

Richards Talks on Party Responsibility, New Issues

By ANNETTE BUCHANAN
Staff Writer

"Since 1960 most of the new jobs in the United States have been provided for by the government," State Representative Joe Richards told members of the University Young Republicans at a meeting Thursday night in the Student Union.

"This is a result of new production processes which need less people," Richards said. He discussed cybernation, a revolution brought about by combining computers and automated self-regulated machinery, and its implications for people and political parties.

People will have to change many attitudes, including those toward employment and politics, according to Richards. The parties must remain alert in order to fulfill the changing needs of the people, he said.

Richard's speech was designed to raise ideas for discussion, rather than to make any major points. He talked about many problems of party responsibility and organization.

In a question and answer session, Richards opposed President Johnson's proposed constitutional amendment which would give four-year terms to the house of representatives, concurrent with the presidential term. He approved of the four-year term, but said elections should be in the off years.

Approved Voting Rights

Richards approved of the Voting Rights Act but said it is too selective in its application. He is against Senator Everett Dirksen's re-apportionment bill which he called an attempt to overrule the Supreme court's one-man, one-vote decision.

YR President Don Powell announced that Senator Hiram Fong of Hawaii will speak to the club as soon as his schedule permits. However, Gov. Scranton of Pennsylvania and Gov. Smiley of Idaho will not come due to other commitments.

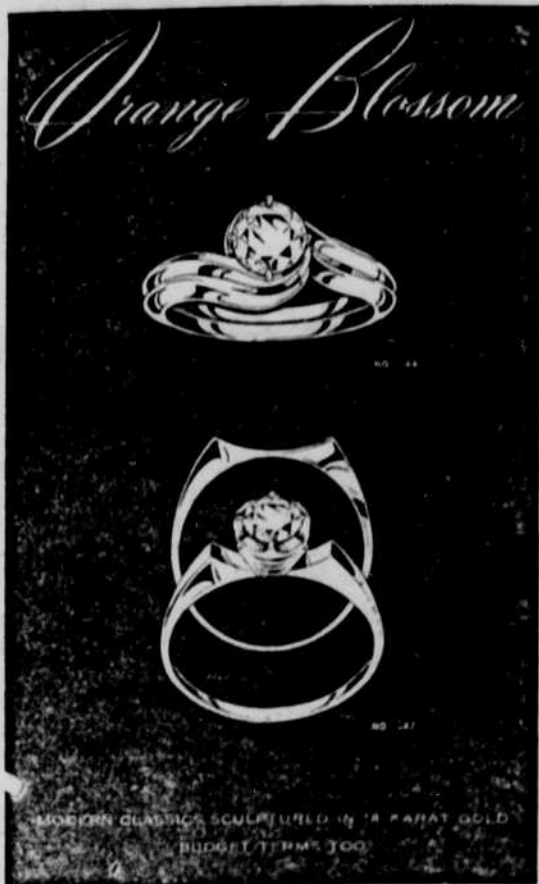

The Model Congress will be held early spring term, according to Powell. The Senate will be composed of YR and YD members. House representatives will come from campus living organizations.

The club's new vice-president is Bruce Gearhart. "Resolved: the state of Oregon should lower the voting age to 18" will be the debate topic at the next meeting, Jan. 27. Randy Gragg and Jerry Norton will argue the negative. Maurie Denner and Annette Buchanan will take the affirmative side.

Powell also announced several conventions which will take place this term. Interested persons may contact him for more information.

Air Force ROTC Presents Awards

Fall term Commendation Awards have been awarded to eight Air Force Reserve Officer Training Corps Cadets. The awards were announced by Lt. Colonel John W. Krietz, professor of aerospace studies.

Commendation awards are presented to cadets who have shown academic excellence and leadership in the classroom and on the drill field.

Freshmen receiving Commendation awards were Roy Atchinson, James Hannam, David Lawrence, and John Martin. Sophomores who received this award were Donald Fisher and Arthur Hurley.

The Junior Commendation award was presented to Doyle Jorgenson. Joseph Rinella, who has served as Arnold Air Society Commander for the past year, received the Senior Commendation award.

Phi Sigma Kappa Acquires New House

Phi Sigma Kappa fraternity has moved into a new house at 1433 Patterson St.

At present, the house contains living space for only twelve people. This residence will be the temporary home of the fraternity until membership increases.

Oregon Daily Emerald

The Oregon Daily Emerald is published five times in September and five days a week during the academic year, except during examination periods, by the Student Publications Board of the University of Oregon. Second-class postage paid at Eugene, Oregon 97403. Subscription rates \$5 per year, \$2 per term.

THE CHALLENGE ?

In space . . . Vietnam . . . black versus white . . . everywhere the basic challenge is to men's minds: to discover a deeper spiritual insight . . . a dividing line between myth and reality. David Tenniswood
B.S., Michigan State Univ.
M.S., Michigan State Univ.

Opportunity comes early at Ford Motor Company. Graduates who join us are often surprised at how quickly they receive personal assignments involving major responsibilities. This chance to demonstrate individual skills contrasts sharply with the experience of many young people entering the business world for the first time. At Ford Motor Company, for example, a graduate may initiate a project and carry it through to its final development. One who knows is David Tenniswood, of our research staff.

Dave joined Ford Motor Company in July, 1961.

Assigned to our steering and controls section, he helped develop a revolutionary steering system that will facilitate driving in future Ford-built cars. Currently a design engineer working on suspension design and analysis, Dave has been impressed by the extent to which management encourages personal initiative among recent graduates like himself. Here, management looks immediately to young engineers, like Dave, for fresh concepts that reflect their academic training and special abilities. Moreover, when the idea is accepted for development, the initiator is frequently given the opportunity to see the job through—from drawing board to production line!

The experience of Dave Tenniswood is not unusual. Ford Motor Company believes that early incentive is fundamental to individual growth and a successful career. If you are interested in a job that challenges your abilities and rewards enterprise, we urge you to contact our representative when he visits your campus.
