO, I would like to congratulate this year's Homecoming committee for an excellent job. Under the leadership of General Chairman Patti Claggett, the committee staged what has been termed by Alumni President Joe McKeown and many others as "the best Homecoming I have seen."

Special credit goes to Gayle Osburn, publicity chairman, and Mary Alden, button sales chairman.

The well-organized schedule of events, the good weather and Saturday's score added up to a fine Homecoming.

Steve Schell,
 ASUO President.

McGlasson . . .

writer, more or less under this category.

THESE TWO problems are perhaps of great concern to the members of the different advisory teams of the prospective candidates, but to us they are just indications of the breakdown of political party lines and the emergence of the individual voter and of individual responsibility transplanted to the so-called Independent classification of voters.

SU movie scheduled

Ingrid Bergman and Curt Jergens star in this week's Sunday SU movie, "The Inn of the Sixth Happiness." The film will be shown in the SU Ballroom at 2:30 and 5 p.m.

Engineers!

Scientists!

WE'RE LOOKING FORWARD TO MEETING YOU.

Last year we had the pleasure of meeting many engineering and science seniors during our visit to the campus. As a result of our discussions, a gratifying number chose to join our company.

We'll be back on the dates below, and this notice is your invitation to come in and see us.

If you're interested in joining a company that's a leader in fields-with-a-future, you'll be interested in the advantages Boeing can offer you. Boeing is a major contractor on the advanced solid-fuel ICBM, Minuteman; on the boost-glide vehicle, Dyna Soar, and on the BOMARC defense missile system. Boeing's Vertol Division is one of the country's foremost builders of helicopters.

Boeing is also the nation's foremost designer and builder of multi-jet aircraft. Production includes eight-jet B-52G missile bombers, KC-135 jet transport-tankers and the famous Boeing 707 and 720 jet airliners.

Research projects at Boeing include celestial mechanics, solid state physics, nuclear and plasma physics, advanced propulsion systems, and space flight.

Expanding programs offer exceptional career opportunities to holders of B.S., M.S. and Ph.D. degrees in aeronautical, mechanical, civil, electrical-electronic and industrial engineering, and in engineering mechanics, engineering physics as well as in mathematics and physics. At Boeing you'll work in a small group where individual ability and initiative get plenty of visibility. You'll enjoy many other advantages, including an opportunity to take graduate studies at company expense to help you get ahead faster.

We hope you'll arrange an interview through your Placement Office. We're looking forward to meeting you.
